MERCHANDISING AND SERVICE ESTABLISHMENTS—PART II

RETAIL SERVICES—WHOLESALE TRADE RETAIL CHAINS—HOTELS

DISTRIBUTION OF SALES OF MANUFACTURERS

Published by the Authority of The HONOURABLE H. H. STEVENS, M.P., Minister of Trade and Commerce

OTTAWA J. O PATENAUDE, PRINTER TO THE KING'S MOST EXCELLENT MAJESTY

REPORT ON THE SEVENTH CENSUS OF CANADA, 1931

To His Excellency Captain the Right Honourable the Earl of Besslorough, P.C., G.C.M.G., Governor General and Commander-in-Chief of the Dominion of Canada:

MAY IT PLEASE YOUR EXCELLENCY:-

I have the honour to lay before Your Excellency the eleventh volume of the Report of the Seventh Census of Canada taken as of date June 1, 1931. This volume contains statistics on retail service establishments and on wholesale trade for the Dominion as a whole, for each of the nine provinces, for counties or census divisions and for the larger cities and towns. Statistics are also presented pertaining to retail chains, hotels, and to the distribution of sales of manufacturing plants. All figures relate to the calendar year 1930.

I have the honour to be,

Your Excellency's most obedient servant.

HENRY H. STEVENS,

Minister of Trade and Commerce.

Ottawa, September 1, 1934.

PREFACE

Volume XI is the second of two volumes of the 1931 Census Report in which the results of the Census of Merchandising and Service Establishments, 1931, are published. Volume X presents the detailed statistics of retail merchandise trade which forms the major part of the distribution census. The greater part of the present volume contains similar data for retail service establishments and for wholesale trade. Some miscellaneous results of the Census of Merchandising and Sorvice Establishments are also included.

Volume XI is divided into five sections. Section I presents statistics of retail service trade and is analogous in form to Volume X in which the results for retail merchandisc trade are given. In compiling the statistics for the Census of Merchandising and Service Establishments, 1931, an effort has been made to present as detailed information as possible for kinds of business, types of operation, and for counties or census divisions in each province. The Dominion summary for retail services, here presented, as well as the provincial tables which follow, contain analyses of establishments by kinds of business, amount of annual receipts, types of operation and forms of organization. Within the provincial reports are detailed tables for each city of 30,000 population or over and also summary tables for counties or census divisions and for each locality of 1,000 population or more.

Statistics for wholesale trade are given in Section II. A proper analysis of the wholesale field requires that all establishments be first divided into two main divisions according to type. The first has been called "wholesalers proper" and includes those establishments which carry on a regular wholesale business. The second group, called "other wholesalers", includes those wholesale firms which do not perform all the services rendered by the former type. Apart from this primary classification the analysis of the wholesale trade is somewhat similar in form to that of the retail field. The Dominion summary and provincial tables contain analyses of wholesale establishments by kinds of business, amount of annual sales, forms of organization, etc., and of commodity sales in many lines of trade. The provincial tables also contain detailed statistics for each city of 100,000 population or over, less detailed data for places of from 20,000 to 100,000 and summary figures for counties or census divisions and for places of from 5,000 to 20,000 population.

A large amount of detail regarding the business of retail chains is to be found in the types of operation tables for retail merchandise trade presented in Volume X. Those interested in the relation of chain sales to total sales in the several provinces and in the larger cities are referred to that work. Section III of this volume presents a summary of retail chains in Canada in 1930 and also contains analyses of the operations of chains in those kinds of business in which the chain store type of operation is of greatest importance.

In connection with the Census of Merchandising and Service Establishments, 1931, a statistical survey of hotels was made. Data were secured relating to employment and wage facts, gross receipts and other operating results. The results of this survey are presented in Section IV of this volume.

Although manufacturers were not included in the Census of Merchandising and Service Establishments, each manufacturing firm was asked to fill in a schedule showing the percentages of its total sales sold to the various channels of distribution. Section V presents the results of this study.

The Census of Merchandising and Service Establishments was taken by the Internal Trade Branch of the Dominion Bureau of Statistics. The materials for this volume were prepared under the direction of Mr. Herbert Marshall, B.A., F.S.S., Chief of the Internal Trade Branch, by Mr. A. S. Whiteley, M.A., assisted by Mr. A. C. Steedman, B.A.

R. H. COATS, Dominion Statistician.

RAPPORT SUR LE SEPTIÈME RECENSEMENT DU CANADA, 1931

A Son Excellence Capitaine le Très Honorable Comte de Bessborough, P.C., G.C.M.G., Gouverneur Général et Commandeur en Chef du Dominion du Canada:

PLAISE À VOTRE EXCELLENCE:

J'ai l'honneur de déposer devant Votre Excellence le volume XI du Septième Recensement du Canada effectué le 1er juin 1931. Ce volume donne les statistiques des établissements de services de détail et du commerce de gros pour l'ensemble du Dominion, pour chacune des neuf provinces, pour les comtés ou les divisions de recensement et pour chacune des grandes cités et villes. Il contient aussi les statistiques sur les chaînes de magasins de détail, les hôtels et la distribution des ventes des manufacturiers. Les chiffres couvrent l'année civile 1930.

J'ai l'honneur d'être.

de Votre Excellence le très obéissant serviteur.

HENRY H. STEVENS,

Ministre du Commerce.

OTTAWA, 1er septembre 1934.

PRÉFACE

Le volume XI est le second de deux volumes faisant partie du Rapport sur le Recensement de 1931 donnant le résultat du Recensement des Etablissements de Commerce et de Service en 1931. Le volume X donne les statistiques détaillées du commerce de détail qui forme le majeure partie du recensement de la distribution. La plus grande partie du présent volume donne des renseignements analogues sur les établissements de services de détail et sur le commerce de gros; quelques résultats analytiques divers du Recensement des Etablissements de Commerce et de Service y sont aussi inclus.

Le volume XI est divisé en cinq sections. La section I présente les statistiques des services de détail et elle est similaire dans sa forme au volume X donnant les résultats du commerce de détail. Dans la compilation des statistiques pour le Recensement des Établissements de Commerce et de Service, 1931, rien n'a été épargné pour donner des informations aussi détaillées que possible, par genres de commerce, types d'opération, comtés ou divisions de recensement de chaque province. Le résumé des services de détail pour le Dominion présenté ici ainsi que les tableaux provinciaux qui suivent contiennent des analyses des établissements par genres de commerce, chiffre d'affaires, types d'opération et formes d'organisation. Les rapports provinciaux contiennent des rapports détaillés pour chaque cité de 30,000 âmes et plus et des tableaux sommaires pour les comtés ou divisions de recensement et pour chaque localité de 1,000 âmes ou plus.

Les statistiques de l'ensemble du commerce paraissent dans la section II. Une analyse adéquate du commerce de gros exige que tous les établissements soient d'abord divisés en deux groupes principaux suivant leur type. Le premier a été désigné comme "maisons de gros" et il couvre ces établissements dont le commerce régulier est le gros. Le second groupe appelé "autres établissements de gros" comprend tous ceux qui ne donnent pas en entier tous les ervices du premier. En dehors de cette classification primaire l'analyse du commerce de gros est analogue dans sa forme à celle du commerce de détail. Le résumé pour le Dominion et he sableaux provinciaux contiennent des analyses des établissements de gros par genres de commerce, chiffre d'affaires, formes d'organisation, etc., et par ventes de denrées dans plusieurs lignes de commerce. Les tableaux provinciaux donnent aussi des statistiques détaillées pour chaque cité de 100,000 ou plus et des données moins détaillées pour les cités et villes de 20,000 à 100,000 âmes et des résumés par comtées ou divisions de recensement et par localités de 5,000 à 100,000 âmes ct des résumés par comtées ou divisions de recensement et par localités de 5,000 à 100,000 âmes.

De nombreux détails sur les chaînes de magasins de détail sont montrés dans les tableaux sur les types d'opération du commerce de détail dans le volume X. Ceux qui s'intéressent à la relation des ventes des chaînes de magasins au total dans les différentes provinces et dans les plus grandes villes sont référés à ce volume. La section HI du présent volume doune un résumé des chaînes de magasins de détail au Canada en 1930 et contient aussi des analyses des opérations des chaînes de nuegasins dans ces genres de commerce où le type de magasin en chaîne a pris la plus grande importance.

Un relevé statistique des hôtels a été fait en connexion avec le Recensement des Établissements de Commerce et de Service, 1931. Des données ont été recueillies sur l'emploiement et la rémunération, les recettes brutes et autres opérations. Les résultats de ce relevé paraissent dans la section IV du présent volume.

Bien que les manufacturiers ne soient pas compris dans le Recensement des Etablissements de Commerce et de Service, chaque établissement manufacturier a été prié de remplir un questionnaire montrant en pourcentages ses ventes totales passant par différents chenaux de distribution. La section V présente les résultats de cette étude.

Le Recensement des Etablissements de Commerce et de Service a été fait par la Branche du Commerce Intérieur du Bureau Fédéral de la Statistique. Les données pour le présent volume ont été préparées sous la direction de M. Herbert Marshall, B.A., F.S.S., chef de la Branche du Commerce Intérieur, par M. A. S. Whiteley, M.A., assisté par M. A. C. Steedman, B.A.

RETAIL SERVICES, CANADA, 1930

Introduction.—The first part of this volume covers the operations of retail service establishments during the year 1930. As a full description of the method and scope of the Census of Mcrchandising and Service Establishments, 1931, is given in Volume X of the Census reports, only a brief mention is made here of the procedure followed.

Method of Taking the Census.—On the basis of enumerators' lists of service establishments, which were revised at the Dominion Bureau of Statistics, schedules and instructions were mailed to all establishments included in the Census. The schedules, when completed, were mailed directly to the Bureau, where they were examined for accuracy and completeness. The returns were next coded and the information transferred to hollerith cards from which the mechanical tabulations were made.

Scope of the Census.—The term "services", as used for Census purposes, embraces amusement, recreational, educational, repair, cartage, motor transport, and other retail service establishments operated for gain. The Census of Merchandising and Service Establishments did not include professional services—such as doctors, dentists, lawyers, etc.—or trade services—such as building trades, carpentry, masonry, plumbing, heating or electrical contracting, etc.—or public utilities—such as electricity, gas, street railway, etc.

Generally, service establishments are more specialized than merchandising stores—that is, the kind-of-business classification, such as "barber shop", is likely to be a more accurate definition of the kind of business carried on than the terms used to describe merchandising establishments. On the other hand, the enumeration of service establishments presents more difficulties than in the case of most retail stores. While some kinds of business-such as theatres, laundries, pool halls, etc.—are fairly easy to distinguish, other establishments offering educational or business services are much more difficult to enumerate. In view of the indefinite character of some service establishments and the difficulty in distinguishing between intermediate and final service operations, a complete enumeration of retail service establishments could not be expected in an initial survey. Another factor which gives rise to incomplete enumeration is the seasonal character of many service establishments. As the Census enumeration was made in the early part of June, service establishments which were not in operation at the time of the enumerator's visit may not have been listed. It is thought, however, that the coverage in respect of bowling, pool and billiard halls, motion picture houses, cleaners and pressers, laundries, barber and beauty shops, automotive repair shops, shoe repairers, blacksmith shops, as well as for motor transportation, is quite comprehensive.

Method of Classification.—Retail service establishments, as has already been mentioned, are places of business which provide personal or repair services for the public or offer amusement, recreational, educational or transportation facilities. As the Census was based upon establishments, each unit or branch of a multiple or chain organization was treated as an individual retail establishment and separate particulars secured for each place of business. Some establishments engage both in merchandising and in providing services. As a rule, such establishments were classified under "services" if more than 50 per cent of the total receipts was derived from service operations, otherwise the establishments were considered as merchandising concerns. While it was necessary to classify such dual places of business in one eategory or the other, an analysis has been made of the service operations conducted by merchandising firms and of the merchandising business carried on by service establishments.

Kinds of Business.—The retail service field, for the purposes of the Census, has been divided into ten broad kind-of-business groups, namely: amusement and recreation, business, domestic, educational, personal, photography, undertaking and burial, repair and service, storage and transportation, and miscellaneous. Each of these groups, however, is further subdivided into a number of detailed classifications, consisting altogether of approximately 100 classes. The kind-of-business classification to which each establishment is assigned is based directly upon the

RETAIL SERVICES, CANADA, 1930

Introduction.—The first part of this volume covers the operations of retail service establishments during the year 1930. As a full description of the method and scope of the Census of Merchandising and Service Establishments, 1931, is given in Volume X of the Census reports, only a brief mention is made here of the procedure followed.

Method of Taking the Census.—On the basis of enumerators' lists of service establishments, which were revised at the Dominion Bureau of Statistics, schedules and instructions were mailed to all establishments included in the Census. The schedules, when completed, were mailed directly to the Bureau, where they were examined for accuracy and completeness. The returns were next coded and the information transferred to hollerith eards from which the mechanical tabulations were made.

Scope of the Census.—The term "services", as used for Census purposes, embraces amusement, recreational, educational, repair, cartage, motor transport, and other retail service establishments operated for gain. The Census of Merchandising and Service Establishments did not include professional services—such as doctors, dentists, lawyers, etc.—or trade services—such as building trades, carpentry, masonry, plumbing, heating or electrical contracting, etc.—or public utilities—such as electricity, gas, street railway, etc.

Generally, service establishments are more specialized than merchandising stores—that is, the kind-of-business classification, such as "barber shop", is likely to be a more accurate definition of the kind of business carried on than the terms used to describe merchandising establishments. On the other hand, the enumeration of service establishments presents more difficulties than in the case of most retail stores. While some kinds of business—such as theatres, hundries, pool halls, etc.—are fairly easy to distinguish, other establishments offering educational or business services are much more difficult to enumerate. In view of the indefinite character of some service establishments and the difficulty in distinguishing between intermediate and final service operations, a complete enumeration of retail service establishments could not be expected in an initial survey. Another factor which gives rise to incomplete enumeration is the seasonal character of many service establishments. As the Census enumeration was made in the early part of June, service establishments which were not in operation at the time of the enumerator's visit may not have been listed. It is thought, however, that the coverage in respect of bowling, pool and billiard halls, motion picture houses, cleaners and pressers, laundries, barber and beauty shops, automotive repair shops, shoe repairers, blacksmith shops, as well as for motor transnortation, is quite comprehensive.

Method of Classification.—Retail service establishments, as has already been mentioned, are places of business which provide personal or repair services for the public or offer amusement, recreational, educational or transportation facilities. As the Census was based upon establishments, each unit or branch of a multiple or chain organization was treated as an individual retail establishment and separate particulars secured for each place of business. Some establishments engage both in marchandising and in providing services. As a rule, such establishments were classified under "services" if more than 50 per cent of the total receipts was derived from service operations, otherwise the establishments were considered as merchandising concerns. While it was necessary to classify such dual places of business in one category or the other, an analysis has been made of the service operations conducted by merchandising firms and of the merchandising business carried on by service establishments.

Kinds of Business.—The rotall service field, for the purposes of the Census, has been divided into ten broad kind-of-business groups, namely: amusement and recreation, business, domestic, educational, personal, photography, undertaking and burial, repair and service, storage and transportation, and miscellaneous. Each of these groups however, is further subdivided into a number of detailed elassifications, consisting altogether of approximately 100 clusses. The kind-of-business classification to which each establishment is assigned is based directly upon the

20939-2 5

nature of the services offered. Some places of husiness offer more than one kind of service; in such cases the establishment is given the classification which agrees most closely with the major kind of business conducted.

While each return has been given an exact classification, it has been necessary, in certain cases, to combine figures for two or more classifications in order to avoid revealing the operations of individual concerns. Such instances occur generally in the case of tables for cities or counties. For the Dominion as a whole, and for most of the provinces it has been possible to present detailed information for each kind of business.

A definition of each kind-of-business classification used in the tables follows.

Amusement and Recreation Group

Bowling and Pool Halls.—Two kinds of business are included: billiards and pool halls, and bowling alleys. Often these establishments make minor sales of confectionery and tohacco.

Theatres.—Three kinds of theatres are included under this heading: motion picture houses, motion picture houses which also offer vaudeville performances, and opera houses and legitimate theatres.

Other Amusement Places.—This classification includes the operation of auditoriums or halls for concerts, lectures, etc.; amusement parks operated for gain; concessions operated at fairs, pleasure resorts, parks, etc.; ocean piers operated for profit, penny arcades, etc.

Other Recreation Places.—This classification includes dancing academics, dance halls, roof gardens; clubs, grounds or halls in which athletic contests or games are conducted for gain; bathhouses on beaches operated for profit; swimming pools; boats and canoes for hire; renting of camp grounds; golf courses (other than those operated by private ciubs); skating rinks, ice; skating rinks, roller; riding schools; and lending libraries.

Business Services Group

Advertising Services.—Under this heading are shown the various types of advertising establishments and related agencies. The most important kind of business is the advertising agency, which arranges for and prepares local and national advertising projects. The receipts shown for such establishments are not the revenue derived from the activities but the total value of the advertising placed.

· Other Business Services.—Under this heading are included collection and credit agencies and auction houses.

Domestic Services Group

Cleaning and Dyeing.—The businesses included under this heading are cleaning, pressing and repairing establishments (chiefly neighbourhood shops); cleaners and dyers; and establishments engaged in cleaning carpets or general cleaning.

· Laundries.—This classification includes both commercial and hand laundries.

Other Domestic Services.—Under this heading are included coat and towel supply agencies; establishments offering furnigation and vermin extermination services; firms engaged principally in fur cleaning, repairing and storage for retail customers; hat blocking and cleaning shops; window cleaners; and establishments which rent theatrical costumes and chairs.

Educational Services Group

Only commercial schools are included under this heading. These are chiefly trade or occupational schools, such as dressmaking, hairdressing, automobile repair, etc.; and business or music schools. Music and other teachers who offer instruction in private homes have not been included in the census.

Personal Services Group

This classification includes barber shops, heauty parlours and hairdressers, shoe shine stands, and turkish bath and massage establishments.

Photography Group

This classification includes photographers and portrait studios; establishments engaged in developing, printing or enlarging photographs and films; and photostating firms.

Undertaking and Burial Group

Two kinds of business are included undor this heading: first, funeral directors; and, second, firms which do funeral directing and also sell furniture. The sales of furniture form less than half the total business, otherwise the establishment is classed as a merchandising store. Such establishments are included in Vol. X, Retail Merchandise Trade, and are classified as "Furniture and Undertaker."

Repair and Service Shops Group

These are establishments all, or the greater part, of whose revenue is derived from repair work. First are the automobile repair and service shops, which include service garages; ignition, battery and electrical shops; auto paint shops; tire repair shops; top and body shops; other automotive repair shops; auto washing and polishing shops; aut storage garages or auto parking places. Then follow, bicycle and motorcycle repair shops, blacksmith shops and carriage shops, and boot and shoe repair shops (cobblers). Other repair and service shops include harness repair shops, locksmiths, radio and electrical repair shops, upholstery and furniture repair shops, watch and jewellery repair shops, and miscellaneous repair establishments (including service on business machines and household appliances).

Storage and Transportation Group

Cartage and Storage.—This classification includes general transfer establishments (baggage transfer, light delivery and trucking); trucking and cartage (local moving, trucking and hauling); messenger and light dolivery services (bicycle, motorcycle and light ear); warehousing, storage and trucking; warehousing and storage establishments (not offering transport services); and storage houses (not including publicly-owned storage places, grain elevators, or storage houses operated in conjunction with some other business).

Taxi and Auto Livery Service.—This classification includes taxis and auto livery or drive-your-self establishments.

Motor Transportation.—Local bus lines are those operated independently of street rall-way systems for city and suburban passenger transportation. Stage lines (inter-city) are motor transport companies carrying passengers between cities or other localities beyond the immediate vicinity of their head office. Motor freight hauling includes companies engaged in long-distance freight or express motor transportation as public carriers. Milk and creum and other furm products trucking includes firms which are engaged in transporting agricultural products by motor. Miscellaneous transportation includes sightseeing buses, ambulance services and airway transportation.

Miscellaneous Services Group

The miscellaneous services include machino shops for small repair work, baggage checking, private employment agencies, garment repairing, feed and livery stables, and miscellaneous services.

Types of Operation Defined

Types of Operation.—In addition to being classified according to kind of business, each establishment has been classified as to type of operation. Broadly speaking, all establishments have been classified either as independents or as units of some type of multiple organization. While the multi-unit type of operation is less developed in the retail services field as a whole than in the merchandising, it is of considerable importance in some lines and especially in the motion picture theatre business.

Definition of Chain.—In the retail services field a chain is defined as a group of four or more establishments of the same or similar kind of business, owned and operated by the same person or firm. Groups of two or three units are not considered as chains but are classified as two-unit or three-unit multiples and appear under these headings in the various tables in which retail service establishments are classified according to type of operation. The principal types of operation shown in the census are:-

Single independents

Two-unit multiples

Three-unit multiples Local chains

Provincial chains

Sectional chains

National chains

Local chains are located entirely, or almost so, within the same town or city. Provincial chains, as their name implies, have their units located within one province. The units of sectional chains are spread over two or three provinces, while national chains have units in four provinces or more.

Other Types of Operation.—Leased concessions and leased departments form the most important types under this heading. Barber shops, beauty parlours, valet services, etc., are operated in leased departments of hotels or other non-merchandising establishments. These are classified as leased concessions. On the other hand, similar services located in leased premises of merchandising establishments are classified as leased departments.

Explanation of Terms

Proprietors.—According to the instructions accompanying the census schedules, only the proprietors and firm members actively engaged in the business were to be reported.

Employment and Wage Facts.—The tables show the number of full-time employees and part-time employees by sex and the amount of salaries and wages paid to each class. The definition of part-time employees was "persons who are employed only part of the day or for part of the week," while "persons employed part of a year but on full-time during the period of their employement are to be considered full-time employees."

Receipts.—The receipts figures shown in the tables usually represent the total income secured from the services performed with no deductions for wage costs or other operating expenses. In many instances, establishments classified in the retail services field sell limited quantities of merchandise as a subsidiary activity. In such cases, net sales of merchandise are included in the tables in addition to receipts from services performed. In the business services group the receipts figure shown for advertising agencies requires a word of explanation. In this particular case the value of receipts represents the total value of advertising placed rather than the commission or profit of the advertising companies.

Stocks on Hand.—While this item is of lesser importance here than in the retail merchandising field, the subsidiary sale of merchandise in many service establishments results in stock figures being shown in the tables for most kinds of business. The operators of the various establishments were asked to state the value of their inventories at the end of 1930 on the basis or replacement cost of the goods. On account of the varying proportions of merchandise sales and service receipts reported by different companies, no attempt should be made to derive a turnover rate from a comparison of the receipts and stock figures shown in the tables.

Operating Expenses.—Although for practically every establishment in which there were hired employees, the amounts paid as salaries and wages during the year were reported, the returns were not so complete for other operating expenses. The tables devoted to operating expenses show such data only for those establishments which answered all questions on operating expenses.

- Operating expenses were reported under three headings in the census schedules:-
- (1) Salaries, wages and commissions paid during the year,
- (2) Rent, if any, paid for business premises during the year,
- (3) All other expenses. This item includes taxes, insurance, office and overhead expenses, including maintenance, stationery and supplies, light, heat and power, interest on money borrowed for current business operations, and other operating expenses. For a detailed description of the method followed in arriving at total operating expenses of service establishments the reader is referred to the section on operating expenses in the "Analysis of Results."

DESCRIPTION OF DOMINION TABLES

STANDARD SUMMARY OF RETAIL FACTS

The Standard Summary of Retail Facts presents the salient features of retail services in each province in a form which enables a ready comparison to be made between provinces.

TABLE 1.*—RETAIL SERVICES, BY KINDS OF BUSINESS

Table 1 presents the principal statistics for retail services by kinds of business. The number of establishments, proprietors and firm members with and without fixed salaries, employment and wage facts, receipts and value of stocks on hand are shown for each group and also for the detailed kind-of-business classifications. In the second half of this table, similar information is given for the major business groups in each province.

Table 2.*—Retail Services—Rent and Other Operating Expenses, by Kinds of Business

In Table 2, details of operating expenses are shown by kinds of business for those establishments which reported such information. The expenses are shown under the headings of "total wage cost", with sub-headings for value of proprietors' services and salaries and wages of employees, and "all other expenses, including rent". In addition, rent paid by establishments in leased premises is shown in relation to the total receipts of such establishments.

TABLE 3.—RETAIL SERVICES--EMPLOYMENT BY SIZE OF BUSINESS

Table 3 shows the distribution of full-time employees by size of business for Canada as a whole and also for each economic division.

TABLE 4*.--RETAIL SERVICES, BY TYPES OF OPERATION

Retail service establishments are classified by type of operation in Table 4, first for all kinds of unisses combined and then for theatres. Summary figures for each province are given in the second part of this table.

Table 5.*—Retail Services—Receipts by Size of Business

Table 5 carries the analysis of retail services one step further by classifying establishments in each kind of business according to the amount of annual receipts. The number of establishments and amount of receipts are shown for eleven size-of-business groups.

TABLE 6.*—RETAIL SERVICES—SALE OF MEALS AND MERCHANDISE

Table 6 shows the value and nature of merchandise sold in service establishments. A similar table in the volume devoted to retail merchandise trade shows the extent and nature of service activities carried on in retail merchandise stores.

Table 7.*—Retail Services—Forms of Organization

The forms of organization under which the retail service trade is conducted are shown in Table 7. Individual proprietorships constitute the most numerous form of organization in retail service trade, but a greater amount of business is conducted under the corporate form of ownership. Most corporations, however, are private corporations which were formed to give legal form to the private business of an individual or individuals.

TABLE 8.*-RETAIL SERVICES-CAPITAL INVESTED

In Table 8 the amount of capital invested in retail services is shown by kind-of-business groups. Operators of service establishments were asked to report the total amount of capital invested in their business at the end of 1930.

TABLE 9 -- RETAIL SERVICES -- AVERAGE CAPITAL INVESTMENT

The average capital investment for independent establishments in rented and owned premises is shown in Table 9 for selected kinds of business. As company figures alone were available for multiple organizations, it was not possible to include them in this table.

^{*} Tables similar to those marked with an esterisk appear in each of the provincial sections.

Tables 10 and 11.—Retail Services, Cities of 10,000 Population and Over

These tables give summary figures for retail services in cities, first, for all kinds of business combined and, second, for leading kinds of business.

TABLES 12 TO 19*.-RETAIL SERVICES, BY SIZE OF LOCALITY

Tables 12 to 19 give figures by kinds of business and types of operation for combined localities. The groups are: cities of more than 30,000 population; cities from 10,000 to 30,000 population; towns and villages from 1,000 to 10,000 population; and all places under 1,000 population, including unincorporated places irrespective of size of population.

ANALYSIS OF RESULTS

Extent of Retail Services

The total receipts of all retail service establishments included in the Census were \$249,455,900 for the year 1930. The 42,223 service establishments employed an average of 41,875 full-time male employees and 13,382 full-time female employees who received \$58,217,700 as salaries and wages. There were also employed in the service establishments an average of 7,880 males and 1,104 females on a part-time heals. These part-time employees received \$3,014,200 as salaries and wages, making the total payroll of service establishments \$61,231,900 for the year. In addition to hirde employees, there were 44,822 proprietors of firm members actively engaged in the operation of the service establishments. The number of persons engaged in these places of business thus totalled 108,862. While proprietors and firm members receive compensation for their services, only a very few allocate to themselves any definite salary. Of the 44,622 proprietors covered by the Census, only 3,232 were reported as receiving a fixed salary. The amount of carnings reported for these 3,232 proprietors was \$6,323,300.

Retail Services by Provinces

Of the total receipts of service establishments of \$249,455,800, places of business in Ontario accounted for \$109,397,000 or 43.85 per cent. Quebec came second with 25.49 per cent of the total receipts and British Columbia third with 9.90 per cent. The distribution of the trade of service establishments by provinces is shown in Table I.

TABLE I -CANADA-RETAIL SERVICES, BY PROVINCES, 1930

Retail Services by Size of Locality

The business of retail service establishments is concentrated to an even greater extent in the larger dities than is the case with retail morchanause trade. Places of 30,000 population or more contained only 29.15 per cent of the total population of the Dominion, but retail service establishments located in such centres accounted for 71.24 per cent of the receipts. The per capitar receipts for service establishments show a wide difference between rural and unfail localities.

[&]quot;Tables similar to those marked with an asterisk appear in each of the provincial sections

A large part of the business of service establishments is essentially urban in character and analy services can only be developed on a reasonable scale where ample patronage can be secured. On the other hand, there are a few kinds of business, such as blacksmith shops, which are found largely in rural localities or small towns. As has already been mentioned, slightly more than 70 per cent of the total retail service business is handled by establishments in places of 30,000 population or more. The proportion varies considerably with different groups of services. The business of barber shops, for example, is less concentrated and establishments in cities of 30,000 and over necounted for approximately 50 per cent of the total receipts for this kind of business. Three-quarters of the total receipts above, so that is a considerably such as the other hand, were received in such localities, and the business of taxi and anto livery services is concentrated to approximately the same degree in cities of 30,000 and over.

Receipts by Kinds of Business

The amusement and recreation group, with 21-34 per cent, hus the largest proportion of the total business of retail service establishments for Canada as a whole. The storage and transportation group follows closely with 20-45 per cent. Other important groups are the domestic services with 14-71 per cent, repair and service shops with 12-30 per cent, the business services group with 11-79 per cent, and the personal services group with 9-80 per cent. To relative proportions of total service business handled by the different groups vary considerably from one province to another.

Amusement and Recreation Group.—This group accounted for more than 30 per cent of the total receipts in each of the Maritume Provinces, where the receipts of the storage and transportation group were relatively small. In the remaining provinces the proportion of total receipts for the amusement and recreation group ranged from 18-87 per cent in Quebec to 28-2 per cent in Saskatchewan. Receipts of motion picture houses and legitimate theatres formed more than 70 per cent of the total for the group. Motion picture theatres, with receipts of \$38,479,500, constituted the most important kind of business in the service field and accounted for almost one-sixth of the total receipts of all ostablishments. Billiard and pool halls had the largest number of establishments in the amusement and recreation group but their receipts of \$4.350,500 were not greatly in excess of the \$3,033,00 recorded by 200 bowling alleys.

Business Services Group.—Of the \$29,409,300 receipts given for this group, \$21,940,900 were reported by advertising agencies. While the receipts of the business service group form almost 12 per cent of the total service business for Canada as a whole, the business is concentrated largely in Ontario and Quebec. These two provinces account for \$25,686,600 out of the total of \$29,409,300 already mentioned.

Domestic Services Group.—The receipts of this group form 14·71 por cent of the total. The proportion varies from 11·84 per cent in Prince Edward Island to 17·87 per cent in British Columbia. The most important kind of business in this group is "laundries," both power and hand. The laundries, alone, account for \$20,645,500 of the total of \$36,711,400 for this group. Another important section in this group is "cleaning, pressing, repairing and dyeing establishments." which had receipts of \$13,299,000.

Educational Services Group.—This group had less than 1 per cent of the total husiness for Canada as a whole and the receipts of the group formed more than 1 per cent in only one province. This classification includes only educational institutions operated for gain and does not embrace individual tutors or instructors.

12

The Personal Services Group had slightly less than 10 per cent of the total receipts for service establishments. In five of the vine provinces the receipts of this group constituted between 9 and 12 per cent of the total. In Maritoba the proportion was 8·16 per cent and in New Brunswick 13·52 per cent. Barber shops formed the most important section of this group both in number and in amount of business done. More than two-thirds of the total receipts of \$24,400,500 shown for this group was reported by barber shops, while \$6,109,300 were reported by beauty parlours and hairdressers. These receipts, of course, do not include revenue of such departments in department or other stores or the income which may be gained by individuals offering such services in their own homes.

The Photography Group includes portrait studios, photographers and firms engaged in printing and developing photographs, but not blue-printing plants or commercial printing plants which may do reproducing work. The receipts of the photography group form 2-04 per cent of the total for all service establishments. Practically four-fifths of the total receipts for the photography group are attributed to photographers.

The Undertaking and Burial Group had receipts of \$9,299,800 or 3.73 per cent of the total for service establishments. Funeral directors accounted for \$8,703,500 and undertaking and furniture establishments for \$592,700. The latter classification overlaps with a similar kind of business in the merchandlse field, and establishments were classified on the basis of where sales of furniture or receipts from undertaking predominated. The furniture and undertaker combination is a much larger business than undertaking and furniture, as sales of \$4,896,900 are shown in the merchandising tables for the former, with receipts of \$466,600 for undertaking services. This division, however, is not entirely accurate as many establishments in the furniture and undertaker classification tended to report sales of caskets, etc., as merchandise sales rather than as part of the service receipts.

The Repair and Service Shops Group embraces all establishments offering repair and mechanical services directly to the public. The receipts of this group form 12:30 per cent of the total for retail services. Of the total receipts of \$30,675,300 shown for the repair and service shops, \$11,208,200 were reported by automotive establishments, such as service garages, autopaint shops, etc. This total, however, does not represent the total amount spent for automotive repairs or services, as service receipts amounting to \$31,620,800 were reported by automotive establishments in the retail merchandise field. On the other hand, there are included in the receipts of automobile repair and service shops \$912,100 for sales of merchandise. Blacksmith shops and boot and shoe repair shops are two important kinds of business in this group. The total receipts for each business were between seven and eight million dollars.

The Storage and Transportation Group had receipts amounting to 20-43 per cent of the total for all establishments. Three main divisions are included in this group. These are cartage and storage, taxi and auto livery service, and motor transportation, other than local trucking. The first section, cartage and storage, is the most important of the three with receipts amounting to \$23,677,100 or almost half of the total for the group. Taxi and auto livery services had receipts of \$8,200,300, which were slightly more than half of the amount shown for the motor transportation classes. The most important kind of business in the miscellaneous transportation classification is survey transportation.

Miscellaneous Services with receipts of \$7,780,000, or 3·12 per cent of the total for all establishments, embraces all kinds of service businesses not included elsewhere. The more important kinds of business included in this group are muchine shops for repair work, baggage checking, and feed and livery stables.

Operating Expenses of Retail Service Establishments

The wide diversity of functions performed by establishments in the service field is reflected in the relative operating expense ratios for different kinds of business. In the case of retail merchandise stores, operating expenses form the major part of the cost of distributing goods and represent the charges that are entailed in the final stage of the passage of merchandise from manufacturer or producer to consumer. In the case of service establishments, operating expenses are often more in the nature of manufacturing or producing cost than of distributive costs although the latter are important. The services performed in barber shops or beauty parlours

are, in large measure, produced at the time of the customer's visit and are principally labour costs. Some equipment, of course, is necessary and premises are required in which the services may be performed. In the case of motion picture houses, the chief service is mechanical and consists of providing facilities for the viewing of the films which are being chilbited. Bowling and pool halls enable their patrons to secure the use of certain recreational equipment which, again, is a somewhat different type of service to the foregoing and entails different costs. In the case of domestic and repair services we find two functions performed. The first is renovating of the customer's own property as is done in laundering and cleaning and pressing and also in mechanical work for which no new materials are required. The second is the addition of new materials to the customer's property as in the case of shee repairing or other repair work in which new parts or supplies are introduced. The transportation group forms another type of service in which there is no change in the person or property but merely a change in location affected by the transporting concern.

The principal items of expense in retail service establishments are salaries and wages, rent for leased premises or real estate costs for owned property, advertising, supplies, telephone, light, heat, power and water, taxes and insurance. The census schedule employed requested information for operating expenses under three heads:—

- (a) Salaries and wages
- (b) Rent
- (c) All other expenses

Less than halt the total number of service establishments had kept sufficient records to enable them to complete the inquiries on operating expenses, but the receipts of the firms reporting such details formed almost 80 per cent of the total. The extent to which establishments reported operating expenses differed greatly for different kinds of business. The smallest proportions are found for those kinds of business which operate to a considerable extent on a one-man busis, such as barber shows. blacksmith shows shoe repoir shows, etc.

As the operating expenses of service establishments often include the cost of providing the service as well as distributing it, the ratio of operating expenses to receipts is much higher than the ratio of operating expenses to sales in retail stores. In the latter, as has already been pointed out, the cost is generally one of distributing alone. The average operating expense ratio for retail service establishments is 74-35 per cert of receipts, while the expense ratio ir ratil stores is 24-01 per cent of sales. The rental cost for service establishments in leased premises is 8-78 per cent of receipts compared with 3-68 per cent of retail stores.

The wage cost in service establishments should include the value of the services of proprietors actively engaged in the business as well as the salaries and wages paid to employee. The census schedules requested that all proprietors or firm members in receipt of a fixed salary should report the amounts received during the year. Only 3,232 proprietors of the total of 44,622 were reported in this category. In order to compute the average operating expenses of service establishments, it was necessary to make allowance for the value of the services of proprietors actively engaged in their businesses but who did not report the amount of their drawings during the year. While the value of such services may be calculated in a number of ways, it was thought that the method yielding the most reasonable results was that of attributing to such proprietors the everage salary of a full-time employee in the same kind of business. As in some kinds of business the estimated value of proprietors' services is more than half the total wage cost, it is obvious that if the value of such services had been calculated in a different manner the operating expense ratio might be considerably different.

In some kinds of service establishments a considerable amount of merchandise is sold either as materials in repair work or in connection with direct merchandising, such as the sale of tobacco and soft drinks in bowling and pool halls or tires and automotive parts in automobile repair establishments. On the other hand, many service establishments require a good deal of supplies in connection with their service operations, such as the towels, sonsp, etc. required in barber shops, or the dyeing and cleaning materials for dyers and cleaners. In many cases it is difficult to maintain a distinction between the cost of materials and supplies which should be included in

operating expenses and the cost of merchandise which is resold and which should not be included in operating expenses.

Amusement and Recreation Group.—The average operating expense ratio for the amusement and recreation group was 79·34 per cent. Billiards and pool halls and bowling alleys had practically the same rental cost in leased premises, 19·61 per cent for the former and 19·94 per cent for the latter. Total operating expenses, however, were 68·52 per cent for billiards and pool halls and 77·39 per cent for bowling alleys. The latter, however, are operated to a much larger extent with hired employees and, on the average, are larger-scale establishments.

Motion picture houses had an operating expense ratio of 80.64 per cent of receipts, while motion picture and vaudeville theatres had 81.77 per cent. Motion picture houses in leased premises had rental charges amounting to 11.41 per cent of receipts. The wage cost in motion picture houses reporting expenses was approximately 20 per cent of receipts.

One of the largest items of expense for motion picture houses is the rental charges paid for the use of films. The prices paid for the use of films are not based upon a uniform system of rentals. In some cases the rental is a percentage of the gross receipts of the theatre during the showing of the film, in other cases the exhibitor pays a fixed sum for the use of the film. A rough measure of the total amount of film rentals is given by the gross income of film exchanges in Canada. This was \$9,808,500 for the year 1930 compared with \$38,479,500 for the gross receipts of motion picture houses (including motion pictures and vaudeville). The gross income of film exchanges thus amounted to 25 per cent of the gross receipts of theatres.

Business Services Group.—The average operating expense ratio of 29-17 per cent shown for the business services group is not an accurate indication of the level of operating expenses for establishments in this group, as the ratio for advertising agencies is based not on the income of such agencies but on the volume of advertising handled. The average ratio for the business services group, exclusive of advertising agencies, is approximately 77 per cent of receipts.

Donestic Services Group.—The three important classes in this group—cleaning, pressing and repairing; cleaners and dyers; and laundries—had operating expenses, expressed as a percentage of receipts, of 87-24 per cent, 88-99 per cent, and 90-98 per cent respectively. More than half of the total wage cost in cleaning and pressing establishments represents the estimated value of proprietors' services. Cleaners and dyers, which generally operate on a larger scale, have less than one-seventh of their wage cost as proprietors' salaries. Their rental cost is also lower, being only 5-20 per cent of receipts compared with 41-72 per cent for cleaning and pressing establishments. The hundry class contains two main types of establishments. One is the power laundry with considerable capital investment and relatively large labour force; to other is the small hand laundry often operated without hired employees. The operating ratios for laundries thus represent an average of the figures for the two types of establishments.

Educational Services Group.—Only two classes in this group are sufficiently large to be considered representative. Business colleges had an operating expense ratio of 85.76 per cent and other trade schools had 80.00 per cent. Rental charges for business colleges in leased premises amounted to 9.44 per cent of receipts, while for other trade schools the ratio was 12.41 per cent.

Personal Services Group.—The operating expense ratio shown for this group is 89-92 per cent, but the ratios for individual classes range from 81-33 per cent for shoe shine stands to 91-58 per cent for turkish and other baths. The rental cost of barber shops and beauty parlours is about the same, 15-11 per cent of receipts for the former and 14-90 per cent for the latter. Shoe shine stands, however, have rental charges amounting, on the average, to 22-35 per cent of receipts. Labour costs form the largest single item of expense in the personal services group and are about equally divided between the value of proprietors' services and wages of employees. In this group and also in the repair group the labour cost is practically twice as great as all other expenses. This is in contrast with motion picture houses, where the wage cost is only one-third as large as all other expenses.

Photography Group.—The average operating expenses for establishments in this group were 69.64 per cent of receipts. Rental cost for establishments in leased premises was 10.59 per cent of receipts.

Undertaking and Burial Group.—Outside of the business services group, undertaking and burial establishments have the lowest operating expense ratio of any service group. The ratio of 39.69 per cent for undertaking and furniture establishments is due to the considerable proportion of merchandise sales for this kind of husiness. Funeral directors have an operating expense ratio of 57.62 per cent of receipts. While these establishments do not engage directly in merchandising, the value of caskets, etc., which is included in their receipts out not in their operating costs, tends to lower the ratio in comparison with other service establishments. The rental cost in leased premises was 6.40 per cent of receipts for funeral directors and 5.08 per cent for undertaking and furniture establishments.

Repair and Service Shops.—The average operating expense ratio for establishments in this group was 71-48 per cent of receipts. The range is from 54-27 per cent for ignition and battery shops to 85-52 per cent of receipts for carriage repair shops. Here, again, the proportion of merehandise sales affects the level of operating costs and no generalizations can be made. As has been mentioned in the discussion of expenses for the personal services group, labour costs are the largest expense item for the repair group. Rental costs average 12-23 per cent of receipts for the group and range from 6-81 per cent for radio and electrical repair shops to 20-21 per cent for storage garages.

Storage and Transportation Group.—The average operating expense ratio for this group was \$8.31 per cent of receipts. Operating expenses are divided about equally between wage costs and other expenses. Rental costs for this group are the lowest for any service group, averaging only 4.24 per cent of receipts for establishments in leased premises. The use of low-cost properties, which is possible because of the absence of any need to secure prominent locations or to have premises attractive to the public, is the chief reason for the low proportion of expenses attributed to rent. In the case of storage and warehousing companies the rental costs are considerably higher than the average for the group of one of the chief services offered by such establishments is the rental of space for storing goods.

Miscellaneous Services.—As a considerable number of the service establishments included in this group offer machine work of various kinds, the labour charges form the chief item of expense. Average operating costs for the group were 72-44 per cent of receipts, and wage costs alone were equal to approximately half of the gross revenue of miscellaneous service establishments.

Service Establishments Analyzed by Size of Business

Retail trade, both in the merchandising and service fields, is characterized by the multiplicity of small shops, most of which are operated by the proprietor with, perhaps, the assistance
of members of the family. While the census results show that almost 40 per cent of the retail
merchandise stores had an annual turnover of less than \$5,000 per annum, the proportion of small
establishments is much larger in the case of service establishments. The reason for this is that,
in the case of merchandising stores, the proprietor must secure his liting out of the murgin between
the cost of his merchandise and the amount he can secure for his goods. In the case of service
establishments, where the proprietor performs a great part of the services offered, the margin is
correspondingly larger and the amount of business out of which a living can be made need not
be as great as is the case when merchandise alone is offered.

There were 42,223 service establishments with receipts of \$249,455,000 included in the Census so that the average receipts per establishment would appear to be slightly less than \$6,000 per year. Yet when the establishments are classified according to amount of receipts reported, only 16-46 per cent of the establishments had receipts exceeding \$5,000. These establishments, however, accounted for 78.74 per cent of the total business of all service establishments. Cumulative percentages of the number of establishments and proportion of receipts, arranged from the smallest to the largest size, are given in Table III.

16

TABLE III.—CANADA—SERVICE ESTABLISHMENTS GROUPED ACCORDING TO ANNUAL RECEIPTS, ALL KINDS OF BUSINESS COMBINED, 1930

Groun	Cumulative percentages of number of establish- ments	Cumulative percentages of receipts
Less than \$5,000. Less than \$10,000	\$3.54 91.38 95.46 96.85 98.16 99.22 99.60 99.84 99.93 99.99	21·28 30·32 39·79 45·54 53·99 66·42 77·44 33·47 88·99 96·77

In 1930, service establishments with receipts of less than \$5,000 formed 83.54 per cent of the total number and had 21.26 per cent of the receipts. Establishments with receipts of less than \$10,000 (including those doing less than \$5,000) constituted 91.38 per cent of the total and had 30.32 per cent of the total receipts. There were only of service establishments doing a business of more than \$1,000,000 per annum and, of these, 5 were in the business services group and the other was a transportation concern. There were 6 motion picture houses with receipts exceeding \$500,000 and 10 with receipts between \$300,000 and \$500,000. The largest billiard hall reported receipts of slightly more than \$50,000, but 11 bowling alleys did a business of \$50,000 to \$100,000 a year. The largest barber shop did less than \$60,000, but 3 beauty parlours were in the group \$100,000 to \$200,000.

The proportion of small businesses to the total number of establishments is related in a general way to the amount of trade carried on. Those provinces which have the highest per capita receipts also tend to have the smallest proportion of establishments in the lowest size group. Table IV illustrates this tendency.

TABLE IV - CANADA - COMPARISON OF PROPORTION OF ESTABLISHMENTS WITH RECEIPTS OF LESS THAN \$5,000 AND SERVICE RECEIPTS PER CAPITA, BY PROVINCES, 1930

Province	Proportion of establish- ments	Per capita receipts	Province	Proportion of establish- ments	Per capita receipts
MINISTER WAS AND ADDRESS OF THE PARTY OF THE	p.c.	8		pc.	\$
CANADA	83 54	24 - 04	Ontario	80 - 21	31.88
Prince Edward Island Nova Scotia New Brunswick Quebec	94.02 85.62 89.36 86.01	7 · 48 12 · 39 10 · 76 22 · 13	Manitoba Saskatchewan Alberta British Columbia	83 · 51 90 · 18 85 · 88 77 · 49	23 · 48 11 · 22 18 · 36 35 · 58

The proportion of the total business of service establishments handled by the small-size establishments varies almost directly with the proportion of such establishments to the total number. In Prince Edward Island, which has the highest proportion of small businesses, 44-77 per cent of the total receipts was reported for the class under \$5,000. In British Columbia, on the other hand, only 18-52 per cent of the receipts is attributed to businesses doing less than \$5,000 per year.

Employment and Wage Facts

The number of workers, including proprietors and hired employees, employed in retail service establishments during 1930 averaged 108,863 for the year. Of this number, 83.7 per

cent were males and 16-3 per cent were females. The proportion of males is much higher than for merchandising establishments and the proportion of female workers correspondingly lower. The percentages for retail stores are 75-6 per cent male workers and 24-4 per cent females. Dividing the workers in service establishments into proprietors, full-time employees and appropriation of the service establishments proprietors, full-time employees, we find that 44,622 or 41-0 per cent are proprietors, 55,267 or 50-8 per cent are full-time employees, and 8,984 or 8-3 per cent are part-time employees. On account of the smaller scale on which service establishments are operated, the proportion of proprietors to total number of workers is higher than for merchandise stores. In the latter, 31-2 per cent of the workers are proprietors, compared with 41-0 per cent in service establishments.

The combined figures for the nine provinces show that workers in service establishments formed 2·79 per cent of the total gainfully-employed male population and 2·67 per cent of the number of females gainfully employed. This is in contrast to the merchandise trade, in which the number of females formed a higher proportion of the females gainfully employed than did the males. The proportion of the gainfully employed oppulation which is engaged in retail service establishments varies considerably between provinces as is shown in Table V.

TABLE V.—CANADA—RATIO OF WORKERS IN SERVICE ESTABLISHMENTS TO GAINFULLY EMPLOYED POPULATION, BY SEX AND PROVINCES

Province	Males	Females	Province	Males	Females
	p.c.	p.c.		p.e.	p.c.
Prince Edward Island Nova Scotia New Brunswick Quebea Ontario	1·75 1·85 2·96	1·52 1·85 1·98 2·25 2·81	Manitoba. Saskatchewan Alberta. British Columbia. CANADA.	1.86	2·67 1·92 2·86 5·29 2·67

Ontario shows the bighest proportion of male workers in service establishments, followed by British Columbia and Manitoba. Two of these provinces, Ontario and British Columbia, are among the first three provinces with high proportions of male workers in merchandise trade. British Columbia, with 5-29 per cent, hus the highest proportion of females in service establishments, and this province also bad the same runk in regard to merchandise trade. Alberta and Ontario are next in order with 2-86 per cent and 2-81 per cent of the gainfully employed females engaged in service establishments.

The average wage payment per full-time employee was \$1,054 in 1930 compared with \$1,036 for a full-time employee in merchandise trade. The average of \$1,155 for service exhibitshments in British Columbia was the highest and that of \$713 in Prince Edward Island the lowest. These averages are derived by dividing the total amount of salaries and wages paid to full-time employees by the average number of such employees during the year. The averages, therefore, do not represent earnings of employees as the totals include payment to both male and female employees and no distinction is made between various classes of employees. The drawings of proprietors or firm members are not included in the figures. Part-time employees secured an average of \$336 during the year, but the periods of employment secured by part-time workers vary greatly.

There were 3,232 proprietors out of a total of 44,622 who reported the amount of their drawings during the year. The average amount so reported was \$1,956. In the retail merchandise trade the average earnings of proprietors were \$1,856. But in both cases only a small number of the proprietors reported the amount of their earnings.

The relationship between the proportion of total workers engaged in each service group and the proportion of total receipts is not as close as in the case of merchandise stores. The wide variety of services offered and the differences in the amounts of labour necessary to perform them result in wide differences between proportion of receipts and number of workers in certain cases. Table VI gives the figures for each group.

TABLE VI.—CANADA—DISTRIBUTION OF RETAIL SERVICE WORKERS AND RECEIPTS, BY KIND-OF-BUSINESS GROUPS

Group	Workers actively engaged (1)		Per cent
	Number	p.c.	receipts
All kinds of business. Amusoment and recreation group. Business services group. Domestic services group. Personal services group. Personal services group. Photography group. Photography group. Undertaking and hugis roup. Storage and transportation group. Miscollances services group.	3,048 21,404 659 18,647 2,141 2,142 20,207	100·00 14·10 2·80 19·66 0·61 17·13 1·97 1·97 18·56 19·43 3·77	100 · 00 21 · 34 11 · 79 14 · 71 0 · 74 9 · 80 2 · 04 3 · 73 12 · 30 20 · 43 3 · 12

⁽¹⁾ Including proprietors.

Arranged according to number of workers, the three leading groups are—the domestic services group, storage and transportation group, and repair and service shops. These groups, however, ranked third, second and fourth, respectively, in order of amount of receipts. The amusements group, which is first in volume of business, ranks fifth in number of workers.

Employment by Size of Business.—While a comparison of the total number of service establishments with the total number of employees indicates an average of more than one employee per establishment for the Dominion as a whole, an examination of Table VII shows that a large proportion of all service establishments included in the Census are conducted by proprietors without the aid of paid assistants on a full-time basis.

TABLE VIL-CANADA-DISTRIBUTION OF FULL-TIME EMPLOYEES AND ESTABLISHMENTS, BY SIZE-OF-BUSINESS GPOUPS

Size of business	Average number of employees per estab- lishment	Per cent of total employees	Per cent of total establish- ments
Less thus \$5,000. \$8,000-99,000. \$10,000-510-900. \$10,000-510-900. \$10,000-510-900. \$30,000-510-900. \$30,000-500,000. \$30,000-500,000. \$30,000-500,000. \$30,000-500,000. \$300,000-500,000.	8.76 6.55 9.75 17.50 31.66 58.43 78.81	15·71 11·47 11·86 7·94 9·86 14·34 11·60 6·75 5·20 5·17	83.54 7.84 4.08 1.39 1.21 1.08 0.47 0.15 0.09 0.06
Totals	1.29	100.00	100.00

The distribution of establishments and full-time employees according to size of business as presented in Table VII shows that more than 80 per cent of all service establishments had annual receipts of less than \$5,000. This large proportion of the total number, employee less than sixteen per cent of the total full-time employees in all service establishments and, on the average, only one out of every four of these small concerns required the services of a full-time employees. Less than one-fifth of the establishments employ almost 85 per cent of all full-time employees in the retail service field. The average number of employees in each size-of-business group is given in Table VII.

Forms of Organization

Retail service establishments have been classified in four groups according to the nature of the ownership under which they operate. This form of classification must be distinguished from types of operation, under which, establishments are grouped according to the number of units under one control. The four classifications used for service establishments are: individual proprietorships, partnerships, corporations and other forms. The latter includes establishments operated by social clubs, fraternal or charitable organizations. Almost 00 per cent of the total number of service establishments is operated by individual proprietorships, but these account for only 42-48 per cent of the receipts. Establishments operated as partnerships formed a little more than 6 per cent of the number and had 8-55 per cent of the receipts. The service establishments operated under corporate ownership constituted slightly more than 4 per cent of the total number but accounted for practically half of the amount of receipts. The 56 establishments classified under "other forms" had receipts amounting to \$524,800.

Types of Operation

The development of multiple organizations has not made such rapid headway in the service as in the merchandise field. The necessity of offering many services directly to the public at the establishment patronized and the personal relationships which exist in many establishments between the proprietor and his customers have, so far, tended to keep service establishments highly individualistic. The small amount of capital necessary for the operation of many service establishments has also tended to permit the entry into this field of trade of almost any person who desired to set up in business.

In certain services there has been, of course, a considerable growth in corporate enterprise and in multiple organizations. Less than 15 per cent of the total receipts of service establishments was reported by chain organizations for the year 1930 and the number of chain establishments was only 437.

Of the 42,228 establishments in the service field, 40,964 were single independents and 538 were two- and three-unit multiples. Chain units of all types numbered 437. There were 252 leased concessions, 10 leased departments and 24 miscollaneous types.

The single independent establishments had 74-70 per cent of the total receipts, while twoand three-unit multiples had 10-45 per cent. The receipts of chain units formed 14-11 per cent of the total, while the business of other types was less than one per cent of the whole.

The largest business of chain service establishments is in the amusement field, where thentres operated by chain organizations had 40.84 per cent of the total receipts of theatres in 1930. Motion picture theatres belonging to sectional and national chains numbered 63 and their receipts formed 22.21 per cent of the total. There were 50 provincial chain units with 8.24 per cent of the receipts and 54 local chain units with 10.39 per cent. Two- and three-unit nultiples numbered 92 and had 16.35 per cent of the total receipts. The single independents which numbered 659 out of a total of 918 theatres had a slightly larger proportion of the total receipts than the chain units, 42.81 per cent compared with 40.84 per cent.

Multiple organizations are important in the business services group, where there are several advertising agencies classified as chains. It has not been possible, however, to present separate particulars on the types of operation in this field.

Capital Invested in Retail Services

The value of capital invested in retail services was \$232,110,600, which was only slightly less than the value of receipts for 1930. Capital invested in retail services includes the value of equipment and supplies employed in the service business, cash and trading accounts, and the value of owned property. As the amount of property and equipment necessary for the rendering of many services or the provision of amusement and recreation facilities is considerable, the value of capital invested is sometimes greater than the amount of receipts for the year. This is the case for establishments in the amusement and recreation group, the undertaking and burial group, and the storage and transportation group. The relative proportion of capital invested depends to a considerable extent on whether the service establishment is located in rented or owned premises as the value of rented property is not included in the amount reported for capital invested.

SERVICES DE DÉTAIL, CANADA, 1930

Introduction.—La première partie de ce volume comprend les opérations des établissements de services de détail en activité au coms de l'aunée 1930. Comme une description complète des méthodes et de la portée du Recensement des Etablissements de Comme rec et de Service en 1931 se trouve au disième volume des rapports du recensement, nous ne faisons qu'indiquer iei la marche à suivre.

Méthode de recensement.—Avec les listes des recenseurs des établissements de service comme base, listes revisées par le Bureau Fédéral de la Statistique, des questionnaires ont été expédiés à tous les établissements compris dans le recensement, de même que des instructions pour les remplir. Une fois remplis, ces questionnaires devaient être expédiés directement au Bureau, où ils étaient examinés pour vérifier s'ils étaient exacts et complets. Les rapports ont été ensuite codifiés et les renseignements consignés sur cartes Hellerith qui servent à la préparation mécanique des tableaux.

Portée du recensement.—Le mot "services", employé pour les fins du recensement, comprend les lieux d'amusement, de récréation, d'éducation, de répresantion, de voiturage, de camionnage et autres établissements de services de détail exploités dans un but lucratif. Le Recensement des Établissements de Commerce et de Service ne comprend pas les services professionnels tels que médecine, dentisterie, droit, etc., ni les services industriels tels que médecine, dentisterie, droit, etc., ni les services industriels tels que médecine, dentisterie, drait, autreprises de chauffage ou d'éclairage, etc., ni les services d'utilité publique tels que l'écletricité, gaz, tranuavas, etc.

Les établissements de service sont en général plus spécialisés que coux du commerce, c'est-àdire que le genre de classification qu'on donne à une boutique de barbier, par exemple, est sus ceptible de donner une définition plus exacte que celles qu'on attribue aux établissements commerciaux. D'un autre côté le recensement des établissements de service présente plus de difficultés que celui de la plupart des magasins de détail. Alors qu'il est facile de distinguer certains établissements comme les théâtres, les buanderies, les salles de billards, etc., il est plus difficile de dénombrer d'autres établissements de services éducationnels ou commerciaux. Etant donné le caractère indéfini de certains établissements de service et la difficulté d'établir une distinction entre les services intermédiaires et les services définitifs, on ne peut s'attendre à trouver dans un premier relevé un dénombrement complet des établissements de services de détail. Un autre facteur qui empêche d'obtenir une énumération complète est le caractère saisonnier de bien des établissements. Comme le recensement s'est fait au début de juin, des établissements qui n'étaient pas exploités à l'époque du recensement peuvent ne pas figurer sur les listes. Nous pensons cependant avoir fait un recensement assez complet des salles de quilles et de billards, des einémas, nettoyeurs, buanderies, salons de coiffure et de beauté, des ateliers de réparation d'autos, de cordonniers au petit banc, de forgerons et des services de transport par auto.

Méthode de classification.—Les établissements de services de détail que nous avons déjà indiqués sont des magasins qui offrent au public des services personnels ou des services de réparation ou d'amusement, de récréation, d'éducation ou de transport. Etant donné que le recensement est basé sur les établissements, tout établissement ou succursale d'un groupe est considéré comme établissement particulier de détail et des données séparées ont été obtenues pour chaque lieu d'affaires. Certains établissements s'occupent à la fois de commerce et de services. Règle générale ils ont été classifiés sous la rubrique "services" lorsque plus de la moitié des recettes totales provenaient des opérations de services, autrement ils étaient considérés comme magasins de commerce. Bien qu'il fût nécessaire de classifier ces établissements à double cuploi dans une catégorie ou dans l'autre, une étude a été faite des opérations de services, des magasins de commerce et des opérations commerciales dirigées par des établissements de services.

Genres d'affaires.—Pour les fins du recensement les services de détail ont été divisés en dix groupes généraux: amusement et récréation, commercial, services domestiques, éducationnel,

personnel, photographie, services funéraires, réparations et services, entreposage et transport, et divers. Toutefois, chacun de ces groupements se subdivise en d'autres classements détaillés comprenant une centaine de catégories. La classification d'après le genre d'affices est basée directement sur le genre de scrvices rendus. Certaines maisons offrent plus d'un genre de services et dans ce cas l'établissement reçoit la classification qui s'accorde le mieux avec son principal genre d'affaires.

Bien que chaque rapport ait did classifié exactement, il a fallu, dans cortains cas, combiner les chiffres de deux classifications ou plus pour éviter de révéler les opérations de maisons particulières. Ces cas se présentent généralement quand il s'agit de tableaux qui concernent certaines villes ou comtés. Pour l'ensemble du Dominion et pour la plupart des provinces on a pu donner des renseignements détaillés pour chaque genre d'affaires.

Une définition de la classification employée pour chaque genre d'affaires est donnée ci-après.

Groupe de l'amusement et de la récréation

Salles de quilles et de billard.—Deux genres d'affaires sont inclus: les salles de billard et poi et jeux de quilles. Souvent ces établissements font de petites ventes de confiserie et de table.

Théâtres.—Sous ce titre sont inclus trois genres de théâtres: cinémas; établissements de cinéma-vaudeville; salles d'opéra et théâtres légitimes.

Autres lieux d'amusement.—Dans ce groupement sont inclus: auditoriums ou salles de concrets, de conférences, etc.; parcs d'amusement exploités dans un but lucratif; concessions foraines, lieux d'attractiors, parcs, etc.; quais océaniques exploités en vue de bénéfices, etc.

Autres lieux de récréation.—Ce groupe comprend les établissements où l'on enseigne la danse, les sulles de danse et les roof gardens; les celuls, les terrains et salles dans lesquels sont présentés des joutes ou des jeux athlétiques dans un but lucratif; les établissements de bains sur les plages exploités en vue d'un profit; les bassins de natation; les bateaux et canots à louer; la location de heux de campement; les terrains de golf (autres que ceux des clubs privés); les patinoires sur clace et pour patins à roulettes; les éceles d'écuitation : les bibliothètues culantes.

Groupe des services commerciaux

Services de publicité.—Sous ce titre figurent les divers genres d'établissements de publicité et les agences qui s'y rapportent. Le plus unportant genre d'affaires est celui des agences de publicité qui arrangent et préparent les réclames régionales ou nationales. Les recettes attribuées à ces établissements ne sont pas celles que leur rapporte leur travail, mais bien la valeur totale de la publicité faite.

Autres services commerciaux.—Ce titre comprend les agences de perception et de crédit et les encanteurs

Groupe des services domestiques

Nettoyage et teinturerie.—Les services inclus sous ce titre sont: les établissements de nettoyage, pre-sage et réparage (principalement des ateliers de quartier); les nettoyeurs et teinturiers; les établis-sements de nettoyage des tapis ou de nettoyage en général.

Buanderies.—Cela comprend aussi bien les buanderies commerciales que celles où le travail se fait \hat{u} la wam.

Autres services domestiques.—Sous ce titre sont inclus: les agences fournissant les vestes et les serviettes; les établissements de funigation et pour la destruction de la vermine; les maisons s'occupant principalement du nettoyage, de la réparation et de l'entreposage des fourrures pour des clients particuliers; les ateliers pour le blocage et nettoyage des chapeaux; les nettoyeurs de fenétres; les établissements qui louent des costumes et des sièges pour les représentations théâtrales

Groupe des services éducationnels

Scules les écoles commerciales sont comprises dans ce groupe. Il s'agit principalement d'écoles de métiers, où l'on enseigne par exemple: la couture, la coiffure, la réparation des auto-

mobiles, etc.; aussi les écoles de commerce et de musique. Les professeurs de musique et autres qui donnent des leçons à domicile n'ont pas été inclus dans le recensement.

Groupe des services personnels

Ce groupe comprend les boutiques de barbiers, les salons de beauté et de coiffure; les circurs et aussi les établissements de bains de vapeur et de mussage.

Groupe de la photographie

Ce groupe comprend les ateliers de photographes et de portraitistes; les établissements faisant le développement, l'impression ou l'agrandissement des photographies et pellicules, et les maisons fajeant l'impression au photostat.

Groupe des services funéraires

Deux genres de services sont inclus dans ce groupe: d'abord, les entrepreneurs de pompes fundères; puis les maisons qui se chargent des funérailles et en même temps vendent des meubles. Ces ventes d'objets représentent moins de la moitié du chiffre total des affaires. Dans le cas contraire l'établissement est classé comme magasin. Ces établissements sont inclus dans le Vol. X, Commerce de détail, et sont classifiés comme "Meubles et porques funêtres."

Groupes des boutiques de réparations et de services

Il s'agit là d'établissements dont la plupart, sinon la totalité, tirent leurs revenus des travaux de réparation. Il y a d'abord les établissements de réparation et de service d'automobile qui comprennent les garages de services, les ateliers d'appareils d'allumage, batteries et service d'électricité; les boutiques pour le peinturage des autos; ceux pour la réparation de la carrosserie; arcliers de réparations des moteurs; les ateliers de lavage et de polissage; et aussi les garages d'entrepesage ou lieux de stationnement. Puis viennent les ateliers pour la réparation des bicyclettes et motecyclettes, les ateliers de roprenons et de réparations de voitures, et aussi les ateliers de réparation de chaussures (savetiers). Au nombre des autres ateliers de reparation de service il y a ceux de la réparation de humais et de la serrureire, les ateliers pour la réparation de radios et des appareils étectriques, rembourrage et réparation de neubles, réparation de montres et bijoux, et divers autres étalissements de réparation (y compris le service des machines commerciales et des appareils de ménage).

Groupe de l'entreposage et du transport

Transport et entreposage.—Ce groupe comprend les établissements de voiturage général (transport de bagages, livraison légère et ennionnage); le camionnage et le voiturage (déménagements, transports par camions et remorquages régionnax); les services de messager et livraison légère (en bicyclette, motocyclette ou voiturette automobile); l'entreposage et camionnage; les établissements d'entreposage qui ne font pas le transport; les entrepôts, exclusion fide des entrepôts publics, des élévateurs de grains ou des entrepôts exploités de concert avec quelque autre commerce.

Service des taxis et livraison par automobile.—Cela comprend les établissements de taxis et d'autos de louage avec ou sans chauffeur.

Transport par auto.—Les lignes régionales d'autobus sont celles qui sont exploitées indépendamment des réseaux de transways pour le transport orbain et suburbain des voyageurs.

Les services de lignes d'autobus (interurbaines) sont assurés par des compagnies de transport automobile qui transportent des voyageurs entre les villes ou autres localités situées en dehors du voisinago inmédiat de leur burcau principal. Le camiomage interurbain comprend les compagnies qui agissent comme voituriers publics pour le transport automobile des marchadiess à longue distance ou par messageries. Le transport par camion du lait, de la crème et d'autres produits de la ferme comprend les maisons qui font le transport par automobile des produits agricoles. Les transports divers comprennent les autocars, les services d'ambulance et le transport aérien.

Groupe des services divers

Les services divers comprennent les ateliers de mécanicien où l'on fait de petits travaux de réparation, les consignes, les agences privées de placement, les ateliers de réparation de vêtements, les pensions pour chevaux et les écuries de louage et divers autres services.

Définition des types d'opération

Types d'opération.—En outre de la classification par genre d'affaires, chaque établissement a téc classifié selon son type d'opération. Largement parlant, tous les établissements ont été classifiés soit cemme indépendants, soit comme unités d'un type d'organisation multiple. Mais le type d'opération à unités multiples est moins développé dans le domaine des services de détail que dans ceux du commerce en général mais il a une importance considérable dans certaines lignes et rius spécialement dans le cinéma.

La définition de chaînes.—Dans le domainc des services de détail, le chaîne veut dire eu groupe de quatre établissements ou plus dout le genre d'affaires est semblable ou similaire et qui sont la propriété de la nême personne ou firme. Les groupes de deux ou trois unités ne sont pas considérés comme chaîne mais sont classifiés comme doubles unités, triples unités et paraissent sous ces ca-tétes dans les différents tableaux classifiant les établissements de services au détail selon le troe d'orderation.

Les principaux types d'opération paraissant dans le recensement sont:-

Unités simples.

Doubles unités,

Triples unités,

Chaînes locales, Chaînes provinciales.

Chaînes provinciales, Chaînes sectionnelles.

Chaines sectionnelles.

Les chaînes locales sont entièrement dans la même localité, c'est-à-dire dans la même eité ou ville. Les chaînes provinciales, comme leur nom l'indique, ont toutes leurs unités dans une même province. Les unités de chaînes sectionnelles sont éparses dans deux ou trois provinces tandis que les chaînes nationales ont des unités dans quatre provinces ou plus.

Autres types d'opération.—Les concessions iouées et les rayons loués sont les types les plus importants sous cet en-tête. Les boutiques de barbier, les salons de beauté, les services de pressage, etc., sont souvent exploités dans des départements loués d'un hôtel ou autre tablissement ne faisant pas la vente des marchandises. Ils sont classifiés comme concessions louées. D'un autre côté, les mêmes services occupant des locaux loués dans des établissements de commerce sont ele suffés comme rayons loués.

Explication des termes

Propriétaires.—D'après les instructions accompagnant les questionnaires du recensement, sementent les propriétaires et membres des firmes engagés activement dans leur commerce ont été inscrits.

Personnel et salaires.—Les tableaux montrent le nombre d'employée à temps entier et à temps partiel, par sexe, ainsi que les salaires et gages de chaque classe. Par emoloyée à temps partiel on entend les personnes qui sont employées sculement une partie de la journée ou une partie de la semaine, tandis qu'une personne employée une partie de l'année, mais à temps entier pendant cette période d'emploi, est considérée comme employée à temps entier.

Recettes—Les recettes figurant dans ces tableaux représentent ordinairement le revenu total provenant des services rendus sans déductions pour le coût en salaire ou autres frais d'exploitation. Dans plusieurs cas les établissements classifiés dans les services de détail vendent des quantités limitées de marchandises comme activité accessoire. Dans de tels cas les ventes nettes de marchandises sont comprises dans les tableaux en plus des recettes pour services rendus. Dans le groupe des services commerciaux les chiffres des recettes des agences de publicité exigent un mot d'explication. Dans ec cas particulier la valeur des recettes représente la valeur totale des annonces placées plutôt que la commission ou le profit des compagnies de publicité.

Stocks en main.—Bien que cet item soit lei de moindre importance que dans le domaine du commerce de détail, la vente accessoire de marchandises dans plusieurs établissements de services est cause que les chiffres des stocks en main paraissent dans les tableaux pur la plupart des genres d'affaires. Les exploitants de différents établissements ont été priés de déclarer la valeur de leurs inventaires à la fin de 1930 sur une base de remplacement de marchandises au privecutant. Vu la variation proportionnelle des recettes provenant des ventes des services déclarées par différents établissements, il scrait futile de vouloir établir un taux de roulement par la comparaison des recettes et des stocks en main paraissant dans ces tableaux.

Frais d'exploitation.—Bien que chaque établissement uit presque partout quelques employés engagés, les montants payés comme salaires et gages su cours de l'année se calculent fuellement mais il est impossible d'établir d'une manière aussi complète phisicura sutres fud d'exploitation. Les tableaux des frais d'exploitation ne couvrent ces données que pour les établissements qui ont répondu à toutes les questions sur ce sujet.

Les frais d'exploitation ont été déclarés sous trois en-têtes différents dans les questionnaires du reconsement:—

- (1) Salaires, gages et commissions payés au cours de l'année,
- (2) Loyer, s'il y en a, pour le local occupé au cours de l'année,
- (3) Toutes autres dépenses. Cet item comprend les taxes, l'assurance, les frais de bureau et frais d'entretien, papeterie et fournitures, éclairage et force motrice, intérêt sur les argents emprun és pour les opérations courantes et autres frais d'exploitation. Pour une description détaillée dans les méthodes suivies afin d'en arriver au total des dépenses des établissements de services le lecteur est référé à la section sur les frais d'exploitation de l'Analyse des Résultats.

DESCRIPTION DES TABLEAUX POUR LE DOMINION

PRINCIPAUX FAITS DES SERVICES DE DÉTAIL

Le sommaire des principaux faits des services de détail donne les traits saillants des services de détail dans chaque province sous une forme qui en permet une comparaisen elaire et rapide entre provinces.

TABLEAU 1.*—SERVICES DE DÉTAIL PAR GENRES DE COMMERCE

Ce tableau présente les principales statistiques pour les services de détail par genres de commerce. Le nombre d'établissements, les propriétaires et membres de la firme avec ou sans salaire fixe, les données sur l'emploiement et les gages, les recettes et la valeur des stocks en mains paraissent pour chaque groupe ainsi que pour chaque classification détaillée par genre de commerce. Dans la deuxième moitié de ce tableau paraît une information similaire sur les groupes majeurs de commerce dans chaque province.

Tableau 2.*—Services de détail—Loyer et autres frais généraux par genres de commerce .

Le tableau 2 montre en détail les frais d'exploitation par geures de commerce pour tous les établissements qui ont fourni telles informations. Les dépenses paraissent sous les ent-étes "tous comptes des gages", avec des sous-en-têtes pour valeur des services des propriétaires et salaires et gages des employés et "tous autres frais y compris le loyer". En outre, le loyer payé par des établissements occupant des locaux loués est montré en relation avec les recettes de tels établissements.

TABLEAU 3.—Services de détail—Emploiement par chiffre d'affairds

Le tableau 3 donne la distribution des employés à temps entier d'après le chiffre d'affaires pour l'ensemble du Canada et pour chaque zone économique.

Tableau 4.*-Services de détail par types d'opération

Les établissements de service de détail sont classifiés par le type d'opération dans ce tableau, premièrement, pour tous les genres de commerce combiné et ensuite pour les théûtres. Des résumés pour chaque province paraissent dans la deuxième partie de ce tableau.

^{*} Des tableaux semblables à ceux marqués d'un astérisque paraissent d'uns chucune des sections provinciales.

Tableau 5.*—Services de détail—Recettes par chiffre d'affaires

Le tableau 5 pousse l'analyse des services de détail un pas de plus en recoupant la elassification des établissements par genres d'affaires par le montant net des recettes. Le nombre d'établissements et le montant des recettes paraissent pour onze groupes sur le chiffres d'affaires.

Tableau 6.*—Services de détail—Ventes de repas et de marchandises

Le tableau 6 indique la valeur et la nature des marchandises vendues dans les établissements de service. Un tableau similaire sur le volume du commerce de détail indique l'importance et la nature des services rendus dans ces magasins de détail.

Tableau 7.*—Services de détail—Constitution des établissements

La constitution des établissements sous laquelle les services de détail se poursuivent font l'objet du tableau 7. Les propriétés individuelles sont les formes les plus nombreuses dans l'organisation des services de détail mais la forme corporative fait un plus gros chiffre d'affaires. La plupart des corporations dans le domaine des services de détail sont, toutefois, des corporations privées qui ont été formées pour donner une forme légale aux affaires particulières d'un individu ou de quelques individus.

Tableau 8.*—Services de détail—Capital engagé

Le tableau 8 montre le capital engagé dans les services de détail par groupes majeurs de commerce. Les opérateurs des établissements de service ont été priés de donner le montant total du capital immobilisé dans leurs affaires à la fin de 1930.

Tableau 9.—Services de détail—Moyenne du capital engagé

Le capital moyen engagé par des établissements indépendants occupant des locaux loués ou dont ils sout propriétaires paraît au tableau 9 pour quelques genres sélectionnés d'affaires. Comme les organisations multiples ne fournissaient cette information que sur l'ensemble de l'organisation, il a été impossible de les rentrer dans ce tableau.

TABLEAUX 10 ET 11.—SERVICES DE DÉTAIL—CITÉS DE 10,000 ÂMES ET PLUS

C'es tableaux donnent un résumé des services de détail dans les cités, d'abord, pour tous les genres de commerce combinés et, deuxièmement, pour les principaux genres de commerce.

Tableaux 12 à 19.*—Services de détail par importance de la localité

Les tableaux 12 à 19 donnent les chiffres par genres de commerce et types d'opération par groupes de localités. Les groupes sont les cités de plus de 30,000 âmes; les cités de 10,000 à 30,000 de population; les villes et villages de 1,000 à 10,000 âmes; et tous les endroits de moins de 1,000 âmes, y compris les places qui ne sont pas encore incorporées, sans tenir compte de leur population.

ANALYSE DES RÉSULTATS

Etendue des services de détail

Les recettes totales de tous les établissements de service de détail compris dans le recensement ont été, pour l'année 1930, de \$249,455,900. Les 42,223 établissements de service ont employé une moyenne de 41,875 hommes et de 13,382 femmes à travail continu qui ont reçu en salaires et gages \$58,217,700. Ces établissements de service ont aussi employé irrégulièrement une moyenne de 7,880 hommes et de 1,104 femmes qui ont reçu en salaires et gages \$3,014,200 ce qui porte à \$61,231,900 le total des bordereaux de paye des établissements de service pour l'année. En plus des employés engagés, il y avait 44,622 propriétaires ou membres de firme prenant une I art active dans l'exploitation des établissements de service.

Le nombre total de personnes engagées dans ces piaces d'affaires se chiffrait donc à 108,863. Les propriétaires et membres de firn e reçoivent une certaine rémunération pour leurs services, mais bien peu d'entre eux s'octroient des appointements fixes. Sur les 44,622 propriétaires inclus dans le recensement, 3,232 sculement étaient marqués comme recevant des appointements fixes. Le montant retiré par ces 3,232 propriétaires a été de \$6,323,300.

^{*} Des tableaux semblables à ceux marqués d'un astérisque paraissent dans chacune des sections provinciales.

Services de détail par provinces

Sur un total de recettes de \$249,455,900 réalisé par les établissements de service, les places d'affaires d'Ontario figurent pour \$109,397,900 on 43-85 p.c. Québec arrive en deuxième place avec 25-49 p.c. des recettes globales et la Colombie Britannique en troisième lieu avec 9-90 p.c. Le tableau I montre la répartition du commerce des établissements de service par provinces.

TABLEAU 1.—CANADA—SERVICES DE DÉTAIL, PAR PROVINCES, 1930

Services de détail par localité

Les affaires des établissements de service de détail sont concentrées dans les grandes villes bien plus que celles du commerce de vente au détail. Les villes de 30,000 ânies ou plus ne contiennent que 29·15 p.c. de la population totale du Dominion, mais les établissements de service de détail installés dans ces centres figurent pour 71·24 des recettes. Les recettes par têre des établissements de service accusent une grosse différence entre les localités rurales et urbaines.

TABLEAU II.—CANADA—RECETTES PAR TÊTE DES ÉTABLISSEMENTS DE SERVICES, 1930

C'est dans les villes que les établissen.ents de service font la plus grande partie de leurs affaires et bon nombre de ces services ne peuvent prespérer d'une façon raisonnable que dans les endroits où ils peuvent avoir une forte clientèle. D'un autre côté, il y a certains genres d'affaires, comme les boutiques de forgeron, que l'on trouve plutôt dans les localités rurales ou dans les petites villes. Tel que déjà dit, un peu plus de 70 p.c. du total des affaires du service de détail est fait par des établissements situés dans des villes de 30,000 âmes ou plus. La proportion varie considérablement pour différents groupes de services. Les affaires des barbiers, 1 ar exemple, ne sont pas autant concentrées, car les établissements des villes de 30,000 âmes et plus figurent pour environ 50 p.c. des recettes totales de ce genre d'affaires. Les salons de beauté, d'un autre côté, figurent pour plus des trois-quarts des recettes dans ces localités et les affaires des services de taxi et de livraison par automobile sont concentrées à peu près dans la même mesure dans les villes de 30,000 âmes et plus.

Recettes par genres d'affaires

Le groupe des établissements d'annusement et de récréation a la plus grande proportion des recettes totales des établissements de services de détail au Canada; son pourcentage est de 21·34 p.c. Le groupe de l'entreposage et du transport suit de près avec 20·43 p.c. Les autres groupes importants sont les services domestiques avec 14·71 p.e., les boutiques de réparation et de service

avec 12.30 p.c., le groupe des services comn creiaux avec 11.79 p.e. et le groupe des services personnels avec 9.80 p.c. Les proportions relatives dans le total des services rendus par les divers groupes diffèrent beaucoup d'une province à l'autre.

Groupe de l'amusement et de la récréation.—Ce groupe a touché plus de 30 p.c. des recettes totales dans chacune des Provinces Maritimes, où les recettes du groupe de l'entreposage et du transport ont été relativement faibles. Dans les autres provinces la proportion des recettes totales du groupe de l'amusement et de la récréation allait de 18-87 p.c. dans Québec à 28-22 p.c. dans la Saskatchewan. Les recettes des emémas et des théâtres ont atteint 70 p.c. du total de oc groupe. Les cinémas, avec des recettes de \$38,479,500, constituent le genre le plus important d'affaires dans les services de détail et ont réalisé près d'un sixième des recettes totales de tous les établissements. Les salles de billard et poul comptaient le plus grande nombre d'établissements du groupe, mais leurs recettes, soit \$4,350,500, ne dépassaient guère celles des 208 salles de quilles qui ont fait rapport et dont les recettes ont atteint \$3,033,300.

Groupe des services commerciaux.—Sur une recette de \$29,409,300 pour ce groupe, \$21,910,900 provenaient des agences de publicité. Bien que les recettes du groupe des services commerciaux forment presque 12 p.c. des services en général, ce genre d'affaires est surtout conduit dans les provinces d'Ontario et de Québec. Ces deux provinces absorbent \$25,686,500 du total de \$29,409,300 déjà mentionné.

Groupe des services domestiques.—Les recettes de ce groupe forment 14·71 p.c. du total. La proportion varie de 11·84 p.c. dans l'Ile du Trince-Edouard à 17·87 p.c. dans la Colombie Britannique. Le genne le plus important d'affaires dans ce groupe est celui des buanderies à main ou à force motrice. Les buanderies seules représentent \$20,645,500 sur un total de \$36,711,400 pour ce groupe. Une autre section importante de ce groupe est celle des établissements de nettoyage, de pressage, de réparage, et teintureries qui absorbent ensemble \$13,299,000 des recettes.

Groupe des services éducationnels.—Ce groupe a obtenu moins de 1 p.c. des affaires du Canada en général et les recettes du groupe ne constituent plus de 1 p.c. que dans une seule province. Ce classement n'inclut que les établissements éducationnels conduits dans un but lucratif et ne comprend pas les tuteurs ou instituteurs individuels.

Groupe des services personnels.—Ce groupe a absorbé un peu moins de 10 p.c. des recettes totales des établissements de service. Dans cinq des neuf provinces les recettes de ce groupe ont égalé de 9 à 12 p.c. du total. Dans la province de Manitoba la proportion fut de 8·16 p.c. et au Nouveau-Brunswick, de 13·52 p.e. Les boutiques de barbiers forment la section la plus importante de ce group e sous le double rapport du nombre d'établissements et des recettes encaissées. Plus des deux tiers des recettes totales de \$24,460,500 déclarées par ce groupe étaient au crédit des boutiques de barbiers, tandus que les salons de beauté et de confiure en accusent \$6,109,300. Ces recettes, naturellement, n'incluent pas le revenu de ces sections dans les magasins à rayons et autres et les recettes des personnes qui condusent de tels établissements dans leur propre maison.

Le groupe de la photographie comprend les ateliers de photographie, les établissements des photographes et des firmes qui s'occupent de l'impression et du développement des photographies, mais non les fabriques de bleus ou ateliers commerciaux d'impression qui peuvent exécuter des travaux de reproduction. Les recettes du groupe de la photographie représentent 2·04 p.c. du total de tous les établissements de service. Environ les quatre cinquièmes des recettes totales du groupe de la photographie sont attribués aux photographes.

Le groupe des services funéraires accusant des recettes de \$9,299,800, soit 3.73 p.c. du total des établissements de service. Les entrepreneurs de pompes funèbres ent absorbé une somme de \$5,703,500 et les établissements de pompes funèbres et meubles, \$592,700. Ce dernier classement chevauche un genre semblable d'affaires dans le commerce des marchandises, et les établissements ont été classés suivant que les recettes de la vente des meubles ou celles des funérailles étaient plus élevées. "Les magasins de meubles et pompes funèbres" forment un genre d'affaires beaucoup plus considérable que "les établissements de pompes funèbres et meubles" puisque une somme totale de ventes de \$4,896,900 apparaît dans le tableau de ventes des premiers et \$466,600 seulement pour les derniers. Cette division, toutefois, n'est pas absolument exacte car plusieurs établissements classés comme magasins de meubles et pompes funèbres portaient les cercueils, etc. au compte des marchandises vendues au lieu de les inclure dans les recettes de services.

Le groupe des boutiques de réparations et de services comprend tous les établissements offrant directement au public des services de réparation ou mécaniques. Les recettes de ce groupe forment 12·30 p.c. du total des services de détail. Des recettes totales de \$30,675,300 des boutiques de réparation et de service, \$11,208,200 étaient au crédit des étal dissements d'automobiles, comme garages de services boutiques de peinturage d'autos, etc. Ce total, toutefois, ne représente pas la somme totale dépensée pour les réparations ou les services d'automobiles puisque des recettes de cette source au montant de \$31,620,800 ont été rapportées par les établissements d'automobiles s'occupant de la vente au détail. D'un autre côté, est incluse dans les recettes des boutiques de réparations et de service d'automobiles une sonu e de \$912,100 pour vente de marchandises. Les ateliers de forgeron et de savetier sont deux genres d'affaires importants de ce groupe. Les recettes totales de ces deux genres d'affaires ont atteint de sept à luit millions de dollars.

Groupe de l'entreposage et du transport.—Les recettes équivalaient à 20·43 p.c. du total de tous les établissements. Il comprend trois divisions principales: le transport et l'entreposage, le service de taxi et de livraison par automobile, et les transports par automobiles antre que le camionnage local.

La première division, celle du transport et de l'entreposage, est la plus importante des trois; ses recettes s'élèvent à \$23,677,100, soit près de la moitié du total de ce groupe. Les services de taxi et de livraison automobile ont des recettes de \$8,290,300, soit un peu plus que la moitié des sommes encaissées par les autres catégories de transport automobile. Dans la catégorie des transports divers, le commerce le plus important est celui de l'acro-transport.

Services divers.—Leurs recettes atteignent \$7,780,000, soit 3·12 p.c. du total de tous les établissements; ils comprennent tous les genres de services qui ne rentrent pas dans les groupes précédents. Parmi les plus importants, on compte les ateliers de réparation mécanique, la consigne des bagages, les écuries de louage ou de pension.

Frais d'exploitation des établissements de service

La grande diversité des fonctions remplies par ces établissements se reflète dans les coefficients de frais d'exploitation des différents genres d'affaires. Dans le cas des magasins détaillants, les frais d'exploitation forment la plus grande partie du coût de distribution des marchandises et représentent les frais supportés dans l'étape finale de l'acheminement de la marchandise, du fabricant ou producteur au consommateur. Pour les établissements de service, les frais d'exploitation revêtent plus souvent la forme de frais de fabrication ou de production que de frais de distribution, bien que ces derniers aient leur importance. Les services rendus dans les boutiques de barbiers ou les salons de beauté se produisent, dans une grande mesure, durant la visite du client et entraînent surtout des frais de main-d'œuvre. Pour rendre ces services, il faut, naturellement, un certain outillage et des locaux. Dans un cinéma, le service principal est d'ordre mecanique; il consiste à offrir les moyens de voir les films déroulées. Les salles de quilles on de billard mettent certains jeux à la disposition de leurs clients, ce qui constitue encore un type de service différent des précédents et entraîne divers frais. Dans le cas des services domestiques ou de réparations, notons deux genres de fonctions. La première consiste à remettre en bon état les effets personnels du client, par le blanchissage, le dégraissage ou le repassage, ou par d'autres besognes mécaniques qui ne comportent l'emploi d'aucun matériel neuf. La seconde a pour objet d'ajouter du matériel neuf aux effets personnels du client, comme dans le racommodage des chaussures ou autres besognes de réparage qui consistent à ajouter de nouvelles pièces ou de nouveau matériel. Le groupe des transports constitue un autre genre de services, où il n'y a aucune modification de l'objet, mais simplement un changement dans la situation effectué par l'entreprise de transport.

Les principaux chapitres des frais des établissements détaillants de services sont les salaires et gages, le loyer des locaux ou les frais immobiliers des propriétés appartenant à ces établissements, la réclame, le matériel d'exploitation, l'abounement au téléphone, l'éclairage, le chauffage, l'énergie motrice et le service d'eau, les impôts et l'assurance. Le questionnaire employé pour le recensement tendait à obtenir des renseignements sur les frais d'exploitation répartis sous trois rubriques:—

- (a) Salaires et gages
- (b) Loyer
- (c) Tous autres frais.

Moins de la moitié des établissements en question avaient tenu leurs comptes avec assez de détail pour répondre à ce questionnaire, mais les maisons qui ont fait connaître ces données ont des recettes équivalentes à près de 80 p.c. du total. La proportion des réponses relatives aux frais d'exploitation diffère grandement, selon le genre de service. Les proportions les plus faibles se remarquent dans les genres de commerces qui, pour la plupart, ressortissent à l'artisanat, comme les boutiques de barbiers, les ateliers de forgerons, les boutiques de savetiers, etc.

Comme les frais d'exploitation de ces établissements comprennent souvent les frais du service et de la distribution, le coefficient des frais d'exploitation, par rapport aux recettes, est plus élevé que celui des frais d'exploitation par rapport aux ventes dans les magasins de détail. Dans ce dernier genre de commerce, comme nous l'avons déjà noté, le frais se résument en général à ceux de la distribution. Le coefficient moyen des frais d'exploitation des établissements détaillants de services est de 74·35 p.c. des recettes, tandis que la proportion des frais dans les magasins de détail est de 24·01 p.c. des ventes. Le loyer des établissements de services qui louent des locaux représente 8·78 p.c. des recettes, comparativement à 3·68 p.c. pour les magasins de détail.

Les frais de salaires, dans les établissements de service, doivent com rendre la rémunération du propriétaire qui s'occupe effectivement de son affaire, aussi bien que les salaires et les gages de sos employés. Le questionnaire du rocensement demandait aux propriétaires ou aux membres de firmes qui touchent une rémunération fixe de faire connaître les sommes ainsi reçues durant l'année. Seuls 3,232 propriétaires, sur un total de 44,622, ont fait cette déclaration. Pour déterminer la moyenne des frais d'exploitation dans les établissements en question, il a fallu fixer arbitrairement la valeur des services des propriétaires qui s'occupent effectivement de leurs affaires, mais qui n'ont pas fait connaître les sommes touchées au cours de l'année. Bien que la valeur de ces services admette plusieurs modes de calcul, le mode qui, a-t-on pensé, donnait les résultats les plus exacts, consistait à attribuer aux propriétaires de l'entreprise le salaire moyen d'un employé à service continu dans le même genre d'établissement. Puisque la valeur estimative des services des patrons dépasse, dans certains genres d'affaires, la moitié de la somme déboursée en salaires, il est évident que si on l'avait calculée d'une autre façon le coefficient d'exploitation pourrait être fort différent.

Dans certaines catégorics d'établissements de services il se vend des quantités considérables de marchandises, soit à titre de matières utilisées dans les travaux de réparation, soit directement, comme, par exemple, le tabac et les breuvages dans les salles de quilles et de billards et les pneus et pièces de rechange dans les atcliers de réparation d'automobiles. D'autre part, nombre d'établissements de services utilisent d'importantes quantités de fournitures dans la poursuite de leurs opérations, ainsi les serviettes, savons, etc. dans les boutiques de barbiers et les matières qu'emploient les teinturiers et nettoyeurs. Il est souvent difficile d'établir une distinction entre le prix de revient des matières et fournitures qui doivent entrer dans les frais d'exploitation et celui de la marchandise qui, étaat revendue, ne doit pas y entrer.

Groupe de l'amusement et de la récréation.—Le coefficient d'exploitation moyen pour le groupe de l'amusement et de la récréation s'élève à 79·34 p.c. Les salles de billards et de quilles ont à peu près les mêmes frais de location, soit 19·61 p.c. pour les premiers et 19·94 p.c. pour les derniers. Le total des frais d'exploitation, cependant, s'élève à 68·52 p.c. pour les salles de billards et à 77·39 p.c. pour les salles de quilles. Celles-ci, toutefois, occupent une bien plus forte proportion d'employés salariés et sont, en moyenne, des établissements plus vastes.

Les frais d'exploitation des cinémas prennent 80.64 p.c. des recettes et ceux des salles de cinéma-vaudeville, 81.77 p.c. Les frais de location des cinémas exploités dans des locaux loués s'élèvent à 11.41 p.c. des recettes. Les salaires du personnel des cinémas qui ont rendu compte de leurs frais prennent environ 20 p.c. des recettes.

Un des plus importants éléments de dépense des cinémas est constitué par la location de films. Les loyers des films ne reposent sur aucune base uniforme. Dans certains cas ils sont fixés à tant pour cent de la recette réalisée par la salle pendant que le film reste à l'affiche; dans d'autres ils sont forfaitaires. Leur somme peut se mesurer par les recettes brutes des entreprises canadiennes de distribution de films. Pour l'année 1930 celles-ci se sont établies à \$9,808,500, tandis que les recettes brutes des cinémas (y compris les salles de cinéma-vaudeville) s'élevaient à \$38,479,500. Les recettes brutes des entreprises de distribution de films formaient donc 25. p.c. de celles des cinémas.

Groupe des services commerciaux.—La coefficient d'exploitation moyen de 29·17 p.c. indiqué pour ce groupe ne constitue pas un indice exact du niveau des frais d'exploitation des établissements de ectte catégorie, car, pour ce qui est des agences de publicité, il est basé non pas sur les recettes, mais sur le chiffre d'affaires. Le coefficient moyen pour ce groupe, non compris les agences de publicité, s'élève à environ 77 p.c. des recettes.

Groupe des services domestiques.—Les trois catégories importantes comprises dans ce groupe, savoir les établissements de nettoyage, pressage et réparage de vêtements, les nettoyeurs et teinturiers, et les buanderies, avaient des frais d'exploitation, par rapport à leurs recettes, de 87-24, 88-99 et 90-93 p.c. respectivement. Plus de la moitié de la somme des salaires des établissements de nettoyage et pressage représente la valeur estimative des services des propriétaires. Chez les nettoyeurs et teinturiers, qui, règle générale, opèrent sur une plus grande échelle, la rémunération patronale représente moins d'un septième du total des salaires. Les frais de location de ces établissements sont moindres également, ne représentant que 5-20 p.c. des recettes, contre 14-72 p.c. pour les établissements de nettoyage et pressage. Les buanderies se divisent en deux catégories principales: les buanderies à vapeur, dont le capital engagé est considérable et qui emploient une main-d'œuvre relativement nombreuse, et les petites buanderies à main, qui souvent n'emploient aueun personnel salarié. Le coefficient d'exploitation des buanderies représente donc la moyenne de celui des deux genres d'établissements.

Groupe des services éducationnels.—Ce groupe ne comprend que deux catégories suffisamment importantes pour être considérées comme représentatives. Les collèges commerciaux avaient un coefficient d'exploitation de 85·76 p.c. et les autres écoles de métiers, de 89·00 p.c. Les frais de location des collèges commerciaux exploités dans des locaux loués s'élèvent à 9·44 p.c. des recettes et ceux des autres écoles de métiers à 12·41 p.c.

Groupe des services personnels.—Le coefficient d'exploitation de ce groupe s'établit à 89·92 p.c. et varie de 81·33 p.e. pour les boutiques de circurs à 91·58 p.c. pour les bains tures et les autres établissements de bains. Les frais de location des boutiques de barbiers et des salons de beauté sont sensiblement les mêmes, soit 15·11 des recettes chez les premiers et 14·90 p.e. chez les derniers. Pour les boutiques de circurs, cependant, ils s'élèvent en moyenne à 22·35 p.e. des recettes. Les frais de main-d'œuvre constituent le plus fort item isolé de dépenses dans le groupe des services personnels, et la valeur du service fourni par les propriétaires et les salaires des employés représentent une charge à peu près égale. Dans le groupe en question et dans celui des ateliers de réparation, les frais de main-d'œuvre représentent pour ainsi dire le double de tous les autres frais. Cela fait contraste avec les cinémas où la rénumération du personnel ne représente que le tiers de tous les autres frais.

Groupe de la photographie.—Les frais d'exploitation moyens des établissements du groupe absorbent $69\cdot64$ p.c. des recettes. Quand ces établissements sont installés dans des locaux loués, le loyer représente $10\cdot59$ p.c. des recettes.

Groupe des services funéraires.—En dehors du groupe des services commerciaux, le coefficient des frais d'exploitation des établissements funéraires est le plus petit du groupe des établissements de service. Les frais d'exploitation des établissements de pompes funèlores et meubles représentent 39·69 p.c. des recettes, à cause du coefficient élevé des ventes dans ce genre d'établissements. Le chiffre des frais d'exploitation des entrepreneurs de pompes funèlores représente 57·62 p.c. des recettes. Bien que ces établissements ne se livrent pas à des opérations directes de vente, la valeur des cercucils, etc., qui est inclue dans leurs recettes, mais non dans leurs frais d'exploitation, tend à abaisser le coefficient par rapport aux autres établissements de service. Le loyer des locaux à bail représente 6-46 p.c. des recettes pour les entrepreneurs de pompes funèlores et 5·08 p.c. pour les établissements de pompes funèlores et meubles.

Boutiques de réparations et de services.—Le chiffre des frais d'exploitation moyens des établissements du présent groupe équivant à 71.48 p.e. des recettes. Le coefficient varie de 54.27 p.e. pour les ateliers d'appareils d'allumage et de batteries à 85.52 p.e. pour les ateliers de réparation de voitures. Dans ce cas aussi, le pourcentage des ventes effectuées influe sur celui des frais d'exploitation et il est impossible de généraliser. Ainsi que mentioné dans l'analyse des frais du groupe des services personnels, les frais de main-d'œuvre constituent le principal article de dépenses du groupe des ateliers de réparation. Le coût du loyer absorbe en moyenne 12.23

p.c. des recettes du groupe, et le coefficient varie de 6.81 p.c. pour les ateliers de réparation et service de radio et appareils électriques, à 20.21 p.c. pour les garages d'entreposage.

Groupe de l'entreposage et du transport.—Le coefficient des frais d'exploitation du groupe est 88·31 p.c. des recettes. Les frais d'exploitation se répartissent à peu près également entre les frais constitués par les salaires et les autres frais. Le coût du loyer pour la présente catégorie est le plus bas qu'on enregistre dans tous les groupes d'établissements de service, ne représentant en moyenne que 4·24 p.c. des recettes des établissements occupant des locaux à bail. La faiblesse de ce coefficient est due au fait que les établissements précités sont installés dans des propriétés peu coûteuses, chose qui leur est permise eu raison de l'absence du besoin de s'installer dans des locaux d'apparence attrayante. Pour ce qui est des compagnies d'entreposage, le coût du loyer dépasse considérablement la moyenne du groupe, parce que l'un des principaux services offerts par les établissements de ce genre, c'est la location d'espaces déterminés pour fins d'entreposage.

Services divers.—Etant donné qu'une partie considérable des établissements de service inclus dans le présent groupe exécutent divers genres de travaux mécaniques, les dépenses de salaires et gages constituent le principal article des dépenses. Les frais d'exploitation moyens du groupe ont représenté 72·44 p.c. des recettes, et les dépenses des salaires et gages équivalent à elles seules à environ la moitié du revenu brut des établissements divers de service.

Analyse des établissements de service par le chiffre d'affaires

Le commerce de détail, dans le domaine de la vente et des services, est caractérisé par la multiplicité de petits ateliers, exploités pour la plupart par le propriétaire, avec peut-être l'aide de quelques membres de sa famille. Les données du recensement indiquent qu'environ 40 p.c. des détaillants ont un chiffre d'affaires annuel de moins de \$5,000 par année, mais le nombre proportionnel des petits établissements est bien plus grand, quand il s'agit d'établissements de service. Cela provient de ce que le propriétaire d'un magasin affecté à des opérations de vente doit vivre de la marge bénéficiaire existant entre le coût de la marchandise et le prix auquel il peut la vendre. Dans le cas des établissements de service où le patron exécute lui-même une grande partie des services offerts, la marge des bénéfices est d'autant plus grande et il n'a pas besoin pour vivre d'un chiffre d'affaires aussi considérable que les établissements affectés exclusivement à la vente.

Les recenseurs ont relevé l'existence de 42,223 établissements de service qui réalisent \$249,455,900 de recettes, de sorte que les recettes annuelles moyennes par établissement paraissent être légèrement inférieures à \$6,000. Et cependant, quand les établissements sont classés selon le chiffre des recettes consignées, 16·46 p.c. seulement des établissements recensés ont accusé des recettes supérieures à \$5,000. Ces établissements, représentent toutefois 78·74 p.e. du total des affaires de tous les établissements de service. On trouvera dans le tableau III les pourcentages cumulatifs du nombre des établissements et ceux des recettes, des plus petits aux plus grands.

TABLEAU III—CANADA—ÉTABLISSEMENTS DE SERVICE GROUPÉS SELON LES RECETTES ANNUELLES, TOUS GENRES D'AFFAIRES COMBINÉS, 1930

Groupe	Proportions cumulatives du nombre d'établisse- ments	Proportions cumulatives des recettes
Moins de \$5,000 Moins de \$10,000 Moins de \$20,000 Moins de \$20,000 Moins de \$50,000 Moins de \$50,000 Moins de \$100,000 Moins de \$200,000 Moins de \$200,000 Moins de \$300,000 Moins de \$300,000 Moins de \$600,000 Moins de \$600,000 Moins de \$600,000	91 · 38 95 · 46 96 · 85 98 · 16 90 · 22 99 · 89 99 · 84	21 · 26 30 · 32 39 · 79 45 · 54 53 · 99 66 · 42 77 · 44 83 · 47 88 · 99 96 · 77
Tous établissements	100-00	100.00

En 1930, les établissements de service avec des recettes de moins de \$5,000 constituaient \$3.54 p.c. du nombre total et touchaient 21.26 p.c. des recettes. Les établissements avec des recettes de moins de \$10,000 (y compris ceux qui out réalisé moins de \$5,000) constituaient 91.38 p.c. du total et encaissaient 30.32 p.c. des recettes totales. Six établissements de service seulement out fait des affaires de plus d'im millien de dollars par année, dont 5 appartement au groupe des services commerciaux et l'autre au service du transport. Six cinémas out réalisé des recettes de plus de \$500,000, et 10, de \$300,000 à \$500,000. La plus grande salle de billard a déclaré des recettes d'un peu plus de \$50,000, mais 11 salles de quilles out réalisé de \$50,000 à \$100,000 par année. La plus importante boutique de barbier a réalisé moins de \$60,000, mais 3 salons de beauté se raugent dans le groupe de \$100,000 à \$200,000.

Règle générale, la proportion des petits commerces par rapport au nombre total des établissements est en fonction du volume d'affaires réalisé. Les provinces qui ont les plus fortes recettes par tête paraissent avoir aussi la plus faible proportion d'établissements dans le groupe des moins importants. Le tableau IV montre cette tendance.

TABLEAU IV.—CANADA—ÉTAT COMPARÉ DE LA PROPORTION DES ÉTABLISSEMENTS À RECTTTES DE MOINS DE \$5,000, ET RECETTES DES SERVICES PAR TÉTE, PAR PROVINCES, 1930

Province	Proportion d'établis- sements	Recettes pur tête	Province	Proportion d'établis sements	Recettes par tête
	p.c.	\$	The state of the s	pe,	8
CANADA. Ile du Prince-Edouard Nouvelle-Ecosse. Nouveau-Brunswick Québec	94·02 85·62 89·36	24.04 7.48 12.39 10.76 22 13	Ontario Manitoba Saskatchewan Alberta Colombie Britannejue	80 · 21 83 · 51 90 · 18 85 · 88 77 · 49	31 88 23 48 11·22 18·36 35·58

La proportion des affaires totale des établissements de service de moindre importance est pour ainsi dire en fonction directe de la proportion des mêmes établissements par rapport au nombre total. Dans l'He du Prince-Edouard, province qui compte la plus forte proportion de petites entreprises, le groupe de moins de \$5,000 a déclaré 41-77 p.c. des recettes totales. En Colombie Britannique, par contre, les entreprises réalisant moins de \$5,000 par année n'ont déclaré que 18-52 p.c. des recettes.

Emploiement et rémunération

Le nombre des ouvriers, propriétaires et main-d'œuvre louée compris, dans les établissements de service de détail en 1930, a été en moyenne, pour l'aumée, de 108,863, dont 83-7 p.e. d'hommes et 16-3 p.e. de femmes. La proportion des hommes y est bien plus élevée que pour les établissements de commerce, et celle des femmes proportionnellement plus basse. Dans les magasins de détail, le pourcentage des hommes est de 75-6 p.c. et celui des femmes, de 24-4 p.e. En répartissant les ouvriers des établissements de service en propriétaires, employés à temps entier et employés à temps partiel, nous constatons qu'îl y a 44,622 propriétaires ou 11-0 p.c. du total, 55,257 employés à temps entier on 50-8 p.c. du total, et 8,984 employés à temps partiel on 8-3 p.c. du total. Vu que l'exploitation des établissements de services se pratique sur une plus petite échelle, le nombre des propriétaires par rapport au nombre total des ouvriers est plus élevé que pour les établissements de commerce. Dans ce dernier groupe, en effet, 31-2 p.c. des ouvriers appartiennent au groupe des propriétaires, auand la proportion correspondante pour les établissements de service est de 41-0 p.c.

Les statistiques combinées des neuf provinces indiquent que les employés des établissements de services constituaient 2·79 p.c. du total des hommes salariés et 2·67 p.c. des femmes salariées. L'opposé prévaut dans le cas des établissements de commerce, où le nombre des femmes salariées est plus élevé que celui des hommes. La proportion des personnes à salaires dans les établissements de service de détail varie considérablement d'une province à l'autre, comme en fait foi le tableau V.

TABLEAU V.—CANADA—PROPORTION TABLÉE SUR LES SEXES, ENTRE LES EMPLOYES DES SER-
VICES DE DÉTAIL ET LE TOTAL DES EMPLOYÉS, PAR PROVINCE

Province	Hommes	Femmes	Province	Hommes	Femmes p.c.
Ile du Prince-Edouard. Nouvelle-Ecosse Nouveau-Brunswick. Guébec Ontario.	1.59	1.52	Manitoba	2·75	2.67
	1.75	1.85	Saskatchewan	1·86	1.92
	1.85	1.98	Alberta	2·12	2.86
	2.96	2.25	Colombie Britannique.	3·03	5.29
	3.32	2.81	CANADA.	2·79	2.67

C'est l'Ontario qui vient en tête des provinces, pour le nombre d'hommes des établissements de service; viennent ensuite la Colombie Britannique et le Manitoba. Deux de ces provinces, l'Ontario et la Colombie Britannique, sont au nombre des trois provinces qui ont la plus forte proportion d'employés masculins dans les établissements de commerce. La Colombie Britannique compte, avec 5·29 p.c. la proportion la plus élevée d'employés féminins dans les établissements de service, et dans les établissements de commerce, cette province occupe le même rang. L'Alberta et l'Ontario viennent ensuite, avec 2·86 p.c. et 2·81 p.c. respectivement des employées à salaires dans les établissements de service.

La moyenne des salaires versés aux employés à temps entier a été de \$1,054 en 1930, comparativement à \$1,036 pour l'employé à temps entier des établissements de commerce. La Colombie Britannique, avec \$1,153, a la moyenne la plus élevée pour les établissements de service et c'est l'Ile du Prince-Edouard qui a la moyenne la plus basse, avec \$713. Ces moyennes sont le quotient du montant total des salaires et des gages versés aux employés à temps entier divisé par le nombre moyen de ces employés pendant une année. Les moyennes ne représentent donc pas les recettes des employés, puisque les totaux comprennent les montants versés tant aux hommes qu'aux femmes et que l'on n'établit pas de distinction entre les différentes classes d'employés. Les chiffres n'incluent pas les sommes touchées par les propriétaires ou les membres de firme. Les employés à temps partiel ont reçu, en moyenne, \$336 par année, mais la durée d'emploi de ces ouvriers varie considérablement.

Sur un total de 44,622 personnes qui ont déclaré leurs recettes au cours de l'année il y avait 3,232 propriétaires. La moyenne du montant ainsi déclaré a été de \$1,956. Dans les établissements de commerce de détail, la moyenne des recettes des propriétaires s'est établie à \$1,856. Mais dans les deux cas un petit nombre seulement de propriétaires ont déclaré le montant de leurs recettes.

Le rapport entre la proportion du total des ouvriers employés dans chaque groupe de services et la proportion des recettes totales n'est pas aussi précis que dans le cas des établissements de commerce. La grande variété des services offerts et la différence dans la somme de travail exigée dans chaque cas donnent lieu à des différences considérables entre la proportion des recettes et le nombre des ouvriers dans certains cas. Dans le tableau VI on trouvera les statistiques pour chaque groupe.

TABLEAU VI—CANADA—DISTRIBUTION DES EMPLOYÉS ET RECETTES GROUPÉS PAR GENRES D'AFFAIRES

Groupe	Employés a occupé	Pourcen- tage du	
	Nombre	P.e.	total des recettes

Groupe de l'entreposage et du transport Services divers	20,207 21,155 4,104	19·43 3·77	20·4 3·1

⁽¹⁾ Propriétaires melus.

Les trois groupes principaux classés d'après le nombre des employés sont : les services donnestiques, le groupe de l'entreposage et du transport et les boutiques de réparations et de services. Ces groupes, cependant, occupent respectivement les troisième, second et quafrième rang d'après le total de leurs recettes. Le groupe des amusements, qui vient au premier rang pour le chiffre d'affaires, tombe au cinqième quant au nombre d'employés.

Nombre d'employés par le chiffre d'affaires.—Bien que la comparaison du nombre d'établissements de services avec le nombre d'employés indique une moyenne de plus d'un employé par établissement pour l'ensemble de tout le Canada, l'étude du tableau VII fait voir une forte proportion de tous les établissements de services inclus dans le recensement exploités par le propriétaire sans l'aide d'aueun employé à temps entier.

TABLEAU VII.—CANADA—DISTRIBUTION DES EMPLOYÉS À TEMPS ENTIER ET LES ÉTABLISSE-MENTS DE SERVICE PAR ÉTENDUE DU CHIFFRE D'AFFAIRES

Chiffre d'affaires	Moyenne du nombre d'employés par éta- blissement	Pour cent du total des em- ployés	Pour cent du total des éta- blissements
Moins de \$5,000 \$5,000-\$9,999 \$10,000-\$19,999 \$20,000-\$22,999 \$20,000-\$99,999 \$50,000-\$99,999 \$50,000-\$99,999 \$200,000-\$299,999 \$200,000-\$299,999 \$50,000-\$99,999 \$50,000-\$99,999	0·24 1·89 3·76 6·55 9·75 17·50 31·66 58·43 78·81 100·82	15·71 11·47 11·86 7·04 9·86 14·34 11·60 6·75 5·20 5·17 1·00	83.54 7.84 4.08 1.39 1.31 1.06 0.47 0.15 0.09 0.06
Totaux	1.29	100.00	100.00

La distribution des établissements et des employés à temps entier par le chiffre d'affaires telle que présentée dans le tableau VII montre que plus de 80 p.c. de tous les établissements de services ont des recettes annuelles inférieures à \$5,000. C'ette forte proportion du nombre total emploie moins de 16 p.c. de tous les employés à temps entier dans tous les établissements de services, en moyenne, seulement un sur quatre de ces petits établissements exigeaut les services d'un employé à temps entier, moins d'un cinquième de tous les établissements employaient 85 p.c. de tous les employés à temps entier dans les établissements de services de détail. Le nombre moyen d'employés dans chaque groupe d'affaires paraît au tableau VII.

Constitution des établissements

Les établissements de services de détail ont été classifiés en quatre groupes selon le genre de propriété qui en régit l'exploitation. Cette forme de classement doit être examinée distinctement des types d'opération où les établissements sont groupes selon le nombre d'établissements ou unités soumis à une seule direction.

Les établissements de service sont divisés en quatre groupes: particuliers, sociétés en nom collectif, compagnies incorporées et antres formes. Ce dernier groupe comprend les établissements exploités par des cercles sociaux et des sociétés de charité ou de secours mutuels. Presque 90 p.c. des services sont exploités par des personnes faisant affaires seules, mais ils ne représentent que 42-48 p.c. des recettes. Les établissements exploités par des associés représentaient un peu plus de 6 p.c. du nombre et 8-55 p.c. des recettes. Les services exploités par des compagnies incorporées représentaient un peu plus de 4 p.c. du nombre total, mais presque la moitié des recettes. Les recettes des 56 établissements classés sous le titre "autres formes" se chiffraient à \$524,800.

Types d'opération

Les organisations multiples ne se sont pas développées aussi rapidement dans le domaine du service que dans celui du négoce. Le fait qu'il est nécessaire de servir directement le public à l'établissement achalandé et aussi les rapports personnels existant dans beaucoup d'établissements entre le propriétaire et ses clients ont contribué, jusqu'ici, à garder ces établissements un

caractère très individuel. Le peu de capital qu'il faut pour exploiter un grand nombre de ces services a eu pour effet aussi de permettre à presque n'importe qui désirait se mettre en affaires d'enfrer dans ce genre de commerce.

Bien entendu, dans certains services le système de société et d'organisations multiples s'est considérablement développé. En 1930, le chiffre des recettes des sociétés à succursales représentait moins de 15 p.c. des recettes totales des établissements de service et le nombre des succursales n'était que de 437.

Sur les 42,223 établissements de service, 40,964 étaient des unités simples et 536 étaient des établissements multiples consistant en deux ou trois unités. Les succursales de chaînes de tous geures étaient au nombre de 437. Il y avait 252 concessions louées, 10 rayons loués et 24 types divers.

Les établissements individuels indépendants ont encaissé $74 \cdot 79$ p.c. des recettes totales, alors que les multiples de deux et trois en ont en $10 \cdot 45$ p.e. Les recettes des établissements de chaîne ont représenté $14 \cdot 11$ p.c. du total, tandis que les affaires des autres types ont été de moins de 1 p.c. du tout.

C'est dans le domaine des amusements que les établissements de service en chaîne ont réalisé les revenus les plus considérables, les théâtres exploités par les organisations multiples ayant touché 40·84 p.c. des recettes totales des théâtres en 1930. Les cinémas appartenant aux chaînes sectionnelles et nationales sont au nombre de 63, et leurs recettes ont atteint 22·21 p.c. du total. Il y a 50 unités de chaînes provinciales, qui ont encaissé 8·24 p.c. des revenus et 54 unités de chaînes locales dont les recettes se chiffrent à 10·39 p.c. Les multiples de deux et trois établissements sont au nombre de 92, et leurs recettes représentent 16·35 p.c. du total. Les unités simples, au nombre de 659 sur un total de 918 théâtres, ont réalisé une proportion un peu plus élevée des recettes globales que les théâtres en chaîne, soit 42·81 p.c. en regard de 40·84 p.c.

Les organisations multiples constituent une partie importante du groupe des services commerciaux dont font partie plusieurs agences de publicité classés comme chaînes. On n'a pu, cependant, fournir des détails distincts au sujet des types d'opération dans cette sphère.

Capital engagé dans les établissements de service de détail

Le capital placé dans les établissements de services se chiffre à \$232,110,600, soit un peu moins seulement du chiffre des recettes de 1930. Ce placement comprend la valeur de l'outillage et des fournitures employés dans les établissements de service, les comptes de caisse et d'opérations, ainsi que la valeur des biens immobiliers. Vu que le montant de la propriété et de l'outillage nécessaires à l'exploitation de nombieux établissements de service ou d'endroits d'amusements est considérable, la valeur du capital engagé est parfois plus élevée que celle des recettes de l'année. C'est le cas des établissements du groupe de l'amusement et de la récréation des services funéraires et le groupe de l'entreposage et du transport. La proportion relative du capital engagé dépend en grande mesure de la situation de l'établissement de service dans un édifice loué ou pessédé, étant doimé que la valeur de l'immeuble loué n'est pas incluse dans le rapport relatif au montant du capital immobilisé.

⁽⁴⁾ Included in group totals may be figures for classifications which cannot be shown separately without disclosing individual operations.

(4) Not all establishments gave full particulars of operating expenses and even some establishments reporting rent failed to give the amount of other expenses. Thus the totals in this section do not agree with those in Table 1A, nor do they necessarily include figures for all establishments in leased premises. The operating expenses given in this table should only be considered representative for those kinds of business where the total receipts of establishments reporting expenses forms a fairly large proportion of the total receipts of all establishments in the same classification.

(3) The total value of proprietors receives was computed in the following manner: first, the amounts reported as salaries were taken for those proprietors receiving a fixed salary; secondly, the value of the services of those proprietors who did not report a fixed salary was computed at the same rate as the average salary of a full-time employee in the same kind of business and in the same province.

⁽¹⁾ Dans les totaux de groupe se trouvent parsois des chiffres dont la classification ne peut être montrée afin de ne pas dévoiler des opérations individuelles.

(2) De les tablesements mont pas fourni les détails complets des frais d'exploitation et même quelques établissements faisant rapport pour leyrer ent omis la somme des dépenses diverses, ce qui fait que les totaux de ce tableun ne correspondent pas uvec ceux du tableau 1A, et n'incluent pas nécessairement les chiffres pour tous établissements pris à bail. Les frais d'exploitation paraissant dans ce tableau ne peuvent être considérés commo représentatifs que dans les genres de commerce où les recettes globales des établissements nyant déclaré leurs dépenses forment une assez lurge proportion des recettes globales de établissements entrant dans la même classification.

(3) La valeur totale des services des propriétaires a été calculée de la manière suivante: d'abord, les montants déclarés comme salaires ont été pris sur ceux des propriétaires recovant un salaire fixe. L'assuite la valeur des services des propriétaires qui n'ont pas déclaré recevoir un salaire a été calculée au même taux que les salaires moyens des employés à temps entier dans lo même genre de commerce et dans la même province.

⁽¹⁾ Included in group totals may be figures for classifications which cannot be shown separately without disclosing individual operations
(2) In some instances only the receipts for a group of establishments were reported instead of the volume of business for each unit. The figures for such establishments have not been included in this table.
(3) Any slight differences in cross or vertical addition of receipts result from the necessity of adjusting the figures for each province to the nearest thousand.

⁽¹⁾ The averages in this table are based upon the figures for independent establishments reporting capital investment as multiple organizations reported only the total capital investment and not the capital in each unit.

⁽¹⁾ Les moyennes de ce tableau sont basées sur les chiffres des étabhssements indépendants qui ont déclaré leur capital, parce que le capital des multiples organisations n'a été donné que pour l'ensemble des chaînes et non pour chaque unité

18	MISCELLANEOUS SERVICES—DIVERS	3	800	3,000			

⁽¹⁾ Included in totals may be figures for classifications which cannot be shown separately without disclosing individual operations.

⁽²⁾ Not all establishments gave full particulars of operating expenses and even some establishments reporting rent failed to give amount of other expenses. Thus the totals in this section do not agree with those in Table 1, nor do they necessarily include figures for all establishments in leased premises.

^(*) Reported salures of proprietors should only be used as a basis for computing the total compensation of proprietors in any kind of business when the number of reporting establishments is relatively large and the number of proprietors receiving a stated salury forms a substantial proportion of the total number of proprietors. Similar precautions should be taken in computing total expenses for any kind of business.

3	4	-	-	3,900	5,200	15,200	14

⁽¹⁾ Dans les totaux se trouvent parfois des chiffres dont la classification ne peut être montrée afin de ne pas dévoiler des opérations individuelles.

⁽²⁾ Tous les établissements n'ont pas fourni les détails complets des frais d'exploitation et même quelques établissements faisant rapport pour loyer ont omis la somme des déponses diverses, ce qui fait que les totaux de ce tableau ne correspondent pas avec ceux du tableau 1, et n'incluent pas nécessairement les chiffres pour tous établissements pris à bail.

⁽²⁾ Les salaires des propriétaires, tels que rapportés, do ivent servir seulement comme base au calcul de la compensation totale des propriétaires dans un commerce quelconque quand le nombre d'établissements est relativement élové et que le nombre de propriétaires recevant un salaires spécifié forme une proportion substantielle du nombre total de propriétaires l'Ifaut prendre des précautions semblables en calculant les dépenses globales de tout genre de commerce.

⁽¹⁾ Included in group totals may be figures for classifications which cannot be shown separately without disclosing individual operations.

(2) Not all establishments gave full particulars of operating expenses and even some establishments reperting rent failed to give amount of other expenses. Thus the totals in this section do not agree with those in Table 1, nor do they necessarily include figures for all establishments in leased premises.

(3) Reported salaries of proprietors should only be used as a basis for computing the total compensation of proprietors in the number of reporting establishments is relatively large and the number of proprietors reciving a stabled sunry forms a substantial proportion of the total number of proprietors. Similar precautions should be taken in computing total expenses for any kind of business.

⁽¹⁾ Included in group totals may be figures for classifications which cannot be shown separately without disclosing individual operations.

(2) Not all establishments gave full particulars of operating expenses and even some establishments reporting rent failed to give amount of other expenses. Thus the totals in this section do not agree with those in Table 1, nor do they necessarily include figures for all establishments in leased premises.

(3) Reported salaries of proprictors should only be used as a basis for computing the total compensation of proprietors in any kind of business when the number of reporting establishments is relatively large and the number of proprietors receiving a stated salary forms a substantial proportion of the total number of proprietors. Similar precautions should be taken in computing total expenses for any kind of business.

⁽¹⁾ Dans les totaux de groupe se trouvent parfois des chiffres dont la classification ne peut être montrée afin de ne pas dévoiler des opérations individuelles.
(2) Tous les établissements n'ont pas fourni les détails complets des fruis d'exploitation et même quelques établissements faisant rapport pour loyer ont omis la somme des dépenses diverses, ce qui fant que les totaux de ce tableau ne correspondent pas avec ceux du tableau 1, et n'incluent pas nécessairement les chiffres pour tous établissements pris à bail.
(3) Les salaires des propriétaires, tels que rapportées, douvent servir seulement comme base au culied de la compensation totale des propriétaires dans un commerce quelconque quand le nombre d'établissements est relativement élevé et que le nombre de propriétaires recevant un sulaire spécific forme une proportion substantielle du nombre total de propriétaires. Il faut prendre des précautions semblables en calculant les dépenses globales de tout genre de commerce.

⁽i) Not all establishments gave full particulars of operating expenses and even some establishments reporting rent failed to give amount of other expenses. Thus the totals in this section do not agree with those in Table 1, nor do they necessarily include figures for all establishments in lensed premises.
(i) Reported salaries of preprietors should only be used as a basis for computing the total compensation of proprietors in any kind of business when the number of reporting establishments is relatively large and the number of proprietors receiving a stated salary forms a substantial proportion of the total number of proprietors. Similar precautions should be taken in computing total excesses for any kind of business.

⁽¹⁾ Tous les établissements n'ont pas fourni les détails complets des frais d'exploitation et même qualques établissements faisant rapport pour loyer out omis la somme des dépenses diverses, ce qui fait que les totaux de ce tableau ne correspondent pas avec ceux du tableau 1, et n'incluent pas nécessairement les chilites pour tous établissements pris à bail.
(3) Les sulaires des proprétaires, tels que rapportées, doivent server seulement comme base au calcul de la compensation totale des proprétaires dans un commerce quelconque quand le nombre d'établissements est relativement élevé et que le nombre de propriétaires recevant un salaire spécifié forme une proportion sibantielle du nombre total de proprétaires. Il faut prendre des précautions semblables en calculant les dépenses globales de tout genre de commerce.

⁽¹⁾ Included in group totals may be figures for classifications which cannot be shown separately without disclosing individual operations.

⁽²⁾ Not all establishments gave full particulars of operating exponses and even some establishments reporting rent failed to give amount of ether expenses. Thus the totals in this section do not agree with those in Table 12, nor do they necessarily include figures for all establishments in leased premises.

(3) Reported salaries of proprietors should only be used as a basis for computing the total compensation of proprietors in any kind of business when the number of reporting establishments is relatively large and the number of proprietors receiving a stated salary forms a substantial proportion of the total number of proprietors. Similar precautions should be taken in computing total expenses for any kind of business.

⁽¹⁾ Dans les totaux de groupe se trouvent parfois des chiffres dont la classification ne peut être montrée afin de ne pas dévoiler des opérations individuelles.

⁽²⁾ Tous les établissements n'ont pas fourni les détails complets des frais d'exploitation et même quelques établissements faisant rapport pour loyer ont onis la somme des dépenses diverses, ce qui fait que les totaux de ce tableau ne correspondent pas avec ceux du tableau 12; et n'incluent pas nécessairement les chiffres pour tous établissements pris à bail.

^(*) Les salaires des propriétaires, tels que rapportés, doivent servir seulement comme base au calcul de la compensation totale des propriétaires et au commerce quelconque quand le nombre d'établissements est relativement élevé et que le nombre de propriétaires recevant un salaire spécifié forme une proportion substantielle du nombre total de propriétaires. Il faut prendre des précautions semblables en calculant les dépenses globales de tout genre de commerce.

⁽¹⁾ This total includes one classification in which the number of establishments is less than three, and concerning which no information can be disclosed.

(2) Not all establishments gave full particulars of operating expenses and even some establishments reporting rent failed to give amount of other expenses. Thus the totals in this section do not agree with those in Table 1, nor do they necessarily include figures for all establishments in leased premises.

(3) Reported salaries of proprictors should only be used as a basis for computing the total compensation of proprietors in any kind of business when the number of reporting establishments is relatively large and the number of proprietors receiving a stated salary forms a substantial proportion of the total number of proprietors. Similar precautions should be taken in computing total expenses for any kind of business.

⁽¹⁾ This total includes one classification in which the number of establishments is less than three, and concerning which no information can be disclosed.

(2) Not all extablishments gave full particulars of operating expenses and even some establishments reporting rent failed to give amount of other expenses. Thus the totals in this section do not agree with those in Table 10, nor do they necessarily include figures for all establishments in leased premises.

(3) Reported submires of proprietors should only be used as a basis for computing the total compensation of proprietors in any kind of business when the number of reporting establishments is relatively large and the number of proprietors receiving a stated salary forms a substantial proportion of the total number of proprietors. Similar precautions should be taken in computing total expenses for any kind of business.

⁽⁴⁾ Included in group totals may be figures for classifications which cannot be shown separately without disclosing individual operations.

(2) Not all establishments gave full particulars of operating expenses and oven some establishments reporting rent failed to give amount of other expenses. Thus the totals in this section do not agree with those in Table 1, nor do they necessarily include figures for all establishments in leased premises.

(2) Reported satiries of proprietors should only be used as a basis for computing the total compensation of proprietors in any kind of business when the number of reporting establishments is relatively large and the number of proprietors reading a stated satiry forms a substantial proportion of the total number of proprietors. Similar precautions should be taken in computing total expenses for any kind of business.

⁽¹⁾ Included in group totals may be figures for classifications which cannot be shown separately without disclosing

individual operations.

(2) Not all establishments gave full particulars of operating expenses and even some establishments reporting rent failed to give amount of other expenses. Thus the totals in this section do not agree with those in Table 1, nor do they necessarily include figures for all establishments in leased premises.

⁽¹⁾ Reported salaries of proprietors should only be used as a basis for computing the total compensation of proprietors in any kind of business when the number of reporting establishments is relatively large and the number of proprietors receiving a stated salary forms a substantial proportion of the total number of proprietors. Similar precautions should be taken in computing total expenses for any kind of business.

^{25,900} (4) Dans les totaux de groupe se trouvent parfois des chiffres dont la classification ne peut être montrée afin de ne pas dévoiler des opérations individuelles.

⁽³⁾ Tous les établissements n'ont pas fourni les détails complets des frais d'exploitation et même quelques établissements faisant rapport pour loyer ont omis la somme des dépenses diverses, ce qui fait que les totaux de ce tableau ne correspondent pas avec ceux du tableau 1, et n'incluent pas nécessairement les chiffres pour tous établissements pris à bail.

pas avec con un anneau 1, et a incuent pas accessarement es emirces pour cons connectants pris a baie en control de la compensation (*) Les salaires des propriétaires, tels que rapportét, doivent servir seulement comme base au calent de la compensation totale des propriétaires dans un commerce quelconque quand le nombre d'établissements est relativement élevé et qui le nombre de propriétaires recevant un salaire spécifié forme une proportion substantielle du nombre total de propriétaires. Il faut prondre des précautions semblables en calculant les dépenses globales de tout genre de commerce.

⁽¹⁾ Included in group totals may be figures for classifications which cannot be shown separately without disclosing individual operations.

ndividual operations.

(2) Not all establishments gave full particulars of operating expenses and even some establishments reporting rent failed to give amount of other expenses. Thus the totals in this section do not agree with those in Table 1, nor do they necessarily nelude figures for all establishments in leased premises.

(3) Reported salaries of proprietors should only be used as a basis for computing the total compensation of proprietors in any kind of business when the number of reporting establishments is relatively large and the number of proprietors receiving a stated salary forms a substantial proportion of the total number of proprietors. Similar precautions should be taken in computing total expenses for any kind of business.

⁽¹⁾ Dans les totaux de groupe se trouvent parfois des chiffres dont la classification ne peut être montrée afin de ne pas dévoiler des opérations individuelles.

⁽²⁾ Tous les établissements n'ont pas fourni les détails complets des frais d'exploitation et même quelques établissements faisant rapport pour loyer ont ormis la somme des dépenses diverses, ce qui fait que les totaux de ce tableau ne correspondent pas avec ceux du tableau 1, et n'incluent pas nécessairement les chiffres pour tous établissements pris à bail.

es avec ceux du dament 1, et a mentent pas necessarement les crimies pour tous entonssinents pris à bait.

(3) Les salaires des propriétaires, tels que rapportés, doivent servir seulement comme base au calcul de la compensation totale des propriétaires clans un commerce quelconque quand le nombre d'établissements est relativement élevé et que le nombre de propriétaires recevant un subjet espécific forme une proportion substantielle du nombre total de propriétaires Il lant prendre des précautions semblables en calculant les d'penses globales de tout genre de commerce

⁽¹⁾ Included in group totals may be figures for classifications which cannot be shown separately without disclosing individual operations.

(2) Not all establishments gave full particulars of operating expenses and oven some establishments reporting rent failed to give amount of other expenses. Thus the totals in this section do not agree with those in Table 1A, nor do they necessarily include figures for all establishments in leased premises.

(2) Reported salaries of proprietors should only be used as a basis for computing the total compensation of proprietors in any kind of business when the number of reporting establishments is relatively large and the number of proprietors receiving a statod salary forms a substantial proportion of the total number of proprietors. Similar precautions should be taken in computing total expenses for any kind of business.

⁽¹⁾ Dans les totaux de groupe se trouvent parfois des chiffres dont la classification ne peut être montrée afin de ne pas dévoiler des opérations individuelles.

(2) Tous les établissements n'out pas fourni les détails complets des frais d'exploitation et même quelques établissements afsant rapport pour loyer ont onis la somme des dépenses diverses, ce qui fait que les totaux de ce tubleau ne correspondent pas avec ceux du tableau 1A, et n'incluent pas nécessairement les chiffres pour tous établissements pris à buil.

(3) Les salaires des propriétaires, tels que rapportés, doivent servir soulement comme base au celleul de la comp resation totale des propriétaires dans un commerce quelconque quand le nombre d'établissements est relativement élevé et que le nombre de propriétaires recevant un salaires spécifis forme une proportion substantielle du nombre total de propriétaires. Il faut prendre des précautions semblables en calculant les dépenses globales de tout genre de commerce.

^(!) Included in group totals may be figures for classifications which cannot be shown secarately without disclosing individual operations.

(?) Not all establishments gave full particulars of operating expenses and even some establishments reporting rent failed to give amount of other expenses. Thus the totals in this section do not agree with those in Table 10, nor do they necessarily include figures for all establishments in leased premises.

(?) Reported salaries of proprietors should only be used as a basis for computing the total compensation of proprietors in any kind of business when the number of reporting establishments is relatively large and the number of proprietors receiving a stated salary forms a substantial proportion of the total number of proprietors. Similar precautions should be taken in computing total expenses for any kind of business.

⁽¹⁾ Dans les totaux de groupe se trouvent parfois des chiffres dont la classification ne peut être montrée afin de ne pas dévoiler des opérations individuelles.

^(*) Tous les établissements n'ont pas fourni les détails complets des frais d'exploitation et même quelques établissements faisant rapport pour loyer ont emis la somme des dépenses diverses, ce qui fait que les totaux de ce tableau ne correspondent pas avec ceux du tableau 10, et n'incluent pas nécessairement les chiffres pour tous établissements pris à bail.

⁽³⁾ Les salaires des propriétaires, tels que rapportés, doivent servir seulement comme base au calcul de la compensation totale des propriétaires dans un commerce quelconque quand le nombre d'établissements est relativement élevé et que le nombre de propriétaires recevant un salaire spécifé forme une proportion abstantielle du nombre total de propriétaires. Il faut prendre des précautions semblables en calculant les dépenses globales de tout genre de commerce.

WHOLESALE TRADE IN CANADA, 1930

INTRODUCTION

This section presents statistics of wholesale trade in Canada for the year 1930. The information on which this report is based was secured in connection with the Census of Merchandising and Service Establishments. 1931. The wholesale field, for purposes of the Census, includes all establishments engaged in the purchase for resale, sale or distribution of goods on a wholesale basis. In this way it embraces all agencies which intervene in the sale of merchandise between the producer or manufacturer on the one hand and the retailer or wholesale buyer on the other. This division of the Census of Merchandising and Service Establishments thus relates to the operations of the many types of middlemen and wholesale distributors which have been developed to meet the changing methods of distribution.

METHOD OF TAKING THE CENSUS

The methods employed in securing the Census reports from merchandising establishments and in compiling the results have been outlined in some detail in Volumes I and X, so that only a brief reference need be given here.

The canvass of wholesale establishments was made largely through the mails on the basis of lists which had been prepared by census enumerators who had visited in June, 1931, all wholesale places of business and had recorded certain details, including the name and address, nature of business, approximate amount of trade handled, and whether the establishment formed part of a larger organization. When the enumerators' lists were received in the Bureau they were checked with various trade lists and directories and then appropriate schedules were mailed. For wholesale establishments engaged in handling food products, a form known as Wholesale Schedule No. 2 was sent, all other wholesale establishments received a general schedule. Practically all the census schedules were returned by mail but, for almost fifty per cent of the reports, some correspondence had to be undertaken either to secure the return of the schedule or to correct errors or omissions in the reports. It was also necessary to employ field workers in certain localities to secure reports which had not been forwarded by mail.

SCOPE OF THE CENSUS

As has already been mentioned, this Census embraced all wholesale places of business. In addition to what are popularly known as wholesale houses or wholesale merchants, the Census covers such wholesale establishments as chain store warehouses, bulk tank stations, brokers, commission merchants, manufacturers' sales branches, selling agents, assemblers of agricultural products, etc. A full description of the types of wholesale establishments included in the Census will be found later in this section.

For some purposes it would have been useful to consider as wholesale establishments only those firms engaged in selling to retailers. Unfortunately, it is impossible to classify trading establishments in such a simple manner. In the first place, even regular wholesale merchants do not sell only to retailers and, secondly, it is necessary to include in the wholesale field the many specialized types of establishments engaged in wholesale distribution. It was decided, therefore, to consider as wholesale establishments all firms or offices engaged (a) in the purchase and sale of commodities at wholesale; (b) in the wholesale distribution of commodities; and

(c) in the solicitation of, or arrangement for, orders for commodities at wholesale. The wholesale field thus includes all merchandising establishments with the exception of retail stores.

On account of the wide variety of wholesale establishments included in the wholesale field and the many stages of distribution through which some commodities pass on their way from producer to retailer, no direct comparison can be made of the volume of wholesale and retail trade. A considerable amount of trade is carried on between the specialized types of wholesalers, especially agents, brokers, commission houses and assemblers of farm products. Such sales are often duplicated in the sales of other wholesale establishments, especially wholesale merchants, exporters and chain store warehouses. Again, a considerable amount of wholesale trade consists of sales of equipment or supplies to industrial consumers. The value of sales of this character reported by wholesale firms was \$374,979,700 in 1930 but not all establishments were able to particularize such transactions. In addition, there is the value of export sales made through wholesale establishments which would have no counterpart in retail trade. On the other hand, not all the merchandise sold through retail stores is handled by wholesale establishments. Some retail firms buy directly from producers or manufacturers in Canada or do their own importing. Such transactions would not be included in the business of Canadian wholesalers and would thus represent an addition to the amount of wholesale business reported.

CENSUS BASED ON ESTABLISHMENTS

A separate return was required for each wholesale establishment in Canada which was operated during the year 1930 even though the establishment was a branch or sales office of a larger organization. The establishment reported might have been a regular wholesale house, a warehouse, an office or, perhaps, only part of an office in the cases where two or more concerns occupied the same premises. However, if a place of business was maintained for transacting wholesale business, it was considered as a wholesale establishment.

The collection of statistics of wholesale trade on the basis of establishments enables duta to be compiled by geographic location but it does not provide information on the destination of sales. For instance, a wholesale firm may have only one establishment located, say, in Toronto, but this concern, through its travellers or by mail, does business in all parts of Canada. However, as only one establishment is maintained the entire sales of this concern would be attributed to Toronto.

The inclusion of all types of wholesale establishments in the Census has meant that reports were received from many wholesale concerns which did not carry stocks of goods or take any title to the merchandise for which they secured orders. In the east of such offices the orders would be sent to the manufacturer, producer or assembler, and the goods would be shipped directly to the purchaser.

Some establishments carry on both a wholesale and retail business. If 51 per cent or more of the business was done on a wholesale basis, such concerns were classed as wholesale establishments, but if 51 per cent or more of the sales was made at retail prices the store was included in the retail census

FUNCTIONS OF WHOLESALE ESTABLISHMENTS

The functions performed by wholesale establishments differ greatly for different types of wholesalers. It is not, therefore, possible to list any one set of functions for all types. In the normal three-party system of distribution—manufacturer or producer, wholesaler, retailer—the wholesale merchant formed an integral part of the system. With changes in the distributive system the work may be sub-divided among more specialized types of wholesalers or assumed by the manufacturer or retailer. Nevertheless, the basic functions of wholesale distribution must be carried on regardless of the agency which may be used. These functions may be grouped under the following heads:

- (a) Selling
- (b) Assembling.
- (c) Transportation.
- (d) Warehousing
- (e) Financing.

The most essential selling operation performed by the wholesaler is that of unking and maintaining effective contact between buyers and sellers, in the case of the regular wholesale merchant between manufacturer and assembler on the one hand and the retuler on the other. The task is essentially that of securing information about prospective markets and customers and of telling customers about the kinds, the quantities, the qualities and the prices of goods which are being offered for sale. In the case of well-established products the amount of effort expended on securing or providing information may be small, but one of the cluef features of the operations of wholesale establishments is the introduction of new lines of merchendise on which considerable sales effort has to be expended. Wholesalers also co-operate with manufacturers in special sales drives and the expansion of markets. The maintenance of effective contact between layer and seller generally requires that travellers for the wholesale establishment should regularly visit the retailers in their territory and that buyers should keep in close touch with the suppliers of merchandise.

The second set of functions performed by the wholesaler comes under the head of assembling and involves, in some cases, the sorting, grading, packing and preparation of goods for sale. Although the mereasing sales of pre-packaged and processed goods have resulted in the processes just mentioned forming a part of the production of many articles, there are still many products which the wholesaler must assemble. Imported products, such as tea, are often sorted and re-packed by the wholesaler, while in many centres local produce is purchased in bulk and then sorted and graded before sale to the retailer. Even when such processes are not necessary the wholesaler must buy in fairly large quantities and sort out the items to fill the individual orders of retailers. To perform this function satisfactorily, the wholesaler must buy in advance of sales and maintain full stocks of lines likely to be in demand.

The third class of services performed by the wholesaler is concerned with the transportation of the commodity from the producer to the ret ider. The wholesaler must first arrange for the transporation of merchandise to his own warehouse and then for the delivery to his customers. Deliveries to local retailers are generally made by the wholesaler, while shipments to distant customers are made by transportation companies.

The warehousing services performed by wholesalers are closely related to the assembling function already discussed. Warehouse space must be provided and protection afforded to merchandise between the time of purchase and sale.

Lastly, the wholesaler must undertake a considerable part of the financing of finished goods and assume the risks of obsolescence of stock, wrong selections, overstocks and price changes. These risks may be grouped under the head of "holding costs". The actual extent of the credit furnished by wholesalers in 1930 was not ascertained but, according to the results of the Ccusus of Trading Establishments, 1924, the value of the accounts due to wholesale merchants was, roughly, equal to the value of inventories carried. The wholesaler, of course, may hold stocks which are financed by a manufacturer or by loans from a bank.

The extent to which the functions enumerated above are performed varies with the kind of business, the type of distributor, the trade served, and the sources of supply. A survey of the development of wholesale trade in Canada shows that the system of distribution is being continually modified and adapted to meet the changes in production and retail distribution. The development of the chain store has brought with it a new type of wholesale establishment, the chain store warehouse, and has necessitated new forms of wholesaling to enable independent stores to meet the competition of the chain stores. The development of voluntary chains serviced by wholesale merchants and the addition of cash-and-earry departments to regular wholesale houses may be largely attributed to the rise of the chain store.

The growing importance of large-scale retailers, and the tendency for manufacturers in many lines to establish closer contacts with the retail trade, have also affected greatly the structure of wholesale distributions. Manufacturers' sales branches are playing an increasingly important role in wholesale trade. There were 1,428 manufacturers' sales branches covered by the Census, and the business handled by such offices formed almost 17 per cent of the total value of wholesale sales. Many manufacturers' sales branches carry no stocks and serve merely as headquarters for district salesmen. Others, however, earry considerable stocks and service the retailers in their

territory, in this way performing practically all the functions of wholesale merchants. The necessity of assembling supplies from many producers to meet the demands of wholesalers and large-scale retailers has created a field of operation for brokers and commission merchants particularly in the food trades. Practically all types of wholesalers have been developed to meet some definite need in the field of distribution. They will continue to operate as long as they constitute the most effective agency for performing the functions they have assumed.

METHODS OF CLASSIFICATION

Wholesale establishments, for the purposes of the Census, have been classified by type of establishment and kind of business. Establishments are classified by type according to the nature of the trading carried on or services performed, and according to kind of business on the basis of the principal line or lines of merchandise handled.

Types of establishments. The wholesale field has been divided into two main divisions according to type of establishment. The first has been called "wholesalers proper" and the second "other wholesale establishments". "Wholesalers proper" designates those establishments which carry on a regular wholesale business. The most important types in this division are the wholesale merchants and importers. These generally perform the complete functions of wholesalers, such as extending credit, buying in bulk and selling in broken lots, providing warehousing and delivery facilities, soliciting orders through salesmen, furnishing market information, etc. Included with wholesalers proper are a few types of establishments which perform only some of the functions of the wholesale merchants. These are the cash-and-carry wholesalers, drop shippers, mail order wholesalers, and wagon distributors. But those limited-function wholesalers play a very minor role in the wholesale trade of Canada. "Other wholesale establishments" are sub-divided into eleven classes, based on the function performed or nature of trade served. The definitions of types of wholesale establishments are presented in the next section.

Owing to the fact that there is no standard nomenclature in the wholesale field, a term may have different meanings in different lines of trade. But, as it was necessary to have uniform classifications for the census, the most common usage of the terms has been accepted and applied, in some cases arbitrarily, to similar types of establishments throughout the wholesale field.

Definitions of Types of Wholesale Establishments

I. "Wholesalers Proper" are divided into three classes:-

- (a) Service wholesalers.—These are the wholesale houses which perform the full functions of jobbers or wholesalers as described in the previous section. In addition to wholesale merchants or jobbers, this group includes importers engaged chiefly in handling imported goods and exporters engaged in foreign trade. Those houses which are engaged chiefly in handling for export bulk commodities, such as grain and lumber, have been given a special classification, "export merchants", and appear under "other wholesale establishments."
- (b) Limited-function wholesalers perform some of the functions of wholesale merchants but do not provide the full scrvices of regular wholesalers. They also tend to operate with more restricted lines of merchandise than do wholesale merchants in the same trade. The cash-and-carry wholesaler buys and sells merchandise on his own account and carries warehouse stocks, but he extends no credit and does not make free deliveries. Drop shippers or desk jobbers usually have as a place of business only an office through which they buy and sell merchandise and arrange for deliveries of goods to be made directly from the producer or other source to the purchaser. Such establishments, therefore, undertake no physical handling of the goods they sell. Mail order wholesalers perform practically all the functions of wholesale merchants and are distinguished by the fact that they solicit business primarily by mail, often through the use of catalogues. The operations of wagon distributors consist mainly in purchasing small quantities of merchandise from large wholesale houses and then selling the goods directly to retailers from delivery wagons or trucks.
- (c) Supply and machinery distributors are considered as service wholesalers because they perform most of the functions of wholesale merchants, although their sales are made chiefly to industrial consumers or other users of heavy equipment and machinery.

- II. Bulk tank stations are the wholesale depots from which petroleum products, chiefly gasoline and oil, are distributed by tank wagon to retail service stations or other wholesale purchasers. The majority of the bulk tank stations are owned by companies engaged in refining, and part of the business of such bulk tank stations consists in supplying the company-owned service stations. In rural sections, a good deal of the trade of bulk tank stations is done with farmers and fishermen who purchase at wholesale prices.
- III. District sales offices are maintained by manufacturers to supervise sales territories and, particularly, to supervise the activities of the sales branches in their districts. Such district sales offices also handle orders and may perform some warehousing services.
- IV. General sales offices are maintained by manufacturers to supervise the activities both of the district sales offices and manufacturers' sales branches. In addition, large orders are likely to be put through the general sales office, and export business is commonly handled by such offices. As part of the business reported by general sales offices may have originated in the sales branches or district sales offices, there is likely to be a considerable amount of duplication in the value of sales attributed to the head offices.
- V. Manufacturers' sales branches are the wholesale selling offices maintained by manufacturers. The emphasis is chiefly on the securing of orders for the products manufactured by the parent company. While most sales branches do little more than solicit orders, there are a few lines of trade, particularly the electrical appliance and machinery, in which sales branches perform many of the functions of wholesale merchants, except that the products which they sell are restricted almost entirely to the goods supplied by the parent manufacturing company. Because the wholesale outlets of meat packers operate in the same manner as service wholesalers, they have been considered as such and are not, therefore, included with manufacturers' sales branches.
- VI. Export merchants are wholesale establishments engaged in exporting bulk commodities such as grain and lumber. They take title to the goods they sell and, therefore, resemble exporters, but they generally do not carry stocks, and they arrange for shipments to be made from the source of supply. In this respect, they resemble selling agents.
- VII. Agents and brokers are engaged primarily in arranging for the purchase or sale of commodities on account of others. Often they do not handle goods at all and their function is to find purchasers for the products of donestic or foreign producers or to find supplies for domestic or foreign wholesalers. Agents and brokers may act for one client or for many and may deal in one commodity or in many lines. They do not take title to the goods for which they find buyers or sellers and generally the goods are delivered by the producer direct to the wholesale buyer. The income of agents and brokers is secured from fees or commissions which are levied on the basis of the value or quantity of the goods for which orders are secured.

Auction companies are engaged in the wholesale distribution of commodities by auction sales. They do not take title to the goods they handle but collect a fee or commission for arranging the sales.

Brokers act as the representatives of either buyers or sellers. They negotiate the terms of the sale or purchase but do not take title to the goods or usually handle the invoices. They operate mainly in the grocery, other food products and farm products fields. The income of brokers is secured from fees or commissions based either on the quantity or value of merchandise entering into the transactions. Brokers are generally free to serve any client who may seek their services.

Commission merchants differ from brokers in that they are engaged in selling goods which are consigned to them on a commission basis. Generally commission merchants actually handle the merchandise and also the financial settlements that result from the sales. In addition to handling consignment stocks, they may also deal in commodities on their own account, in which case they are operating as wholesale merchants.

Export agents. Under this heading are shown the various types of commission houses specializing in selling to foreign countries. They operate in a similar manner to their counterparts in domestic trade.

Import agents. Under this heading are shown the various types of commission houses which are engaged in arranging for the sales of products from foreign countries in Canada. They operate in a similar manner to their counterparts in domestic trade.

Manufacturers' agents act as the sales representatives of manufacturing establishments with which they maintain continuous relations. Their activities are very similar to those of the regular salesmen of manufacturing establishments, but sometimes manufacturers' agents carry small stocks from which to meet occasional demands of wholesalers or retailers. Such agents generally represent two or more manufacturers whose products are ordinarily in non-competing though related lines.

Purchasing agents and resident buyers are engaged, as the terms suggest, in purchasing merchandise on behalf of their clients with whom they generally have well-established relationships. Such buyers are generally located in the larger wholesale centres where they may buy to the advantage of their principals, whose establishments are usually I cated at some distance from the principal markets.

Selling agents are wholesale establishments performing the selling functions for one or more manufacturing establishments. They differ from other agents in that they generally exercise more control over the marketing of the products and in that they often assume a considerable part of financial responsibility for the sales. Selling agents commonly handle the entire output of the firms they represent and have considerable freedom in determining the sales territory to be covered and the terms on which the products are marketed.

VIII. Assemblers and country buyers of farm products operate at local producing points or in the cities of the producing regions, and are engaged in purchasing or selling agricultural produce. In this group are included both private dealers and co-operative marketing associations of producers.

Assemblers of farm products, city buyers and country buyers are all engaged in purchasing or assembling farm products, including livestock, for shipment to livestock or produce markets. Assemblers generally operate independently on their own account, while city and country buyers often act on a salary or commission basis for their principals who are large wholesale houses in market centres.

Co-operative marketing associations are the local co-operative associations which sell on their own account. Those associations which sell through a co-operative sales agency have not been included.

Co-operative sales agencies are the central selling offices maintained by co-operative marketing associations to arrange for the orderly marketing of agricultural products. These co-operative sales agencies sell on the larger commodity or livestock markets or handle export sales.

Elevators (independent). This term is used for country elevators which make sales on their own account and are not merely performing storage functions.

Elevators (line). This term is used to designate the sales offices of line elevator companies. The sales shown for this typo of wholesale establishment do not represent the value of the shipments of grun made from the line elevators but the transactions completed at the central offices, which include not only the sale of grain bought outright either through the line elevators or in other ways, but also grain sales handled on a commission basis. The other details reported for line elevators likewise cover the operations of sales offices only.

Milk stations are collecting stations or depots located in milk producing regions and which re-sell to other milk distributors.

Packers and shippers are firms engaged in the packing and shipping of fruits and vegetables in their natural state.

IX. Chain store warehouses are the storage and distributing establishments for retail chain systems. The physical handling of goods is carried on much in the same manner as by wholesale merchants, but the financial features, other than the billing of goods, are absent. The chain store warehouses often have attached to them branch offices, from which accounting and general supervision of the retail chain stores within the district is carried on.

- X. Film exchanges occupy a unique position in the wholesale field. They are the agencies through which motion picture films are distributed to the exhibitors and through which the "rentals" for the films are collected. The "sales" reported by film exchanges consist almost entirely of the income received from the rental of films and represent only to a very small extent any outright sales of merchandise.
- XI. Distributing warehouses, other than chain store warehouses, are wholesale establishments engaged principally in storing and distributing goods, with little emphasis on the other functions of wholesale merchants. Distributing warehouses are chiefly found in the alcoholic beverages trade.

Kinds of Business.—Wholesale trade has been divided into twenty-five broad groups according to kinds of business. Within these broad groups are more than eighty major classifications which are further divided into more than three hundred particular kinds of business. Each census schedule was carefully examined and classified according to kind of business on the basis of the major commodity or principal line of merchandise handled or dealt in. While in some cases the details given by kind of business are indicative of the sales value of the commodities handled, for other trades, where the term is more inclusive or where the establishments handle commodities other than those indicated by the classification, no direct relationship will exist. While every wholesale schedule has been given an exact kind-of-business classification, the publication of full particulars for each classification is dependent on the number of firms engaged in the kind of business. When it is impossible to present full details without revealing the operations of individual establishments, the detailed kind-of-business classifications are combined into broader groups and the information is given for these only. For the province as a whole, where the number of returns is relatively large, it is possible to give much more detailed information than for the smaller localities or divisions where there are only a few establishments engaged in each line of trade.

In the tables which appear in this publication the classifications are given in abbreviated form. The full list of classifications and definitions for wholesale establishments is given below

Classification of Wholesale Establishments by Kinds of Business

(Based on the principal lines of merchandise handled)

I. Amusement, Sporting and Photographic Goods:

- Amusement and sporting goods (except cameras and motion-picture equipment and supplies)—
 - (a) Amusement and sporting goods (general line).
 - (b) Bicycles and supplies.
 - (c) Sporting goods (general line).
 - (d) Toys, novelties and fireworks.
 - (e) Other amusement and sporting goods (special lines not provided for above).
- Cameras and motion-picture equipment and supplies—
 - (a) Cameras and photographic supplies.
 - (b) Moving-picture apparatus.
 - (c) Moving-picture films.
 - (d) Talking-picture apparatus.

II. Automotive:

- Automobiles and other motor vehicles—
 - (a) Automobiles and other motor vehicles (general line).
 - (b) Automobiles (new and used).
 - (c) Trucks and tractors

Automotive equipment—

- (a) Automotive accessories.
- (b) Automotive equipment (general line, such as parts and accessories; garage equipment and supplies).
- (c) Automotive equipment (specialty lines).
- (d) Automotive equipment and radios (parts and accessories).

484 CENSUS OF MERCHANDISING AND SERVICE ESTABLISHMENTS, 1931

II. Automotive:-Concluded

- 5. Automobile parts (new and used)-
 - (a) Automobile parts (new).
 - (b) Automobile parts (used).
- 6. Tires and tubes.

III. Chemicals, Drugs and Allied Products:

- Chemicals (industrial)—
 - (a) Chemicals, industrial and refined (such as grain alcohol, wood alcohol, bulk cleaning powders, crude acids, coal-tar products and naval stores).
 - (b) Dyestuffs.
 - (c) Dyes, dry cleaning supplies, and allied products. (d) Explosives.
 - (e) Insecticides.
- 8. Drugs and drug sundries (general line).
- 9. Drugs and drug sundries (specialty)-
 - (a) Drugs.
 - (b) Drug sundries. (c) Patent medicines.
 - (d) Rubber goods (druggists').
 - (e) Sanitary supplies, insecticides, etc.
- 10. Alcoholic beverages-
- (a) Wines and spirits. (b) Other alcoholic beverages.
- 11. Paints, varnishes, lacquers and enamels.
- 12. Toilet articles and preparations-
 - (a) Toilet articles. (b) Toilet preparations.
- IV. Coal and Coke:
- 13. Coal and coke-
 - (a) Coal (general line).
 - (b) Coal anthracite.
 - (c) Coal, bituminous.
 - (d) Coal and coke.
- V. Dry Goods and Apparel:
 - 14 Clothing and furnishings (other than millinery and footwear)—

(e) Fuel (including briquets, peat and charcoal).

- (a) Clothing (general line).
- (b) Clothing and furnishings.
- (c) Clothing, men's and boys'
- (d) Clothing, women's and children's. (e) Clothing (secondhand)
- (f) Furnishings (general line).
- (g) Furnishings, men's and boys'.
- (h) Furnishings, women's and children's.
- (1) Furs and fur clothing.
- (j) Hats and caps.
- (k) Hosierv
- (l) Other clothing and furnishings (such as specialty houses for ties, shirts and sport wear).
- 15. Dry goods (general line).

V Dry Goods and Apparel:-Concluded

- 16. Dry goods (specialty, not elsewhere specified)-
 - (a) Knit goods.
 - (b) Other dry goods (specialty, such as blankets and other specialty lines not provided for).
- 17. Millinery and millinery supplies.
- 18 Notions-
 - (a) Buttons.
 - (b) Gloves.
 - (c) Laces and embroideries.
 - (d) Notions (general line).
 - (e) Tailors' trimmings and supplies.
- 19. Piece goods-
 - (a) Cotton goods.
 - (b) Linens.
 - (c) Piece goods (general line).
 - (d) Rayons.
 - (e) Silks and velvets.
 - (f) Woollens and worsteds.
- 20. Shoes and other footwear.

VI. Electrical:

- 21. Electrical goods (including appliances)-
 - (a) Electrical merchandise (general line).
 - (b) Electrical appliances (such as washing machines, toasters, stoves, percolators, and irons and ironers)
 - (c) Refrigerators (electric).
- 22. Electrical equipment and supplies-
 - (a) Batteries.
 - (b) Electrical equipment and supplies (general line).
 - (c) Motors and generators.
 - (d) Other electrical equipment and supplies (including wire and cables, etc.).
- 23. Radios and radio equipment.

VII. Farm Products (not elsewhere specified):

- 24. Cotton (including cotton linters and cottonseed).
 - 25. Flowers and nursery stock-
 - (a) Flowers and nursery stock (including florists' flowers).
 - (b) Secds, bulbs and nursery stocks.
 - 26. Grain-
 - (a) Oats.
 - (b) Rice.
 - (c) Wheat.
 - (d) Grain (general line).
 - (e) Other grain (such as rye, barley and corn).
 - 27. Hides, skins and furs--
 - (a) Furs (dressed).
 - (a) Furs (dressed)
 (b) Furs (raw).
 - (c) Hides and skins.

20939-32

VII. Farm Products (not elsewhere specified):-Concluded

- 28. Livestock-
 - (a) Horses.
 - (b) Cattle
 - (e) Hogs. (d) Livestock (general line).
- 29. Tobacco (leaf).
- 30. Wool and mohair.
- 31. Other farm products-
 - (a) Farm products (not elsewhere specified). (b) Feathers

VIII. Farm Supplies (except machinery and equipment):

- 32. Farm supplies (except feed and fertilizer)-
 - (a) Farm supplies (general line).
 - (b) Seeds. (c) Straw.
- 33. Feed-
- (a) Feed (mixed and other).
 - (b) Feed and fertilizer.
 - (c) Hay, grain and feed.
- 34. Fertilizer and fertilizer materials.

IX. Food Products (not elsewhere specified):

- 35. Confectionery and soft drinks-
 - (a) Confectionery and soft drinks (general line). (b) Confectionery.
 - (c) Soft drmks.
 - 36. Dairy products-
 - (a) Butter. (b) Butter and cheese.
 - - (c) Cheese.
 - (d) Dairy products (general line). (e) Ice cream
 - (f) Milk and cream.
 - 37. Dairy and poultry products.

 - 38. Poultry and poultry products-
 - (a) Eggs.
 - (b) Poultry.
 - (c) Poultry and poultry products (general line).
 - 39. Fish and sea foods (fresh and cured).
 - 40. Fruits and vegetables (fresh)-
 - (a) Fruits,
 - (b) Fruits and vegetables (general line).
 - (c) Produce (including vegetables, fruits, dairy products, fish, poultry, eggs, etc., with fruits and vegetables predominating). (d) Vegetables.
 - 41. Meats and meat products-
 - (a) Meats (cured).
 - (b) Ments (fresh).
 - (c) Meats and meat products (general line).
 - (d) Meats and provisions (including poultry, eggs, dairy products, lard, etc.).

X. Forest Products (except lumber):

- 42. Boxes, shooks and cooperage—
 - (a) Boxes and box shooks.
 - (b) Cooperage (such as barrels, casks and tubs).
- 43. Logs, railroad ties, piles, etc.-
 - (a) Firewood.
 - (b) Logs, piles and posts.
 - (e) Pulpwood. (d) Railroad ties.
- 44. Other forest products (including woodenware pulpwood, turning blocks, pine needles,

XI. Furniture and House Furnishings:

- 45. Furniture-
 - (a) Furniture (general line).
 - (b) Furniture (household).
 - (e) Furniture (office). (d) Other furniture (specialty lines).
- 46. House furnishings-
 - (a) Art goods.
 - (b) Brooms and brushes.
 - (c) China, glassware, crockery and pottery.
 - (d) Curtains and draperies. (e) Floor coverings.
 - (f) House furnishings (general line).

 - (g) Household supplies. (h) Lamps and lamp shades.

 - (1) Pictures and picture frames.
- 47. Musical instruments and sheet music-
- (a) Musical instruments, accessories and parts.
 - (b) Shect music.

XII. General Merchandise (establishments handling in substantial proportions three or more distinct and unrelated lines of merchandise).

XIII. Groceries and Food Specialties:

- 48. Grocerics (general line).
- 49. Food and grocery specialtics- .
 - (a) Bakery products.
 - (b) Biscuits and crackers.
 - (c) Canned fruits and vegetables.
 - (d) Canned goods (general line).
 - (e) Canned sea food.
 - (f) Cereals.
 - (g) Coffee, tea, spices and cocoa.
 - (h) Extracts and spices.
 - (i) Flour.
 - (i) Flour and feed
 - (k) Fruits and vegetables (dried).
 - (I) Sugar.
- (m) Other food and grocery specialties (such as salad dressings, pickles jams and iellies)

XIV. Hardware:

- 50. Hardware (general line).
- 51. Hardware (specialty)-(a) Builders' hardware.
 - (b) Heavy hardware.

 - (c) Shelf hardware. (d) Tools and cutlery.
 - (e) Other hardware (specialty lines such as door hardware, ornamental feneing, sign plates and marine hardware).

 - (f) Hardware and radio.
 - (g) Hardware and plumbing. (h) Hardware and lines other than specified.

XV. Iron and Steel Scrap and Other Waste Materials:

- 52. Iron and steel scrap.
- 53. Junk and scrap.
- 54. Other waste materials-
 - (a) Bags, bagging, etc.
 - (b) Bottles, etc.
 - (c) Paper (waste).
 - (d) Rags.
 - (e) Secondhand goods (general line).

XVI. Jewellery and Optical Goods:

- Jewellery—
 - (a) Clocks and watches.
 - (b) Diamonds and other precious stones.
 - (c) Jewellery (general line).
 - (d) Silverware.
 - (e) Other jewellery (such as semi-precious stones, mountings, ornaments and novelty jewellery).
- 56. Optical goods.

XVII. Leather and Leather Goods (except gloves and shoes):

- 57. Leather and leather goods (general line).
- 58. Leather and leather belting-
 - (a) Belting (leather).
 - (b) Leather (general line).
 - (c) Shoe findings.
- 59. Luggage and leather goods-
 - (a) Leather goods (not elsewhere specified).
 - (b) Luggage.

XVIII. Lumber and Building Materials (other than metal):

- 60. Construction and building materials (other than metal and wood)-
 - (a) Asbestos products.
 - (b) Brick and tile.
 - (e) Building materials (general line).
 - (d) Building stone.
 - (e) Cement. (f) Glass.
 - (g) Granite and marble.

XVIII. Lumber and Building Materials (other than metal):—Concluded.

- 60. Construction and building materials other than metal and wood)—Concluded.
 - (h) Lime, plaster, etc.
 - (i) Paint, glass and wall paper.
 - (j) Roofing materials (non-metallic).
 - (k) Sand, gravel and crushed stone.
 - (1) Other building materials (such as insulating and wall board materials, cork slabs and art stone).
- 61. Lumber and mill work-
 - (a) Lumber. (b) Lumber and mill work.
 - (c) Mill work.

XIX. Machinery, Equipment and Supplies (except electrical):

- 62. Commercial equipment and supplies -
 - (a) Butchers' equipment and supplies.
 - (b) Filling station equipment and supplies.
 - (c) Hotel and restaurant equipment and supplies.
 - (d) Office equipment and supplies (other than furniture).
 - (e) Soda fountain equipment and supplies.
 - (f) Store equipment and supplies (general line).
 - (g) Other commercial equipment and supplies.
- 63. Construction equipment and supplies-
 - (a) Builders' supplies.
 - (b) Construction machinery (such as concrete mixers, sanding and polishing machines, excavating shovels and graders).
 - (c) Construction machinery, equipment and supplies (general line).
 - (d) Road machinery and equipment.
- 64. Farm machinery and equipment-
 - (a) Dairy equipment.
 - (b) Farm implements (such as harrows, cultivators and walking ploughs).
 - (c) Farm machinery and equipment (such as harvesters, binders, hay hoists, stationary engines, pump jacks and pumps, gang ploughs, and corn listers).
- 65. Manufacturing, lumbering, mining and drilling machinery, equipment and supplies-
 - (a) Bakers' equipment and supplies.
 - (b) Bottles and bottling equipment.
 - (c) Canning machinery.
 - (d) Conveyer and hoisting machinery.
 - (e) Drilling machinery.
 - (f) Foundry equipment and supplies.
 - (g) Jewellers' equipment and supplies.
 - (h) Lumbering machinery, equipment and supplies.
 - (i) Machine tools.
 - (i) Mechanical goods (such as belting, packing, hose, gaskets and recoil pads).
 - (k) Mill and mine supplies (general line).
 - (1) Mining machinery, equipment and supplies.
 - (m) Oil well machinery, equipment and supplies.
 - (n) Power engines.
 - (o) Power house equipment (such as boilers, condensers, injectors, filters and stokers).
 - (p) Printers' and lithographers' supplies.

 - (q) Pumps, pump parts and supplies (r) Shoe machinery and supplies.
 - (s) Textile machinery and equipment.
 - (t) Welding equipment.
 - (u) Other industrial machinery, equipment and supplies (including secondhand machinery).

490 CENSUS OF MERCHANDISING AND SERVICE ESTABLISHMENTS, 1931

XIX. Machinery, Equipment and Supplies (except electrical):—Concluded

- 66. Professional equipment and supplies—
 - (a) Artists' supplies.
 - (b) Church equipment and supplies.
 - (e) Dentists' supplies and equipment.(d) Pharmacists' supplies.
 - (e) School equipment and supplies.
 - (f) Scientific and laboratory equipment and supplies.(g) Surgical, medical and hospital equipment and supplies.
- 67. Service equipment and supplies—
- (a) Barber and beauty parlour equipment and supplies.
 - (b) Dry cleaners' equipment and supplies.
 - (c) Fire protection equipment.(d) Janutors' equipment and supplies.
 - (e) Laundry equipment and supplies.
 - (f) Plumbers' equipment and supplies.
 - (g) Service equipment and supplies (general line).
 - (h) Shoe repairers' equipment and supplies.
 - (i) Undertakers' supplies.(i) Upholsterers' supplies.
 - (k) Warehouse equipment and supplies.
 - (1) Other service equipment (specialty lines).
- 68. Transportation equipment and supplies-
 - (a) Aircraft and aeronautical equipment.
 - (b) Railroad equipment and supplies.
 - (c) Marine equipment and supplies.
 - (d) Other transportation equipment and supplies (such as tramways, acrial hoists, motor boats (commercial), and compressed air tubes).

XX. Metals and Metal Work:

- 69. Iron and steel (except scrap)—
 - (a) Castings (metal).(b) Iron and steel (except scrap).
 - (e) Iron and steel products (not elsewhere specified).
- 70. Metals and metal work other than iron and steel-
- (a) Brass and brass products.
 - (b) Copper.
 - (c) Metals (general line).
 - (d) Sheet metal products.
 (e) Tin.
 - (f) Other metals and metal work (such as nickel, bronze, aluminium and alloying materials).

XXI. Paper and Paper Products:

- 71. Paper and paper products (general line).
- 72. Paper and paper products (specialty, not elsewhere specified)—
 - (a) Paper.
 - (b) Wrapping paper and paper bags.
 - (e) Other paper products (such as novelties papier mache, paper napkins, mulch papers, calendars and art goods).
- 73. Stationery and stationery supplies.
- 74. Wall paper.

XXII. Petroleum and Petroleum Products:

- 75. Petroleum and petroleum products-
 - (a) Fuel oil.
 - (b) Gasoline and oil.
 - (c) Gasoline and naphthas.
 - (d) Lubricating oils and greases.
 - (e) Petroleum and petroleum products (general line).
 - (f) Other petroleum and petroleum products (such as kerosene, cleaning liquids, road preparations, bitumastic paints, and asphalts).

XXIII. Plumbing and Heating Equipment and Supplies:

- 76. Plumbing equipment and supplies-
 - (a) Pipes, valves and fittings.
 - (b) Plumbing and mill supplies.
 - (c) Plumbing and heating equipment and supplies (general line).
 - (d) Refrigerators (gas).(e) Other plumbing and heating equipment and supplies (including ventilating equipment and supplies).
- 77. Heating equipment and supplies--
 - (a) Furnaces.
 - (b) Heating equipment (general line).
 - (c) Oil burners.
 - (d) Stoves and ranges.

XXIV. Tobacco and Tobacco Products (except leaf):

- 78. Tobacco products (general line, except leaf)—
 - (a) Cigars.
 - (b) Cigars, eigarettes and tobacco.
 - (c) Tobacco.
 - (d) Tobacco and confectionery.

XXV. All Other:

- 79. Books, periodicals and newspapers—
 - (a) Books and periodicals.
 - (b) Newspapers and magazines.
- 80. Oils, greases, soaps and waxes-
 - (a) Animal oils (including grease and tallow).
 - (b) Essential oils.
 - (c) Soaps.
 - (d) Vegetable oils (cottonseed, linseed, etc.).
 - (e) Waxes, polishes, etc.
- 81. Rubber goods (general line, such as footwear, mechanical goods, druggists' sundries, tires, tubes and accessories).
- 82. Textiles and textile materials (other than dry goods)-
 - (a) Bags and bagging.
 - (b) Cordage and twine.
 - (c) Textiles and textile materials, other than dry goods (general line).
 - (d) Yarn.
 - (e) Other textiles (exclusive of dry goods, not elsewhere specified).

XXV. All Other: -- Concluded

- 83 Miscellaneous kinds of business-
 - (a) Advertising goods (such as signs, calendars, booklets, cloth banners, celluloid and metal novelties).
 - (b) Baskets.
 - (1) Flour, feed and coal.
 - (d) Ice
 - (e) Novelties
 - (f) Rubber (crude).
 - (g) Smokers' supplies.
 - (h) Miscellaneous kinds of business (not elsewhere specified).

EXPLANATION OF TERMS

Number of employees.—The number of employees shown is the number of full-time employees on the payrolls of the establishments reporting. Generally, the average number of employees for the year was reported, but, in certain cases, the number of employees on the payroll on the day the report was furnished was given. The term "employees" embraces all persons, other than proprietors or firm members, who were in receipt of salaries, wages or commissions from the reporting establishments. It includes salesmen, executives and all other hired help employed on a full-time basis.

Salaries and wages.—Under this heading are shown the amounts paid to salaried employees and wage earners during the year. The income of proprietors and firm members is not reported here.

Proprietors and firm members.—This term was intended to cover all owners of unincorporated establishments who devoted all, or practically all, of their time to the conduct of the business reported. The census schedule called for the reporting of proprietors and firm members under two headings (a) proprietors and firm members not receiving a stated salary or commission; and (b) proprietors and firm members receiving a stated salary. In the latter case, the amount of salary and/or commission received during the year was also to be reported. Unfortunately, the latter item was often improperly construed and the gross income for the business or some other erroneous amount was reported. Nevertheless, the information, where it appeared reasonably correct, has been tabulated and appears in the tables. It is thought that, if the figures for proprietors' salaries are carefully analysed, they may prove valuable guides to the net incomes of members of this class.

All other expenses.—Under this heading are included all expense items other than salaries and wages. On the census schedule there were separate headings for rent, expenses of salesmen and interest paid for money borrowed for operating charges. For this report, however, these items have been included with other expenses and so appear in the tables.

Although the information furnished by each wholesale establishment for payroll and rent was generally complete, many firms were unable to furnish, as accurately, figures for other operating expenses. The lack of uniformity in the accounting practices of trading establishments also tends to make difficult the uniform interpretation of questions regarding expenses. In spite of the instructions given for the reporting of "all other expenses", it is likely that considerable divergence would be found in the nature of the items included under this heading by reporting establishments. Nevertheless, it is believed that for those kinds of business for which a relatively large sample is available the statistics for operating expenses indicate fairly accurately the costs of doing business in the wholesale field.

Net sales are derived by deducting from gross sales the value of goods returned by, and allowances made to customers in the case of those establishments which actually handle the financial transactions. In other cases, the net sales represent the value of orders handled during the year.

Stock on hand.—This item covers the cost or replacement value of merchandise on hand for sale December 31, 1930, or nearest inventory date. The relationship between the figures for stocks on hand and net sales does not indicate the rate of stock turn for two reasons. First, the sales and stocks are not valued in the same manner. The former represents the final selling prices received and the latter the cost of the goods. Second, to compute the rate of stock turn accurately it would be necessary to know the average value of stocks carried throughout the year and not merely the value of merchandise on hand at the end of the business year which may not be representative of the ent re period.

Credit sales cover all sales not made strictly for eash. All establishments did not report the extent of their credit sales or whether they sold entirely for eash. The percentages of credit sales to total sales shown in the tables are based on the replies of only those establishments which reported as to their credit business.

Sales to industrial consumers.—These are sales made by wholesale establishments to industrial firms either as raw materials or supplies and equipment. Again, all firms did not report this information so that the value of sales shown may not represent the total amount of such transactions.

Capital invested is the value of capital (cash, buildings, goods, etc.) invested in the whole-sale trade. It includes the value of owned property and stocks on hand as well as other capital invested.

Sales by commodities.—In addition to supplying figures for the total net sales, each wholesale firm was asked to furnish a breakdown of sales by major commodity lines and, if possible, by detailed items in each major class. While every firm was not able to give a detailed report of sales by commodities, in most trades a very large proportion of the sales was reported by major commodity lines. On this basis, it is possible to show the proportion of the total wholesale trade which is made up of sales of each major commodity group—such as groceries, hardware, drugs, etc. It is also possible to determine the extent to which commodities are handled by more than one trade as, for example, cigars, cigarettes and tobacco by the drug, grocery and tobacco trades, as well as others.

DESCRIPTION OF DOMINION TABLES

STANDARD SUMMARY OF WHOLESALE FACTS

This table presents the salient features of wholesale trade in Canada and is comparable with the Standard Summary of Retail Facts shown in the various reports on retail trade for the Census of Merchandising and Service Establishments.

PRINCIPAL STATISTICS OF WHOLESALE TRADE, BY PROVINCES

This table presents a summary of wholesale trade for the Dominion as a whole and for each of the nine provinces. The table is divided into two sections. The first presents data for the entire wholesale trade, while the second is restricted to wholesalers proper.

PRINCIPAL STATISTICS OF WHOLESALE TRADE, BY CITIES

Summary figures for wholesale trade as a whole in each city of 20,000 population or over are shown. The table shows the number of establishments, employment and wage facts, net sales, and value of stocks on hand at the end of the year. Number of establishments and value of sales for wholesalers proper are also given.

TABLE 1.*—SUMMARY OF WHOLESALE TRADE

Table 1A presents the summary figures for the wholesale trade in each of the 25 major kind-of-business classifications for all types of establishments combined. It shows the number of establishments, proprietors not receiving a fixed salary, proprietors receiving a stated salary and the amount received, male and female employees, salaries and wages, stocks, net sales, proportion of credit sales, sales to industrial consumers, and capital. Table 1B gives similar information for wholesalers proper.

^{*}Tables similar to those marked with an asterisk appear in each of the provincial sections.

494 CENSUS OF MERCHANDISING AND SERVICE ESTABLISHMENTS, 1931

TABLE 2.*—WHOLESALE TRADE BY TYPES OF ESTABLISHMENTS

This table gives the salient figures for wholesale trade by types. It includes both wholesalers proper and other wholesale establishments classified by types.

Table 3.*-Wholesalers Proper, by Kinds of Business

Table 3 is restricted to wholesalers proper alone and gives figures for the detailed kind-ofbusiness classifications.

Table 4.*—Wholesalers Proper, Operating Expenses, by Kinds of Business

This table gives the operating expense figures for all wholesalers proper reporting such information. Data are given for each major classification and sub-group and then for selected kinds of business. The expenses are shown under the headings of salaries and wages of employees and total expenses including these salaries and wages.

Table 5.*—Wholesale Trade, by Kinds of Business

This table gives the principal statistics for all wholesale establishments, including wholesalers proper, by kinds of business.

TABLE 6.*-Types of Establishments by Kinds of Business

Table 6 shows the number of establishments and net sales for types of wholesale establishments classified by kind-of-business groups.

Table 7.*—Operating Expenses, by Types and Kinds of Business

This table gives the operating expenses for other wholesale establishments classified by types of establishments and kinds of business.

TABLE 8. -- FORMS OF ORGANIZATION

Table SA presents the principal statistics for the wholesale trade classified according to the form of organization, whether individual proprietorships, partnerships, corporations or cooperative associations. Table 8B presents the same information for wholesalers proper.

Table 9 '—Retail Sales by Wholesale Establishments and Wholesale Sales by Retail Merchandisc Establishments

In Table 9, the retail business of wholesale establishments and the wholesale business of retail merchandise stores are presented in the same table to show the extent to which these two fields of trade overlap. The greater part of this overlapping in both the retail and wholesale fields tends to occur in smilar kinds of business. The second part of this table gives summary figures by provinces.

TABLES 10 AND 11.*—MULTIPLE ORGANIZATIONS

Table 10 shows the number of marketing units and net sales for establishments under the same ownership for wholesalers proper, classified by kinds of business. Table 11 presents similar information for other wholesale establishments. It is thus possible to determine the number of establishments operated as single businesses and the amount of sales handled by such independent establishments. Similarly, the same information can be secured for the establishments which are owned by companies operating 2 establishments, 3 to 5, 6 to 25, and over 25 units. As firms may operate units in more than one province or in more than one kind of business, or even in more than one field, the number of establishments shown under a particular heading may not agree with the number given in the heading.

^{*}Libles similar to those marked with an asterisk appear in each of the provincial sections.

TABLES 12 AND 13.*—SALES BY SIZE OF BUSINESS

In Table 12, wholes ders proper have been grouped according to amount of net sales for major kind-of-business groups. In Table 13, other wholesale establishments have been classified in a similar manner. These tables make it possible to determine the amount of business in each trade which is handled by establishments with different sules v lume.

Tables 14 and 15.—Number of Employees by Economic Divisions and Size of Business

These tables show the distribution of employees by size of business for Canada as a whole and also for each economic division. Table 14 gives information for wholesalers proper only at d Table 15 gives similar data for other wholesale establishments.

TABLE 16.—CONTINUITY OF OWNERSHIP

This table classifies wholesale establishments reporting date of ownership according to the period under the same ownership. This is not the same as the expectancy of business life as the number of establishments which may have commenced operations in any year is not known. This table is divided into two sections. The first presents data for the entire wholesale trade, while the second is restricted to wholesalers proper.

TABLES 17 AND 18.*—SALES BY COMMODITIES

Figures for commodity sales are based on the replies of wholesale firms submitting an analysis of their sales by commodities. Each firm was asked to furnish a breakdown of its sales during the year by major commodity groups and, if possible, by detailed commodity lines. Not all establishments were able to furnish information for sales by commodities but in most trades a large proportion of the total sales was reported by major commodity groups. A considerable number of wholesale firms was also able to give detailed commodity sales.

Table 17 shows the extent of the commodity coverage for the wholesale trade and wholesalers proper by each of the major kind-of-business classifications. The commodity coverage is the extent to which total net sales have been reported by commodity lines. As every wholesale establishment did not report sales by commodities, the total sales analysed by commodities are g nerally less than the total net sales for the trade. For some kinds of business, however, the entire sales have been reported by commodities—in such cases the commodity coverage is 100 per cent. As commodity sales are shown in dollar values, it is suggested that in making use of the figures for any particular commodity the reader should note the extent of the commodity coverage for those trades through which the commodity is chiefly distributed.

While commodity sales figures for wholesale establishments assist materially in determining the channels through which commodities move from producer to consumer and also the volume of sales of particular commodities, they do not necessarily give a complete picture of the first stages of distribution. In the first place, a considerable part of production moves directly from producer to retailer, consumer or industrial user without use being made of wholesale establishments. Secondly, there is a considerable amount of direct importations not handled by wholesale establishments. Thirdly, there will be a duplication in sales figures wherever wholesale firms sell to other wholesalers for re-sale. Such sales are commonly made by agents and brokers but manufacturers' sales branches, importers and other types of wholesalers also transact business with other wholesale establishments. Finally, export sales made by wholesale firms represent goods which are not distributed within Canada. All of these factors enter into the statistics of wholesale trade and make it extremely difficult to measure accurately the value of goods distributed within Canada.

Table 18 shows the value of sales reported by commodities for each of the major commodity classifications. At the beginning of the table are shown the total net sales for all wholesale establishments in Canada. Under this item is shown the value of sales not reported by commodities. These sales are subtracted from the total sales, leaving a remainder which is known as "reported commodity sales". The total reported commodity sales are then shown for wholesalers proper and other wholesalers. Following this, the commodities are shown in alphabetical order.

For each commodity are shown: (1) the total sales reported; (2) the sales reported by wholesalers proper and by other wholesalers; (3) the sales reported by each trade; (4) the types of establishments in each trade group handling the particular commodity.

^{*}Tables similar to those marked with an asterisk appear in each of the provincial sections.

ANALYSIS OF RESULTS

Extent of Wholesale Trade

There were 13,140 establishments classified as wholesale establishments for the Census of Merchandising and Service Establishments. The net sales of these concerns during the year 1930 amounted to \$3,325,210,300 and the value of capital invested in the wholesale trade, to \$759,439,500, of which \$297,221,100 was the value of stocks on hand at the end of the year. The number of persons engaged in wholesale trade during 1930 was 96,737, of which 90,564 were classed as employees and 6,173 as proprietors or firm members. The male employees numbered 75,364 and the female, 15,200. The total wage bill of employees amounted to \$146,346,600 for the year.

Wholesale Trade, by Types of Establishments

The total sales of \$3,325,210,300 shown for all wholesale establishments during the year 1930 are made up of sales of \$1,111,319,200 reported by wholesalers proper and \$2,213,891,100 by other wholesalers. The total wholesale trade is thus divided 33.42 per cent for wholesalers proper and 66.58 per cent for other wholesalers. These figures, of course, include the various duplications which have been pointed out earlier in this report.

Although wholesalers proper had only one-third of the business transacted they employed more than half the number of persons engaged in wholesale trade and paid out more than half the wage bill. This tends to show that, on the whole, wholesalers proper were performing more services than other wholesale establishments.

The most important type of wholesale distribution is the wholesale merehant both in number and amount of business handled. There were 4,031 wholesale merchants with sales of \$887,-878,600 or 26.70 per cent of the total wholesale trade. Next in importance from volume of business handled were the manufacturers' sales branches, which numbered 1,428 and handled orders to the value of \$556,530,300 or 16.74 per cent of the total sales. District and general sales offices, which may be grouped with manufacturers' sales branches, numbered 118 and did a business of \$198,379,400 or 5.96 per cent of the total.

The second group in number of establishments was the bulk tank stations with 3,602 outlets and sales of \$184,851,800 or 5.56 per cent of the total wholesale business. Chain store warehouses which numbered only 79 did a business of \$161,912,300 or 4.87 per cent of the total.

In the field of agricultural marketing, co-operative marketing associations and sales agencies are important. The sales of these two types amounted to \$216,315,900 or 6.51 per cent of the total trade. Line elevators (sales offices) did a business of \$125,716,900 or 3.78 per cent of the total through 38 offices. Other assemblers and country buyers of agricultural products numbered 634 and had sales or purchases amounting to approximately 1 per cent of the total wholesale trade.

The specialized dealers in foreign trade are represented by importers, exporters and export merchants operating on their own account and by import and export agents. The 809 importers are the most important group with sales of \$164,461,800 or 4.95 per cent of the total wholesale trade. Sales of export merchants, amounting to \$143,389,300 were 4.31 per cent of the total and those of exporters were \$36,220,600 or 1.09 per cent. Export agents, as a group, had sales amounting to almost 2 per cent of the total wholesale trade and import agents had 3 per cent. The figures for import and export dealers do not represent the entire volume of foreign trade but merely represent the value of business handled by specialized dealers.

In the group, agents and brokers, the 825 manufacturers' agents are the most important type with sales of \$127,457,900 or 3.83 per cent of the total wholesale trade. Sales of commission merchants amounted to \$101,311,800 or 3.05 per cent of the total. Brokers, except those dealing in grain, handled orders to the value of \$67,250,700 or 2.02 per cent of the total. and cash grain brokers, \$62,860,500 or 1.89 per cent.

There were 85 supply and machinery distributors with sales of \$15,521,900 or 0.47 per cent of the total sales. Limited-function wholesalers were not important wholesale distributors. Drop shippers, numbering 42, had sales of \$6,454,700. Film exchanges, numbering 63, handled business amounting to \$9,808,500 and sales of \$12,888,100 were reported for 137 distributing warehouses.

Wholesale Trade, by Kinds of Business

The analysis of wholesale trade by kind of business has been made for all types of wholesale establishments and also for wholesalers proper. Taking wholesale trade as a whole, it is found that the most important group in volume of business is the farm products trade other than food and farm supplies. The sales of this group amounted to \$649,159,100 or 19.52 per cent of the total wholesale trade. The most important section was the sub-group grain, for which the sales exceeded \$500,000,000. This business was reported largely by the dealers on the grain exchanges and includes a large amount of export sales.

The second group in importance was the grocery and food specialties, with sales of \$463,-007,200 or 13.93 per cent of the total. If food products (n.e.s.) group is taken with the grocery group the sales of dealers in food products amount to \$830,840,800 or practically one-quarter of the entire wholesale trade.

The next major group was the dry goods and apparel trade with sales of \$235,365,200 or 7.08 per cent of the total. This was followed by petroleum and petroleum products with \$220,-375,500 or 6.63 per cent. The only other group with sales more than 5 per cent of the total was the chemicals, drugs and allied products group with \$174,595,600 or 5.25 per cent.

Nine groups had sales between \$66,000,000 and \$166,000,000 or 2 to 5 per cent of the total trade. In order of importance, there were electrical, 4.31 per cent; machinery, equipment and supplies, 4.25 per cent; humber and building materials, 3.63 per cent; tobacco and tobacco products, 3.32 per cent; automotive, 3.23 per cent; metals and metal work, 2.94 per cent; paper and paper products, 2.86 per cent; hardware, 2.36 per cent; and coal and coke, 2.04 per cent.

The remainder of the wholesale trade, forming 7.59 per cent of the total, was divided between amusement, sporting and photographic goods, 0.53 per cent; farm supplies (except machinery and equipment), 0.57 per cent; forest products (except lumber), 0.72 per cent; furniture and house furnishings, 0.85 per cent; general merchandise, 0.92 per cent; iron and steel scrap and other waste materials, 0.31 per cent; jewellery and optical goods, 0.36 per cent; leather and leather goods, 0.50 per cent; plumbing and heating equipment and supplies, 0.93 per cent; and all other trades, 1.90 per cent.

Where the analysis of sales by kinds of business is confined to wholesalers proper, it is found that the order of importance differs somewhat from that for the entire wholesale trade. The leading group among the wholesalers proper was the food products (n.e.s.) trade with sales of \$254,163,300 or 22.87 per cent of the total for wholesalers proper. The groceries and food specialties group is second with \$221,216,000 or 19.91 per cent. Thus the dealers in groceries and food products accounted for more than 40 per cent of the trade of wholesalers proper. Sales of the dry goods and apparel trade amounted to \$102,358,100 or 9.21 per cent, so that the business of the three groups mentioned formed more than hulf the trade of wholesalers proper.

Geographical Distribution of Wholesale Trade.

More than half of the wholesale trade m Canada is conducted by establishments located in Ontario and Quebec. The concentration is greater for the business of wholesalers proper than for the total wholesale trade as the grain trade in Winnipeg, conducted by specialized types of wholesalers, tends to increase Manitoba's share of the total. The distribution of the total sales of all wholesale establishments was as follows: 30.49 per cent by establishments in Ontario, 27.21 per cent by those in Quebec, 4.75 per cent by those in the Maritime Provinces, 29.94 per cent by those in the Prairie Provinces, and 7.61 per cent by those in British Columbia.

The sales of wholesalers proper were divided: 34.87 per cent in Ontario, 32.00 per cent in Quebec, 6.75 per cent in the Maritime Provinces, 17.61 per cent in the Prairie Provinces, and 8.77 per cent in British Columbia.

As the wholesale markets of the country are located in the large centres of population, the bulk of the wholesale trade is transacted by establishments located in the large cities. In fact, approximately two-thirds of the entire trade was carried on by firms located in the four cities of Montreal, Toronto, Winnipeg and Vancouver. The position held by each of these cities is shown in Table I.

TABLE I.-CANADA-WHOLESALE TRADE IN LEADING CITIES, 1930

(Sales are shown in thousands of dollars)

	All establishments			Wholesalers proper			
	Number			Number	Net	sales	
	of estab- lishments	Amount	Per cent of total	estab- lishments	Amount	Per cent of total	
		\$			\$		
Total, Canada	13,140	3,325,210	100-00	5,108	1,111,319	100.00	
Montreal Toronto Winnipeg Vancouver	1,838 1,835 768 761	766,833 691,738 635,722 211,112	23.06 20.80 19.12 6.35	1,035 971 314 341	287,177 227,375 72,863 78,382	25.84 20.46 6.56 7.05	

Wholesale Trade by Forms of Organization

For purposes of the census wholesale establishments have been classified according to form of organization or nature of ownership. Almost 70 per cent, or 8,857, of the total of 13,140 establishments are operated under the corporate form of organization while 3,355 are owned by individuals. Partnerships numbered 822 and co-operative associations, 106. These figures refer to the number of establishments and not to the number of firms operating the wholesale outlets. Owing to the fact that firms may operate in both the retail and wholesale fields or in the wholesale and manufacturing fields, it is difficult to determine the net number of firms.

A careful but not exhaustive count of wholesale firms showed that there were approximately 4,299 firms operating as wholesalers proper, of which 1,960 were incorporated. The number of firms operating as other wholesalers was placed at 2,959 of which 1,121 were incorporated. These totals were arrived at by counting each firm only once, irrespective of the number of branches operated.

For the entire wholesale trade the sales of establishments under corporate ownership formed 79.52 per cent of the total. For wholesalers proper the sales of corporations constituted 82.14 per cent of the total and those of individual enterprises, 11.24 per cent. Co-operative associations had 7.17 per cent of the sales of all wholesale establishments but only 0.08 per cent of the sales of wholesalers proper.

Multiple Organizations in Wholesale Trade

While chain companies are generally thought of only in connection with retail trade, there are many organizations in the wholesale field which operate a number of branches. For purposes of analysis figures for wholesalers proper and other wholesale establishments are shown separately in the tables. The distribution of sales according to the number of units operated for these two broad divisions of wholesale trade is shown in Table II.

TABLE II—CANADA—DISTRIBUTION OF SALES ACCORDING TO NUMBER OF ESTABLISHMENTS OPERATED

	Wholesalers proper	Other wholesale estab- lishments
Firms operating— 1 unit 2 units 3-5 units 6-25 units Over 25 units.	59·3 11·4 12·7 10·3 6·3	41.6 11.0 13.4 25.4 8.6
Total	100.0	100-0

It will be seen from the foregoing table that the greatest differences between wholesalers proper and other wholesale establishments lie in the proportion of sales handled by single-unit establishments and organizations of 6 to 25 units. The wholesalers proper showed a much higher proportion of trade for the former and the other wholesale establishments for the latter.

499

With regard to this feature as with other aspects of wholesade trade, there are great differences between different kinds of business. For example, concerns operating more than 25 units are shown for wholesalers proper only for the food products (n.e.s.) trade, the groceries and food specialties and the tobacco trade. In the food products group the multiple organizations operate chiefly in the fruit and vegetable trade and in meats and meat products. Among other wholesalers multiple organizations with more than 25 units are found only in the petroleum trade.

Size of Wholesale Establishments

Considerable interest attaches to the relative size of wholesale establishments, classified according to net sales. While more than half the total number of both wholesalers proper and other wholesale establishments reported sales of less than \$100,000 in the year, the greater part of the wholesale business is handled by establishments doing more than \$500,000 a year.

The distribution of wholesale trade by size of establishment is shown in Table III.

TABLE III.—CANADA—NUMBER OF ESTABLISHMENTS AND NET SALES FOR WHOLESALERS PROPER AND OTHER WHOLESALE ESTABLISHMENTS, GROUPED ACCORDING TO NET SALES

	Wholesalers proper Other wholesal establishment					
Size of business	Number	Net sales		Number	Nets	nles
	of estab- lishments	Amount	Per cent of total	of estab- lishments	Amount	Per cent of total
Establishments with sales of— Under \$25,000 \$ 23,000—\$ 49,999 \$ 50,000—\$ 99,999 \$ 100,000—\$ 199,999 \$ 200,000—\$ 299,999 \$ 300,000—\$ 299,999 \$ 300,000—\$ 399,999 \$ 300,000—\$ 999,999 \$ 1,000,000 and over. Total.	1, 149 767 887 887 408 264 184 378 184	\$ 13,997 27,745 63,227 126,148 99,200 90,283 82,078 257,698 350,924 1,111,310	1·3 2·5 5·7 11·3 8·9 8·1 7·4 23·2 31·6	3,059 1,442 1,248 789 306 230 156 323 389	\$ 37,004 51,662 87,510 110,782 95,547 78,903 69,872 231,339 1,451,273	1.7 2.3 3.9 5.0 4.3 3.6 3.2 10.4 65.6

(Sales are shown in thousands of dollars)

The extent to which very large establishments, those with sales of \$1,000,000, and over, predominate in the wholesale field varies greatly in different trades. Among wholesalers proper, establishments with sales of \$1,000,000 and over had $60\cdot3$ per cent of the sales for the coal and coke group, $44\cdot2$ per cent of the business for the groceries and food specialties group, $51\cdot9$ per cent in the hardware trade, and $41\cdot9$ per cent of the sales for the metals and metal work group.

Credit Sales

It was pointed out in the discussion of the functions of wholesalers that one of the important functions was the financing of distribution through the extension of credit to purchasers, who might be retailers, industrial firms or other wholesalers. In order that the extent to which credit sales were a factor in wholesaling might be determined, establishments were asked to state the amount of their credit sales—i.e., all sales not strictly for cash. While all establishments were not able to provide information on credit sales, a large proportion of the trade was covered by the returns submitted. The percentages of net sales made on credit are thus based only on the reports of the firms showing that they sold either for cash or allowed some credit.

As credit sales were taken as all sales not cash in hand, the sales include transactions on credit for brief periods from one to thirty days as well as longer extensions of credit. According to the returns submitted, 83-57 per cent of the total wholesale trade was made on credit and 85-37 per cent of the sales of wholesalers proper only. Variations are shown in the extent of credit sales in different trades but in only a few kinds of business is the proportion less than 60 per cent.

Employment in Wholesale Trade

The 96,737 persons engaged in wholesale establishments during the year 1930 formed $2\cdot 46$ per cept of the total gainfully employed population in Canada. With the exception of the Maritime Provinces the proportion in each economic division was fairly close to the Dominion average as is shown by Table IV.

TABLE IV.—RATIO OF WHOLESALE WORKERS (EMPLOYEES AND ACTIVE PROPRIETORS) TO TOTAL GAINFULLY EMPLOYED POPULATION

Economic division	Per cent
nada.	2.46
Maritime Provinces	1.75 2.76 2.49 2.38
Prairie Provinces. British Columbia.	2·3 2·4

The average number of employees engaged in wholesale trade during the year was 90,564, who received \$146,346,600 as salaries and wages. The average payment per employee was, therefore, \$1,616. Again, with the exception of the Maritime Provinces, where the average payment was \$1,387, the figures for the economic divisions elosely approximate the average for the Dominion, ranging from \$1,603 in Quebec to \$1,685 in British Columbia.

The largest employers of labour in the wholesale field are the wholesale merchants, who employed 32,610 male employees and 6,574 females. This type of distributor thus had more than 40 per cent of the employees. Next in order of importance as employers were the manufacturers' sales branches with 12,446 males and 2,733 females. Bulk tank stations ranked third with 7,988 male employees and 256 females, followed by the importers with 6,305 males and 1,602 females. These four types of distributors had 70,514 employees out of the total of 90,564 for all establishments.

In analyzing employment by kind of business it is found that for the wholesale trade the largest number of employees was in the groceries and food specialties trade, which had 9,030 male employees and 2,139 females. The food products (n.e.s.) group was second in importance with 8,699 males and 1,344 females. Third in importance was the petroleum trade with 8,718 male employees and 664 females.

The largest numbers of female workers were reported by the kinds of business listed below:—

	of female
	employees
Groceries and food specialties	2,139
Dry goods and apparel	1,399
Food products (n e s.)	1,344
Machinery, equipment and supplies (except electrical)	1,341
Chemicals, drugs and allied products.	
Electrical	1,016

As such a large part of wholesale trade is conducted through incorporated companies, there is a corresponding concentration of employees in establishments under corporate ownership. Table V shows the distribution of employees in wholesale trade according to the form of organization of the establishments in which they are employed.

TABLE V.-CANADA-NUMBER OF EMPLOYEES BY FORMS OF ORGANIZATION

		ishments	Wholesalers proper	
Form of organization	Number of employees	Per cent of total	Number of employees	Per cent of total
Totals. Individual. Partnership Corporation. Co-operative association.	90,564 6,877 3,183 79,404 1,100	100·00 7·59 3·51 87·68 1·22	48,851 5,005 2,652 41,182 12	100·00 10·25 5·43 84·30 0·02

Corporate enterprises employ almost 90 per cent of the hired workers in wholesale trade as a whole and approximately 84 per cent of the employees in wholesalers proper.

Another interesting phase of employment in wholesale trade is the distribution of employees according to size of establishment. The information on this subject has been prepared separately for wholesalers proper and other wholesale establishments.

The average number of employees per wholesaler proper was between 9 and 10 persons, but establishments with sales of \$1,000,000 or more per year averaged more than 67 persons while those with sales under \$25,000 had about one. In the case of other wholesale establishments the average number of employees was about 5 but the large businesses had an average of 40 employees while the smallest had less than one per establishment. The distribution of employees by size of business is given in Tables VI and VII.

TABLE VI.—CANADA—WHOLESALERS PROPER—DISTRIBUTION OF EMPLOYEES BY SIZE OF BUSINESS

Size of business	Average number of employees per estab- lishment	Per cent of total employees	Per cent of total establish- ments
Less than \$ 25,000. \$ 25,000—\$ 49,999. \$ 50,000—\$ 99,999. \$ 100,000—\$ 199,999. \$ 200,000—\$ 299,990. \$ 300,000—\$ 399,999. \$ 500,000—\$ 399,999. \$ 500,000—\$ 999,999.	2.69 4.55 7.06 11.66 15.38 19.02 27.24	2-92 4-23 8-26 12-81 9-74 8-30 7-16 21-08 25-50	22-49 15-02 17-36 17-36 7-99 5-17 3-60 7-41

Operating Expenses of Wholesalers Proper

As the operating expenses of wholesale establishments are largely dependent upon the extent of the services offered, the figures for wholesalers proper and other wholesale establishments are analysed separately. Even among wholesalers proper there are wide variations in costs of doing business as the nature of the wholesale operations conducted differ so greatly.

Operating expenses for wholesale establishments were reported under the following heads on the schedules returned for the census: (a) salaries and wages of employees, (b) expenses of salesmen (other than salaries, commissions or bonuses), (c) rent, if any, and (d) all other expenses (including taxes, insurance, light, heat, power, delivery, supplies, and all expenses not included elsewhere). In the tables included in this report, however, the only expense item shown separately is the payroll of employees. Not all wholesale establishments possessed sufficiently detailed records to furnish complete information on operating expenses. The tables, therefore, include data only for those firms which provided complete answers on their operating expenses.

The average operating expense ratio for all wholesalers proper reporting was 13.48 per cent of net sales. The salaries and wages of employees formed approximately half of the total operating expense. It will be noted that no allowance is made in the operating expense figures for the services of proprictors actively engaged in their businesses. Although this factor is not as important as in the retail field, there are a number of wholesale trades in which proprietors form a considerable part of the working force. While active proprietors were asked to report the amount of their drawings if they received a stated salary, it was impossible to determine what part of the amounts reported should be taken as payment for services and what part as profits from the business. In lieu of a satisfactory basis of determining the compensation of proprietors this item has been left out of the analysis of operating eosts.

Among wholesalers proper average operating expenses appear to be lowest for the trades handling staple products. The ratio for tobacco and tobacco products was 7.79 per cent; for graceries and food specialties, 8.72 per eent; and for food products (n.e.s.), 8.93 per cent. Wholesale establishments which deal in products on a ear-load basis, such as dealers in farm products (n.c.s.) or forest products (except lumber), also have low operating ratios. Operating expenses for the former were 10·10 per cent of sales and for the forest products trade, 8·28 per cent. Coal and eoke dealers, who also deal in fairly large quantities, had an operating ratio of $10 \cdot 14$ per cent.

On the other hand, in those trades in which a wide variety of goods must be carried and sales are made for special items the operating expense ratios are considerably higher. The jewellery and optical goods trade had operating expenses equal to 30.13 per cent of net sales while the ratio for the amusement, sporting and photographic group was 26.32 per cent. Operating expenses for the furniture and house furnishings group were 25.51 per cent of net sales and for the machinery, equipment and supplies group, 24.79 per cent. It is interesting to note that trades which are somewhat similar in methods of operation tend to have about the same operating costs. Thus the ratio for the hardware group is 18.63 per eent and for the plumbing and heating equipment and supplies, 19.29 per cent.

The foregoing discussion has been confined to the operating expense ratios of the major trade groups but there are often quite wide differences between trades in the same group. The operating costs of drugs and drug sundries (general line) were 13.11 per cent of net sales but for drug and drug sundries (specialty) the ratio was 27.91 per cent. The ratio for groceries (general line) was 8.21 per cent and for food and groeery specialties, 12.57 per cent.

The average operating expenses for the lumber and building materials group were 15.92 per eent of sales, but the ratio for construction and building materials was 20.62 per cent and for lumber and mill work, 12.15 per cent.

Operating Expenses of Other Wholesale Establishments

The variations in operating expense ratios are even greater among the specialized types of distributors than among wholesalers proper. This is to be expected because of the widely differing modes of operation and nature of services offered by the various types of distributors and even by the same type of distributor in different lines of trade. Some of the specialized types of distributors operate on a commission basis, calculated either on the value of sales or on quantities. If such establishments are to be operated profitably the operating expense ratio must be less than rate of commission.

Bulk tank stations, which are found only in the petroleum field, had operating costs equal to 15.18 per cent of net sales. This figure may be compared with the ratio of 14.73 per cent for wholesalers proper in the gasoline and oil trade and with 17.92 per eent for wholesalers proper in the general line of petroleum products.

Manufacturers' sales branches had an average operating expense ratio of 10.38 per cent of the value of business handled. The lowest ratio for this type of distributor was 2.95 per cent for the tobacco and tobacco products trade to 19.73 per cent for the furniture and house furnishings

Brokers had the low operating expense ratio of 1.83 per cent of value of orders handled. The highest operating costs for this type were shown for lumber and building materials brokers with 7.09 per eent.

Commission merchants had average operating expenses equal to 2.94 per cent of net sales, but this low ratio was due chiefly to the influence of figures for the farm products trade, puncipally grain. If this trade were omitted the average for the remainder would be about 5 per cent.

Agents show wide variations in operating expenses. The average for export agents was 1.91 per cent, ranging from 0.13 per cent for the farm products (n.e.s.) trade to 13.81 per cent for food products (n.e.s.). Import agents had average operating costs equal to 6.79 per cent of sales but the range here was from 0.92 per cent for the farm products (n.e.s.) group to 26.37 per cent for the electrical trade. Manufacturers' agents, the most important type of distributor of this character, had an operating ratio of 5.96 per cent. The lowest was 2.86 per cent for the tobacco trade and the highest, 16.95 per cent for the food products (n.e.s.) trade. Selling agents had average operating costs of 5.73 per cent, the highest operating ratio for this type being shown for the food products (n.e.s.) trade with 16.24 per cent.

Chain store warehouses had operating costs equal to 1.75 per cent of the value of merchandise handled. The ratios were 4.66 per cent for the chemical and drug group, 9.23 per cent for dry goods and apparel, 10.80 per cent for the general merchandise group, 3.51 per cent for groceries and food specialties, and 5.08 per cent for tobacco and tobacco products.

Film exchanges represent a unique type of wholesale distributor as the business of such establishments consists in providing motion picture theatres with a constant change of films and their revenue consists almost entirely of the rentals secured for films. The operating costs of film exchanges formed 25–38 per cent of their gross revenue.

Capital Invested in Wholesale Trade

The value of capital invested in wholesale trade at the end of 1930 was \$759,439,500 for all types of establishments. The capital investment of wholesalers proper was \$422,513,200 or 38.0 per cent of the value of sales, while the capital invested in other wholesale establishments amounted to \$336,926,300 or 15.2 per cent of the sales. Capital invested included inventory value of merchandise and supplies, cash and trading accounts, and the value of owned property. The value of merchandise on hand for re-sale was the only item of capital separately reported. Wholesalers proper had stocks amounting to \$297,221,100 or 39.7 per cent of the total capital invested. The value of stocks in other wholesale establishments was \$129,416,400 or 38.4 per cent of the capital investment.

In connection with the partial census of trading establishments taken in 1924, details were secured for capital invested under the following heads: (a) Cash on hand and in the bank, (b) merchandise on hand, (c) accounts due, (d) furniture and fixtures, (c) delivery equipment, and (f) real estate. While all wholesale establishments did not report for the 1924 census, the results obtained at that time are of interest in so far as they indicate the proportion of capital under each of the six heads mentioned above. The percentages for all wholesale establishments reporting are shown in Table VIII.

TABLE VIII.—CANADA—PERCENTAGE DISTRIBUTION OF CAPITAL IN WHOLESALE ESTABLISHMENTS, BY ITEMS, 1923

Item	Per cent
Cash on hand and in the bank. Merchandise on hand. Accounts due Furniture and fixtures. Delivery equipment. Real estate Total capital.	39.3 36.8 2.9 1.3 15.9

It is interesting to note the close relationship which exists between the proportion of the total capital in 1924 represented by value of stocks and the figures for 1930. In 1924 the value of stocks formed 39-3 per cent of the total capital compared with 39-7 per cent for wholesalers proper in 1930 and 38-4 per cent for other wholesale establishments. Whether the other items of capital invested were also distributed in the same proportions in 1924 and 1930 it is impossible to say.

For wholesale trade as a whole, the largest capital investment is shown for the petroleum and petroleum products group, for which the value of capital invested was \$131,770,800, while sales were \$220,375,500. The amount of capital invested in the machinery, equipment and supplies (except electrical) group was second in value with \$88,563,000. The groceries and food specialties group was third in amount of capital with \$87,064,400 and sales of \$463,007,200. Fourth and fifth in amount of capital invested were the dry goods and apparel trade and the farm products (n.e.s.) trade with \$62,366,500 and \$52,436,800 respectively.

Among wholesalers proper the groceries and food specialties trade ranked first in amount of capital with \$65,667,800. Next came the dry goods and apparel trade with \$55,213,500, followed by the machinery, equipment and supplies (except electrical) group with \$51,090,800, the hardware trade with \$42,666,300 and the food products (n.e.s.) trade with \$35,925,900.

Continuity of Ownership

Wholesale establishments, on the whole, display a greater longevity than retail establishments. The actual rate of mortality among either retail or wholesale firms cannot be determined from the census records as the information available relates only to establishments which were in operation during 1930. The number of businesses which may have been started or which may have changed hands at any time prior to 1930 is not known. Nevertheless, it is significant that only 52.07 per cent of the retail stores for which information is available had been under the same ownership for more than five years compared with 64.34 per cent for wholesalers proper and 64.38 per cent for other wholesale establishments.

The proportions of wholesalers proper by period of ownership are approximately the same in the various economic divisions as for Canada as a whole with the exceptions of the Maritime Provinces and British Columbia. The former had a larger proportion of establishments which had been under the same ownership for more than five years, while in British Columbia the proportion was smaller. In the Maritime Provinces 73.48 per cent of the wholesalers proper had been under the same ownership more than five years, but in British Columbia the proportion for this group was only 57.50 per cent. The Maritime Provinces also had the largest proportion of wholesalers proper more than 21 years under the same ownership. The percentage for the Maritime Provinces was 23.62 per cent compared with 12.30 per cent for Canada and 7.78 per cent in British Columbia, which had the smallest proportion of old firms.

Sales by Commodities

In addition to securing the total net sales of each wholesale establishment, an attempt was made to secure figures for the value of sales for each commodity or commodity line handled by reporting establishments. Provision was made on the census schedules for reporting sales for some 90 major commodity lines and more than 150 detailed commodity items. Not all firms maintain records of sales by commodity lines so that it was not possible to secure a complete breakdown of net sales by commodities. For this reason it has been necessary to introduce the term "commodity coverage". The percentages shown in the table under "commodity coverage" indicate the extent to which the net sales for each kind of business have been broken down by commodities. While some firms were able to furnish sales figures for the major commodity lines which they handled, they were not able to give details for subclassifications. It has thus been necessary in the summary tables to give commodity figures only for the following major commodity classifications.

TABLE IX.—SALES BY COMMODITIES

⁽¹⁾ The slight differences between the sums of the individual items and the totals are due to the figures being shown to the nearest thousand.

The figures inserted after the classifications in Table IX are the sales reported in these lines by wholesale establishments. The values given are not intended to represent the actual distribution or consumption of these commodities in Canada. The reasons why figures for wholesale establishments cannot be used for this purpose have already been indicated, but they may be referred to here. From Table IX it will be seen that the largest commodity item is Grain, with reported commodity sales of \$9,318,000 by wholesalers proper and \$514,335,000 by other wholesalers.

If the detailed commodity tables for the Dominion are examined, it will be found that, of the total reported sales of grain of \$523,653,000, there were \$514,624,000 reported by establishments in the Farm Products, n.e.s. trade. The most important types of wholesalers in this trade from the viewpoint of value of sales were:

Export merchants\$	102,756,000
Drokers	67,808,000
Co-operative sales agencies. Elevators (line).	159,483,000 121,765,000

Apart from export merchants, which are generally specialized agencies in the export field, the types listed above, as well as others enumerated in the commodity tables, share in a variety of intermediate transactions as well as making sales to final buyers in Canada or to foreign purchasers. For example, brokers may effect sales for export merchants, line elevators, commission merchants or other establishments. For this reason, there is a great deal of duplication in the sales reported for this particular trade and the total figures do not indicate the actual value of the commodities which are finally distributed.

While the value of commodity sales in some lines tends to exceed the actual value of goods distributed, in other lines the values reported are considerably less than those of the goods put into use in the year. An example of this is furniture. From the preceding table it will be seen that the value of sales of household furniture reported was \$504,000 for wholesalers proper and \$4,163,000 for other wholesalers. These totals are considerably less than the value of household furniture distributed in Canada through all channels during the year 1930. The discrepancy in this case arises from the fact that the output of furniture factories in Canada is sold to a very large extent directly to retail stores and only a small part is distributed through wholesale channels. The figures in the commodity tables cover only that portion of the output which is sold by wholesale establishments.

COMMERCE DE GROS AU CANADA, 1930

INTRODUCTION

Cette section traite des statistiques du commerce de gros au Canada en 1930. Les données sur lesquelles est basé ce rapport ont été obtenues à l'occasion du Recensement des Etablissements de Commerce et de Service, 1931. Pour les fins du recensement, le commerce de gros comprend tous les établissements occupés à l'achat pour revente et à la vente ou à la distribution des marchandises sur une échelle de gros. Il se trouve ainsi à comprendre tous les rouages qui interviennent dans la vente des marchandises entre le producteur ou manufacturier, d'une part, et le détaillant ou l'acheteur en gros, d'autre part. Cette division du Recensement des Etablissements de Commerce et de Service s'applique ainsi aux opérations des nombreuses catégories d'intermédiaires et de distributeurs en gros qui ont surgi à la suite de la modification des méthodes de distribution.

MÉTHODE DE RECENSEMENT

Les méthodes que l'on a utilisées pour obtenir des établissements de commerce les donné s de recensement nécessaires et pour en compiler les résultats ont été décrites de façon assez détaillée dans les volumes I et X, de sorte qu'il suffira de les indiquer brièvement ici.

Les communications avec les établissements de gros se sont faites surtout par la poste, à l'aide de listes préparées par les énumérateurs de recensement, qui, en juin 1931 avaient visité tous les établissements de gros et relevé certains détails tels que le nom et l'adresse, la nature du commerce, et le chiffre d'affaires approxinatif, notant en outre si l'établissement formait partie d'une organisation plus considérable. Une fois parvenues au Bureau de la Statistique, les listes des énumérateurs ont été vérifiées au moyen de divers répertoires ou guides commerciaux, après quoi des formules appropriées ont été expédiées par la poste. Aux établissements de gros faisant le commerce de produits alimentaires, on a envoyé la formule "Gros, N° 2", et tous les autres établissements de gros ont reçu une formule générale. Presque toutes les formules de recensement ont été renvoyées au Bureau par la poste, mais dans le cas de près de emquante pour cent des rapports une certaine somme de correspondance a été nécessaire, soit pour obtenir le renvoi de la formule, soit pour corriger des erreurs ou réparer des omissions dans les rapports. Il a également fallu employer, dans eertaines localités, un personnel ambulant pour l'obtention de rapports qui n'avaient pas été transmis par la poste.

PORTÉE DU RECENSEMENT

Comme on l'a déjà vu, ce recensement embrassait tous les établissements de commerce de gros. Outre ceux qu'on appelle communément maisons de gros ou marchauds en gros, le recensement couvre des établissements de gros tels que les entrepôts des mag sins en chaîne, les dépôts d'huiles, les courtiers, les marchands à eommission, les succursales de ventes des manufacturiers, les agents vendeurs, les assembleurs de produits agric l's, etc. On trouvera plus loin dans la présente section une description complète des types d'établissements de gros que comprend le recensement.

Pour certaines fins, il cût été utile de ne considérer comme établissements de gros que les maisons qui vendent aux détaillants. Malheureusement, les établissements de commerce ne se prêtent pas à un classement aussi simple. En premier lieu, même les marchands en gros ordinaires ne vendent pas uniquement aux détaillants, et en second lieu il est nécessaire d'inclure dans le domaine du gros les nombieux types d'établissements qui s'occupent de la distribution en gros. On a donc décidé de considérer comme établissements de gros toutes les maisons ou bureaux occupés (a) à l'achat et à la vente en gros de denrées; (b) à la distribution en gros de denrées, et (c) à la sollicitation, comme intermédiaires ou autrement, de commandes en gros pour des denrées. De la sorte, le domaine du gros comprend tous les établissements autres que les magasins détaillants.

Vu la grande variété d'établissements que renferme le domaine du gros, et les nombreuses étapes de distribution que doivent franchir certaines denrées à partir du producteur jusqu'au détaillant, aucune comparaison directe portant sur le volume d'affaires ne peut être établic entre le commerce de gros et le commerce de détail. Il se fait un chiffre considérable d'affaires entre certains types de grossistes spécialisés, particulièrement entre agents, eourtiers, maisons à commission et assembleurs de produits agricoles. De telles ventes font souvent double emploi avec eelles d'autres établissements de gros tels que marchands en gros, exportateurs et entrepôts de magasins en chaîne. De plus, un volume considérable de transactions en gros consiste en ventes d'outillage ou de fournitures à des consommateurs industriels. La valeur des ventes de cette nature déclarée par les maisons de gros était de \$374,979,700 en 1930, et tous les établissements n'ont pas été en mesure d'indiquer ces transactions en détail. Puis il y a la valeur des ventes d'exportation effectuées par l'intermédiaire d'établissements de gros, qui n'auraient pas leur contrepartie dans le commerce de détail. D'autre part, les marchandises que vendent les magasins de détail ne proviennent pas toutes des établissements de gros. Certaines maisons détaillantes achètent directement des producteurs ou des fabricants au Canada ou effectuent leurs propres importations. De telles transactions ne peuvent figurer dans le volume d'affaires des grossistes canadiens, mais elles n'en constituent pas moins une addition au chiffre déclaré des ventes en gros.

RECENSEMENT EMBRASSANT TOUTES LES UNITÉS DES ÉTABLISSEMENTS

Un rapport distinct était requis de chaque établissement de gros exploité au Canada en 1930, même si l'établissement était une succursale ou un bureau de ventes d'une maison plus considérable. L'établissement déclaré pouvait être une maison de gros proprement dite, un entrepôt, un bureau ou peut-être, même une partie seulement d'un bureau, dans les eas de deux ou plusieurs maisons occupant le même local. Toutefois, si un siège social était maintenu pour la transaction des affaires en gros, on le considérait comme établissement de gros.

La réunion des statistiques du commerce de gros d'après le nombre total d'unités des établissements permet de compiler les données selon la situation géographique, mais elle ne fournit aucunc indication concernant la destination des ventes. Ainsi, il se peut qu'un établissement de gros n'exploite qu'un seul établissement situé, par exemple, à Toronto. Mais cette maison, par l'intermédiaire de ses représentants ou par la poste, vend dans toutes les parties du Canada. Cependant, comme il n'y a qu'un seul établissement exploité, toutes les ventes de cette maison sont attribuées à Toronto.

Le fait que tous les types d'établissement de gros étaient compris dans le recensement signifie que le Burcau a reçu des rapports de plusieurs établissements de gros qui ne gardaient pas de stock de marchandises ou n'assumaient pas la propriété des denrées pour lesquelles ils recevaient des commandes. Dans le cas de semblables bureaux, les commandes sont transmises au fabricant, au producteur ou à l'assembleur, et les marchandises sont expédiées directement à l'acheteur.

Quelques établissements se livrent à la fois au commerce de gros et à la vente au détail. Si une proportion de 51 pour cent ou plus des affaires entre dans le domaine du gros, ces maisons sont classées comme établissements de gros, mais si 51 pour cent ou plus des ventes se font aux prix du détail, alors le magasin en question est inclus dans le recensement du commerce de détail.

FONCTIONS DES ÉTABLISSEMENTS DE GROS

Les fonctions accomplies par les établissements de gros diffèrent beaucoup selon les divers types de grossistes. Il n'est donc pas possible de relever un ensemble de fonctions qui puisse s'appliquer à tous les types. Dans le système normal de distribution à trois participants fabricant ou producteur, grossiste et détaillant—le marchand en gros figurait comme partie intégrante. Par suite des changements survenus dans le système de distribution, le travail peut se répartir parmi des types de grossistes plus spécialisés ou, encore, être entrepris par le fabricant ou le détaillant. Néanmoins, les fonctions essentielles de la distribution en gros doivent s'accomplir, quel que soit le rouage utilisé. Ces fonctions peuvent se grouper sous les rubriques suivantes:

- (a) Vente.
- (b) Assemblement.
- (e) Transport.
- (d) Entreposage.
- (e) Financement.

La plus importante des opérations de vente accomplies par le grossiste consiste à établir et à maintenir un contact effectif entre acheteurs et vendeurs, dans le cas du grossiste régulier entre le fabricant et l'assembleur, d'une part, et le détaillant d'antre part. La tâche se résume essentiellement à obtenir des renseignements concernant les débouchés ainsi que les clients possibles, et de faire connaître aux clients les catégories, les quantités, les qualités et les prix des denrées offertes en vente. Dans le cas de produits de vente courante, la somme d'efforts consacrés à l'obtention ou à la distribution de renseignements pomrra être minime, mais un des principaux aspects des opérations des établissements de gros réside dans l'introduction de nouvelles marques de marchandises, tâche qui nécessite des efforts considérables. Les grossistes coopèrent en outre avec les fabricants dans l'organisation de campagues spéciales de vente et dans l'expansion des marchés. Afin qu'un contact effectif puisse être maintenu entre acheteurs et vendeurs, il est habituellement nécessaire que les représentants de l'établissement de gros fassent des visites régulières aux détaillants de la région qui leur est confiée, et que les acheteurs se tiennent étroitement en contact avec les fournisseurs de denrées.

La deuxième série de fonetions qu'accomplit le grossiste tombe sous la rubrique de l'assemblement et comporte, en certains cas, le triage, le classement, l'emballage et le préparation des denrées pour la vente. Bien que les ventes croissantes de marchandises préalablement mises en paquets et de deurées spécialement préparées aient amme l'introduction des méthodes susdites dans la production de plusieurs articles, il existe encore de nombreux produits que le grossiste doit assembler lui-même. Les produits importés, tels que le thé, sont souvent triés et empaquetés par le grossiste, et dans plusieurs centres, on achète en vrac les produits naturels locaux pour en faire le triage et le classement avant de les vendre au détaillant. Même lorsque cette préparation n'est pas indispensable, le grossiste doit acheter en quantités passablement fortes et trier les articles afin de remplir les commandes particulières des détaillants. Pour accomplir cette fonction de façon satisfaisante, le grossiste doit acheter en anticipation des ventes et garder des stocks complets de certains genres de marchandises susceptibles d'être en demande.

La troisième catégorie de services que rend le grossiste se rapporte au transport de la denrée du producteur au détaillant. Le grossiste doit tout d'abord faire transporter les marchandiscs à son propre entrepêt, puis les faire livrer à ses clients. D'ordinaire, c'est le grossiste qui se charge des livraisons aux détaillants locaux, tandis que les expéditions à des clients éloignés sont confiées aux compagnies de transport.

Il y a un rapport étroit entre les services d'entreposage rendus par les grossistes et la fonction d'assemblement déjà mentionnée. Il faut, en effet, réserver aux marchandises de l'espace dans l'entrepôt et assurer leur protection entre l'époque de l'achat et celle de la vente.

En dernier lieu, le grossiste doit assumer une part considérable du financement des produits finis, risquer de voir les stocks se démoder, et subir les conséquences du choix injudicieux, de la surabondance des stocks et des fluctuations de prix. Ces risques peuvent se grouper sous la rubrique "frais de stockage". On n'a pu vérifier dans quelle mesure les grossistes ont accordé du crédit en 1930, mais d'après les résultats du Recensement des Etablissements de Commerce, 1924, la valeur des comptes dus aux marchands en gros était alors à peu près égale à celle des marchandises en stock. Le grossiste peut, naturellement, garder des stocks financés par un manufacturier ou à l'aide de prêts consentis par une banque.

La mesure dans laquelle s'accomplissent les fonctions ci-dessus énumérées varie selon le genre de commerce, le type de distributeur, la clientèle desservie et les sources d'approvisionnement. Une étude de l'évolution du commerce de gros au Canada démontre que le système de distribution subit des modifications et une adaptation continuelles, correspondant aux changements qui surviennent dans la production et la distribution au détail. L'entrée en scène des chaînes de magasins a amené la création d'un nouveau type d'établissement de gros, qui est l'entrepêt de magasins en chaîne, et a nécessité l'adoption de nouvelles méthodes de vente en gros, destinées à permettre aux magasins indépendants de soutenir la concurrence des magasins en chaîne. La formation de chaînes de détaillants indépendants desservies par des marchands en gros et l'addition de comptoirs pour la vente "à emporter" dans certains établissements de gros peuvent être attribuées en majeure partie à l'apparition des magasins en chaîne.

L'importance croissante des détaillants opérant sur une vaste échelle, et la ter dance, de la part des manufacturiers de plusieurs genres de produits, à réaliser un contact plus intime avec le commerce de détail out également influé à un degré considérable sur le système de distribution en gros. Les succursales de ventes des manufacturiers jouent un rôle sans cesse plus important dans le commerce de gros. Le recensement a permis de relever l'existence de 1,428 succursales de ventes de manufacturiers, et le volume d'affaires de ces bureaux formait près de 17 pour cent de la valeur totale des ventes en gros. Plusieurs succursales de ventes de manufacturiers ne gardent pas de stock; elles servent simplement de point de ralliement pour les représentants régionaux. D'autres, par contre, maintiennent des stocks considérables et desservent les détaillants de leur territoire, accomplissant ainsi presque toutes les fonctions des marchands en gros. La nécessité d'assembler des denrées provenant de plusieurs producteurs afin de répondre aux besoins des grossistes et des détaillants opérant sur une vaste échelle a créé un champ d'action pour les courtiers et les marchands à commission, particulièrement dans le commerce des produits alimentaires. Presque tous les types de grossistes doivent leur existence à la nécessité de répondre à quelque besoin particulier dans le domaine de la distribution. Ils continueront d'exister aussi longtemps qu'ils constitueront le rouage le plus efficace pour l'accomplissement des fonctions qu'ils ont assumées.

MÉTHODE DE CLASSIFICATION

Les établissements de gros, pour les fins du Recensement, ont été classifiés par type d'établissement et genre de commerce. Les établissements sont classifiés par type d'après la nature du commerce ou des services, et d'après le genre de commerce suivant la ligne ou les lignes principales de marchandises.

Types d'établissements.—Le domaine du gros a été divisé en deux types principaux. Le premier est appelé "maisons de gros" et le second "autres établissements de gros." Dans le premier sont comprus les établissements faisant le commerce régulier de gros. Les types les plus importants de cette division sont les marchands de gros et les importateurs. Ceux-ci remplissent généralement les fonctions de marchands de gros, telles que fournir du crédit, acheter en masse et vendre en lots subdivisés, fournir des facilités d'entreposage et de livraison, solliciter des commandes par intermédiaires, donner des informations sur le marché, etc. Certains types d'établissements sont inclus avec les maisons de gros quoiqu'ils ne remplissent que quelquesunes des fonctions du marchand de gros. Ce sont les marchands de gros au comptant, la marchandise étant emportée par le client, les expéditeurs à vue, les maisons de gros vendant par comptoirs postaux et les distributeurs ambulants, mais ces marchands de gros à activités limitées ne jouent qu'un rôle peu important dans l'ensemble du commerce de gros au Canada. Les "autres établissements de gros" sont subdivisés en onze classes basées sur leurs activités et la nature de leur commerce. Les définitions des types d'établissements de gros paraissent dans la section suivante.

Vu qu'il n'y a aucune nomenclature standardisée dans le domaine du gros le même terme peut avoir différentes acceptions dans différentes lignes de commerce mais comme il était nécessaire d'avoir des classifications uniformes pour le recensement on a accepté le langage ordinairement en usage et, dans certains cas, des définitions arbitraires ont été attribuées à des groupes semblables d'établissements dans tout le domaine du gros.

Définitions des types d'établissements de gros

- I. Les maisons de gros sont divisées en trois classes:
- (a) Marchands de gros de service.—Cette division se compose de commerçants de gros remplissant toutes les fonctions de marchands de gros, telles que décrites dans le paragraphe précédent. En outre, ce groupe comprend les importateurs engagés dans la manutention des marchandises importées et les exportateurs opérant sur le marché étranger. Les maisons qui s'occupent principalement de la manutention de marchandises en vrac comme le grain ou le bois forment une elassification spéciale, "marchands exportateurs", et entrent dans "autres établissements de gros".
- (b) Les maisons de gros à fonction limitée remplissent seulement quelques-unes des fonctions des marchands de gros proprement dits. Aussi, ils opèrent généralement dans un champ plus limité que les marchands de gros réguliers dans le même commerce. Le marchand de gros "pour emporter" achète et vend les marchandises à son propre compte, porte des stocks mais il ne donne pas de crédit et ne fait pas de livraison. Les expéditeurs à vue ont généralement comme place d'affaires un simple bureau d'où ils achètent ou vendent et où ils font les arrangements pour que les livraisons soient faites directement à l'acheteur par le producteur ou tout autre intermédiaire. De tels établissements, par conséquent, n'entreprennent autenne manutention des marchandises vendues. Le comptoir postal de gros fait à peu près toutes les opérations des marchands de gros réguliers et il n'en est distingué que par le fait que ses commandes sont sollicitées généralement par la poste et très souvent au moyen de catalogues. Les opérations des distributeurs ambulants consistent principalement dans l'achat de petites quantités de marchandises chez de plus gros distributeurs qu'ils revendent directement aux détaillants par des voitures ou des camions, comme colporteurs.
- (c) Les distributeurs de fournitures et de machinerie sont considérés comme des marchands de gros de service parce qu'ils remplissent la plupart des fonctions de ces marchands hien que leurs elients soient la plupart du temps des consommateurs industriels et autres établissements employant de la machinerie et de l'outillage lourds.
- II. Les dépôts d'huiles sont les grandes citernes faisant la distribution des produits du pétrole, principalement la gazoline et l'huile, par wagon-citerne aux stations de détail et autres acheteurs en gros. La majorité de ces dépôts sont la propriété des compagnies pétrolières et une partie du commerce de ces grands postes consiste dans le ravitaillement des stations de service propriété de la compagnie. Dans les sections rurales une bonne partie du commerce de ces grandes stations se fait directement avec les fermiers et les pêcheurs qui achètent au prix de gros.
- III. Les manufacturiers maintiennent des bureaux de ventes de district pour surveiller leurs intérêts dans certains territoires et plus particulièrement activer les ventes de leurs succursales dans ces districts. Ces bureaux régionaux prennent aussi des commandes et peuvent se charger souvent des services d'entreposage.
- IV. Les manufacturiers maintiennent des bureaux généraux de ventes qui surveillent les activités de leurs bureaux de district et de leurs succursales de ventes. En outre, les fortes commandes sont généralement remplies par les bureaux généraux de ventes et ces bureaux sont ceux qui s'occupent ordinairement du commerce d'exportation. Une partie du commerce déclaré par les bureaux généraux de ventes peut avoir son origine dans les succursales de ventes ou les bureaux de ventes de district et il peut y avoir un montant considérable de double emploi dans la valeur des ventes attribuées au siège social.
- V. Les succursales de ventes de manufacturiers sont des bureaux de ventes en gros maintenus par les manufacturiers. Leur but initial est d'obtenir des commandes pour les produits fabriqués par la compagnie mère. Bien que les succursales de ventes se limitent généralement sollieiter des commandes, il y a quelques commerces, particulièrement celui des appareils et de la machinerie électriques, où les succursales de ventes remplissent plusieurs des fonctions du marchand de gros, excepté que les produits offerts en vente se limitent presque entièrement aux marchandises fournies par les compagnies manufacturières mères. Les débouchés de gros des abattoirs et salaisons fonctionnent de la même manière que les marchands de gros de services et ils ont été considérés comme tels. Ils ne sont pas inclus pour cette raison avec les succursales de ventes des manufacturiers.

VI. Les marchands exportateurs sont des établissements de gros faisant l'exportation des denrées en vrac telles que le grain et le bois. Ils prennent possession des marchandises qu'ils vendent et par conséquent ressemblent à des exportateurs mais généralement ils ne portent pas de stocks et ils négocient les expéditions à faire de la source même de production. Ils sont ainsi comparables à des agents vendeurs.

VII. Les agents et courtiers s'occupent primairement à négocier l'achat ou la vente des denrées pour le compte de tierces personnes. Souvent ils ne voient pas même les marchandises et leur rôle est de trouver des acheteurs pour les producteurs domestiques ou étrangers. Les agents ou courtiers peuvent agir pour un ou plusieurs clients, peuvent vendre ou acheter une seule denrée ou plusieurs variétés de denrées. Ils ne prennent pas possession de la marchandise pour laquelle ils trouvent des acheteurs ou vendeurs et généralement les marchandises sont livrées directement à l'acheteur en gros par le producteur. Le revenu des courtiers provient d'honoraires ou commissions prélevés sur une proportion de la valeur ou de la quantité des marchandises vendues.

Les compagnies d'encanteurs font la distribution en gros des marchandises par vente à l'enchère. Ils ne prennent pas possession des marchandises qu'ils vendent et prélèvent un honoraire ou commission pour avoir négocié la vente.

Les courtiers sont les représentants soit des acheteurs, soit des vendeurs. Ils négocient les termes de la vente ou de l'achat mais ne prennent pas possession des marchandises ou ne sont pas facturés pour elles. Ils opèrent principalement dans les domaines de l'épicerie, des produits alimentaires et des produits de la ferme. Le revenu des courtiers provient d'honoraires et commissions basés sur la valeur ou la quantité des marchandises couvertes par leurs transactions. Les courtiers sont généralement libres de servir tout client désirant se prévaloir de leurs services.

Les marchands à commission diffèrent des courtiers en ce qu'ils s'occupent de la vente des marchandises qui leur sont consignées sur une base de commission. Les marchands à commission généralement manutentionnent les marchandises et négocient les règlements financiers qui résultent de leurs ventes. En outre de manutentionner les stocks en consignation ils peuvent aussi vendre des marchandises pour leur propre compte, dans lesquels cas ils remplissent les fonctions de marchands de gros.

Agents exportateurs. Sous cet en-tête paraissent différents types de marchands à commission se spécialisant dans les ventes sur les marchés extérieurs. Ils opèrent de la même manière que les autres agents sur le marché domestique.

Agents importateurs. Sous cet en-tête sont compris différents types de maisons à commission négociant les arrangements pour la vente au Canada de produits provenant des pays étrangers. Ils opèrent de la même manière que les autres agents dans le commerce domestique.

Les agents de manufacturiers sont les représentants des établissements manufacturiers avec lesquels ils entretiennent des relations continues. Leurs activités sont très semblables à celles des vendeurs réguliers des établissements manufacturiers, mais quelquefois les agents de manufacturiers portent de petits stocks leur permettant de rencontrer les demandes occasionnelles des marchands de gros ou de détail. De tels agents représentent généralement deux ou plusieurs manufacturiers dont les produits ne sont pas en concurrence bien que dans des lignes plutôt apparentées.

Les agents acheteurs et les acheteurs résidants sont, comme le terme le suggère, engagés dans l'achat de marchandises au nom de leurs clients avec lesquels ils ont généralement des relations bien établies. De tels acheteurs sont généralement localisés dans les plus grands centres de commerce de gros où ils peuvent acheter avantageusement pour leur principaux clients dont les établissements sont généralement situés à quelque distance des principaux marchés.

Les agents vendeurs sont des établissements de gros s'occupant de vente d'un ou plusieurs produits d'établissements manufacturiers. Ils diffèrent des autres agents en ce que généralement ils exercent plus de contrôle sur le marchandage des produits et qu'ils assument souvent une part considérable du financement des ventes. Les agents vendeurs diposent généralement de la production entière des maisons qu'ils représentent et ont une liberté considérable dans la délimitation du territoire qu'ils pourront couvrir et des conditions de vente des produits.

VIII. Les assembleurs et acheteurs de produits de la ferme opèrent à des points stratégiques ou dans les cités entourées de régions agricoles et ils achètent et vendent les produits agricoles. Dans ce groupe sont compris les négociants privés et les associations coopératives de ventes.

Les assembleurs de produits agricoles, les acheteurs de la ville et les acheteurs de la ferme sont tous engagés dans l'achat et la vente de produits agricoles, y compris le bétail pour expédition aux abattoirs ou aux marchés de consommation. Les assembleurs opèrent généralement indépendamment et pour leur propre compte tandis que les acheteurs de la ville et de la campagne sont souvent à salaire ou à commission et ont pour principaux les établissements de gros des plus grands centres.

Les coopératives de vendeurs sont des associations coopératives locales vendant à leur propre compte. Elles ne comprennent pas les associations vendant par l'intermédiaire d'une agence de ventes coopératives.

Les agences coopératives de ventes sont des bureaux centralisateurs de ventes maintenus par des associations coopératives pour assurer l'écoulement bien ordonné des produits agricoles. Ces agences coopératives vendent sur les plus grands marchés de denrées ou de bestiaux et s'occupent aussi d'exportation.

Elévateurs (indépendants). Ce terme désigne les élévateurs régionaux faisant des ventes à leur propre compte et non ceux qui se contentent de faire l'emmagasinage du grain.

Elévateurs (de ligne). Ce terme sert à désigner les bureaux de ventes des compagnies ayant des lignes d'élévateurs. Les ventes attribuées à ce type d'établissements de gros ne représentent pas la valeur des expéditions de grain partant des élévateurs de ligne mais bien les transactions complétées dans les bureaux centraux qui comprenient non seulement les ventes du grain acheté des fermes, soit par l'entremise directe des élévateurs de ligne, soit les grains manutentionnés sur une base de commission. Les autres détails sur les élévateurs de ligne couvrent seulement les opérations des bureaux de ventes.

Les dépôts de lait sont des stations rassemblant les produits, ou des dépôts placés dans les régions laitières qui rassemblent les produits laitières et les revendent à d'autres distributeurs de lait.

Les *emballeurs et les arrimeurs* sont des firmes engagées dans l'emballage et l'expédition des fruits et légumes à l'état naturel.

IX Les entrepôts de magasins en chaîne sont des établissements d'entreposage et de distribution aux magasins de détail de ces chaînes. La manufention des marchandises s'y fait à peu près de la même manière que chez les marchands de gros, mais le financement n'y figure pas, si ce n'est le facturage des marchandises. Les entrepôts des magasins en chaîne ont souvent comme annexes des bureaux on succursales qui s'occupent de la surveillance et de la comptabilité générales des magasins de détail de la chaîne dans un district quelconque.

X Les échanges de films occupent une position unique dans le domaine du gros. Ce sont des agences par lesquelles les films de eméma sont distribués aux théâtres et qui en même temps en encaissent le loyer. Les "ventes" déclarées par ces échanges de films consistent en plus grande partie en loyer seulement et représentent une très faible proportion de ventes réelles de marchandise

XI. Les entrepôts de distribution autres que ceux des magasms en chaîne sont des établissements de gros engagés principalement dans l'entreposage et la distribution de marchandises et n'exercent qu'occasionnellement les autres fonctions du marchand de gros. Les entrepôts de distribution existent principalement dans le commerce des breuvages alcooliques.

Genres de commerce.—Le commerce de gros a été divisé en vingt-cinq groupes principaux, suivant le caractère du commerce. Ces groupes principaux sont ensuite subdivisés en quatrevingts classifications qui, à leur tour, sont réparties en plus de 300 genres particuliers de commerce Chaque questionnaire du recensement a été examiné soigneusement et classifié suivant le genre de commerce désigné par l'article principal dans son chiffre d'affaires. Bien que dans certains cas les détails donnés par genres de commerce puissent indiquer la valeur des ventes des articles

spécifiés, dans d'autres maisons, quand le terme employé est plus large, ou lorsque des établissements vendent des denrées autres que celles indiquées par la classification, il n'y a aucune relation directe. Bien que chaque questionnaire de gros ait reçu sa classification exacte par genre de commerce, la publication de particularités pour chaque classification dépend du nombre de commerçants engagés dans ce genre de commerce. Quand il est impossible de donner des détails complets sans révéler les opérations d'un établissement individuel les classifications par genre de commerce sont combinées dans un groupe plus large et l'information est donnée pour celui-ci sculement. Pour l'ensemble de la province, où le nombre de rapports est relativement élevé, il est possible de donner des informations plus détaillées que pour les plus petites localités ou divisions territoriales où il y a quelques établissements sculement dans une ligne de commerce spécifique

Dans les tableaux publiés dans cette section, les classifications sont données sous une forme abrégée. La liste complète des classifications et des définitions des établissements de gros paraît ci-dessous.

Classification des établissements de gros selon le genre de commerce

(C'est-à-dire selon les principales marchandises qu'ils tiennent)

I. Articles de récréation, de sport et de photographie:

- Articles de récréation et de sport (excepté les appareils photographiques, l'outillage et les fournitures de cinématographie)—
 - (a) Articles de récréation et de sport (ligne générale).
 - (b) Bicyclettes et fournitures.
 - (c) Articles de sport (ligne générale).
 - (d) Jouets, nouveautés et pièces pyrotechniques.
 - (e) Autres articles de récréation et de sport (n'entrant pas dans les spécialités ci-dessus)
- 2. Appareils photographiques, cinématographiques et accessoires-
 - (a) Appareils photographiques et fournitures de photographie.
 - (b) Appareils de cinématographie.
 - (c) Films cinématographiques.
 - (d) Appareils de einéma parlant.

II. Automobile:

- 3. Automobiles et autres véhicules automoteurs—
 - (a) Automobiles et autres véhicules automoteurs (ligne générale).
 - (b) Automobiles (neufs et usagés).
 - (c) Camions et tracteurs,
- 4. Equipement automoteur-
 - (a) Accessoires
 - (b) Equipement (ligne générale, telle que pièces de rechange et accessoires).
 - (c) Equipement (spécialités).
 - (d) Equipement et radios (pièces de rechange et accessoires).
- 5. Pièces de rechange (neuves et usagées)—
 - (a) Pièces de rechange (neuves).
 - (b) Pièces de rechange (usagées).
- 6. Pneus et chambies à air.

III. Produits chimiques, pharmaceutiques et connexes:

- 7. Produits chimiques (industriels)—
 - (a) Chimiques industriels et raffinés (tels qu'alcool de grain, alcool de bois, poudres à polir en vrac, acides bruts, produits à base de goudron et matériel de marine)
 - (b) Teintures.
 - (c) Teintures, produits pour le dégraissage et produits connexes.
 - (d) Explosifs.
 - (e) Insecticides.

III. Produits chimiques, pharmaceutiques et connexes:-I'm.

- 8. Drogues et fournitures pharmaceutiques (ligne générale).
- 9. Drogues et fournitures pharmaceutiques (spécialités)-
 - (a) Drogues.
 - (b) Fournitures pharmacentiques.
 - (c) Médicaments brevetés.
 - (d) Articles en caoutchoue de pharmacie.
 - (e) Articles pour l'hygiène, insecticides, etc.
- Breuvages alcooliques—
 - (a) Vins et spiritueux.
 - (b) Autres breutages alcooliques.
- Peintures, vernis, laques et émaux.
- 12. Articles et préparations de toilette-
- (a) Articles de toilette
 - (b) Préparations de toilette.

IV. Charbon et coke:

- Charbon et coke—
 - (a) Charbon (ligne générale).
 - (b) Charbon anthracite.
 - (c) Charbon bitumineux.
 - (d) Charbon et coke.
 - (e) Combustible (y compris briquettes, tourbe et charbon de bois).

V. Vêtement et lingerie:

- 14 Vêtement et lingerie (à l'exclusion des modes et des chaussures)—
 - (a) Vêtement (ligne générale)
 - (b) Vêtement et lingerie.
 - (c) Vêtement, hommes et garçonnets
 - (d) Vêtement, femmes et enfants.
 - (e) Vêtements usagés.
 - (f) Lingerie (ligne générale).
 - (g) Lingerie, hommes et garçonnets.
 - (h) Lingerie, femmes et enfants.
 - (i) Fourrures et vêtements en fourrure.
 - (j) Chapeaux et rasquettes.
 - (k) Bonneterie.

 - (1) Autre vêtement et lingerie (tels que spécialités en eravates, chemises et vêtement de sport).
- 15. Marchandises sèches (ligne générale).
- 16. Marchandises sèches (spécialités, non spécifiées ailleurs)-
 - (a) Tricots.
 - (b) Autres marchandises sèches (spécialités telles que couvertures et autres non spécifiées ailleurs).
- 17. Modes et accessoires.
- 18. Nouveautés-
 - (a) Boutons.
 - (b) Gants.
 - (e) Dentelles et broderies
 - (d) Nouveautés (ligne générale).
 - (e) Garnitures et fournitures pour tailleurs.

V. Vêtement et lingerie:-Fin

- 19. Etoffes à la pièce-
 - (a) Cotonnades
 - (b) Toiles
 - (c) Etoffes à la pièce (ligne générale)
 - (d) Rayon
 - (e) Soieries et velouis
 - (f) Lamages et worsteds

20. Chaussures

VI. Appareils et outillage électriques:

- 21 Appareillage électrique-
 - (a) Matériel électrique (ligne générale).
 - (b) Appareils électriques (laveuses, grille-pain, cuisinières, percolateurs et fers à repasser).
 - (c) Glacières (électriques).
- 22 Outillage et fournitures électriques-
 - (a) Piles et accumulateurs
 - (b) Outillage et fournitures électriques (ligne générale).
 - (c) Moteurs et générateurs (d) Autres outiliage et fournitures électriques (y compris fil, câble, etc.).
- 23 Radios et accessones de radio.

VII. Produits de la ferme (non spécifiés ailleurs):

- 24 Coton (y compus déchets et graine de coton).
- - (a) Fleurs et produits des pépinières (y compris fleurs des fleuristes).
 - (b) Grames, bulbes et produits des pépinières.
- 26 C'éales-
 - (a) Avoine
 - (b) R1z
 - (c) Blé
 - (d) Cércales (ligne générale).

25 Fleurs et produits des pépin ères-

- (e) Autres céréales (telles que le seigle, l'orge et le mais).
- 27 Peaux et pelleteries-
 - (a) Pelleteries (apprêtées).
 - (b) Pelleteries (à l'état biut).
 - (e) Peaux
- 28. Bétail-
 - - (a) Chevaux (b) Bêtes à cornes

 - (c) Pores
 - (d) Bétail sur pied (ligne générale).
- 29 Tabae en feuilles
- 30 Laine et mohair.
- 31. Autres produits de la ferme-
 - (a) Produits de la ferme (non spécifiés ailleurs).
 - (b) Plumes.

VIII. Articles pour la ferme (à l'exclusion des machines agricoles et outillage):

- 32. Articles pour la ferme (à l'exclusion de la provende et des engr.us)—
 - (a) Artieles pour la ferme (ligne générale).
 - (b) Graines de semence.
 - (c) Paille
- 33. Provende-
 - (a) Provende (mélangée et autre).
 - (b) Provende et engrais
 - (c) Foin, gram et provende
- 34 Engrais et matériaux à engrais.

IX. Denrées alimentaires (non spécifiées ailleurs):

- 35. Confiserie et liqueurs douccs-
 - (a) Confiserie et liqueurs douces (ligne générale).
 - (b) Confiserie.(c) Liqueurs douces.
 - (c) Liqueurs douces.
- 36 Produits laitiers-
 - (a) Beurre
 - (b) Beune et fromage
 - (c) Fromage
 - (d) Produits laitiers (ligne génerale)
 - (e) Crème à la glace
 - (f) Last et crème
- 37. Produits laitiers et œufs.
- 38. Volailles et œufs-
 - (a) Œufs
 - (b) Volaille
 - (c) Volaille et œufs (ligne générale).
- 39 Poisson (frais, salé, fuiné, etc.).
- 40 Fiuits et légumes (frais)-
 - (1) Fruits
 - (b) Fruits et legumes (ligne générale)
 - (c) Produits de la ferme (y compris légimes, fruits, predeits laitiers, poisson, volaille œufs, etc. les deux premiers predommant)
 - (d) Legumes
- 41 Viandes et produits connexes -
 - (a) Viandes (mepuers)
 - (b) Viandes (h tiches)
 - (c) Vrandes et produits connexes (ligne genérale)
 - (d) Viandes et provisions (y compris voladles, œufs, produits lattiers, sandoux, etc.)

X. Produits forestiers (à l'exclusion du bois d'œuvre)

- 42. Caisses et pièces de tonnelleile-
 - (a) Boîtes et planchettes
 - (b) Tonnellene (bank, tonneaux, cuves, etc).
- 43 Billots, traverses de chemin de fei, pilotis, etc.-
 - (a) Bois de chauffage
 - (b) Billots, picux et poteaux
 - (e) Bois de pulpe.
 - (d) Traverses de chemin de fer.
- 44 Autres produits forestiers (y compris ustensiles en bois, bois de pulpe, blocs de tourn ige, aiguilles de pin, etc.)

XI. Ameublement et accessoires:

- 45. Amcublement—
 - (a) Ameublement (ligne générale)
 - (b) Ameublement de maison.
 - (c) Meubles de bureau.
 - (d) Autre ameublement (spécialités).
- 46. Accessoires -
 - (a) Objets d'art.
 - (b) Balais et brosses.
 - (c) Porcelaine, venerie, faience et poterie
 - (d) Rideaux et draperies.
 - (c) Tapis, etc.
 - (f) Articles de ménage (ligne générale).
 - (g) Fournitures de ménage.
 - (h) Lampes et abat-jour.
 - (i) Tableaux et cadres.
- 47. Instruments de musique et musique en feuilles-
 - (a) Instruments de musique, accessoires et pièces détachées.
 - (b) Musique en feuilles.

XII. Marchandise générale (établissements s'occupant de la vente, en proportions considérables, de trois lignes distinctes ou plus).

XIII. Epiceries et spécialités alimentaires:

- 48. Epiceries (ligne générale).
- 49. Spécialités, épicerie et autres denrées alimentaires-
 - (a) Produits de la boulangerie.
 - (b) Biscuits et biscottes.
 - (c) Conserves de fruits et de légumes.
 - (d) Conserves (ligne générale).
 - (e) Conserves de poisson.
 - (G) Conserves de pois
 - (f) Céréales.
 - (g) Café, thé, épices et cacao.
 - (h) Extinits et épices.
 - (i) Farme.
 - (i) Farine et provende,
 - (k) Fruits et légumes séchés
 - (l) Sucre.
 - (m) Autres spécialités en épicerie et denrées alimentaires (telles que mayonnaises, cornichons, marmelades et gelées).

XIV. Quincaillerie:

- 50. Quincaillerie (ligne générale).
- 51. Quincaillerie (spécialités)—
 - (a) Ferronnerie de construction
 - (b) Ferronneric lourde.
 - (c) Quincaillerie de rayons.
 - (d) Outils et coutellerie.
 - (e) Autre quincaillerie (spécialités telles que quincaillerie pour portes, grillages ornementaux, plaques d'enseigne et quincaillerie pour navires).
 - (f) Quincaillerie et radios.
 - (g) Quincaillerie et plomberie.
 - (h) Quincaillerie et autres lignes non spécifiées.

XV. Mitraille de fer et d'acier et autres déchets:

- Déchets de fer et d'acier.
- 53. Ferraille et déchets.
- 54. Autres déchets-
 - (a) Saes, entoilage, etc.
 - (b) Bouteilles, etc.
 - (c) Vieux papier
 - (d) Chiffons.
 - (e) Articles de seconde-main (ligne générale).

XVI. Bijouterle et articles d'optique:

- 55. Bijouterie-
 - (a) Horloges et montres.
 - (b) Diamants et autres pierres précieuses.
 - (c) Bijouterie (ligne générale). (d) Argenterie.
 - (e) Autres articles de bijouterie (tels que pierres demi-précionses, montures, ornements et bijoux-nouvcautés).
- 56. Articles d'optique.

XVII. Cuir et articles en cuir (à l'exclusion des gants et des chaussures):

- 57. Cuir et articles en cuir (ligne générale).
- 58. Cuir et courroies-
 - (a) Courroles (cuir).
 - (b) Cuir (ligne générale).
 - (c) Accessoires pour cordonnerie.
- 59. Malles, valises et autres articles en cuir-
 - (a) Articles en cuir (non spécifiés ailleurs).
 - (b) Malles, valises, etc.

XVIII. Bois et matériaux de construction (autres qu'en métal):

- 60. Matériaux de construction (autres que le bois et métal)-
 - (a) Articles en amiante.
 - (b) Brique et tuile.
 - (c) Matériaux de construction (ligne générale).
 - (d) Pierre.
 - (e) Ciment.
 - (f) Vitre.
 - (g) Granit et marbre.

 - (h) Chaux, plâtre, etc. (1) Peinture, vitre et papier-tenture.
 - (j) Matériaux pour toitures (non-métalliques)

 - (k) Sable, gravier et pierre concassée. (I) Autres matériaux de construction (tels que cartons et autres matériaux d'isolation, carton-liège et pierre ornementale).
- 61. Bois de construction et bois ouvré-
 - (a) Bois de construction.
 - (b) Bois de construction et bois ouvré.
 - (c) Bois ouvré.

ETABLISSEMENTS DE COMMERCE ET DE SERVICE, 1931

K. Machines, équipement et fournitures (sauf électriques):

- 62. Equipement commercial et fournitures—
 - (a) Equipement et fournitures pour boucherie.
 - (b) Outillage pour stations d'essence et fournitures
 - (c) Equipement et fournitures pour hôtelleries et restaurants.
 - (d) Equipement et fournitures de bureaux (ameublement non compris).
 - (e) Equipement et fournitures pour fontaines à soda.
 - (f) Equipement et fournitures pour magasins (ligne générale).
 - (g) Autre équipement commercial et fournitures
- 63. Outillage et fournitures de construction-
 - (a) Fournitures pour entrepreneurs.
 - (b) Machines pour la construction (telles que bétonnières, machines à polir excavateurs et niveleuses).
 - (c) Machinerie, équipement et fournitures pour la construction (ligne générale).
 - (d) Machines routières et équipement.
- 64 Machines et équipement agricoles—
 - (a) Equipement pour laiteries.
 - (b) Instruments aratoires (tels que herses, charrues, etc.)
 - (c) Machines et équipement agricoles (tels que moissonneuses, lieuses, chargeurs de foin, machines fixes, pompes et moto-pompes, charrues polysoc, semeuses, etc.)
- 65. Machines, matériel et accessoires pour manufactures, scieries, mines et forages—
 - (a) Equipement de boulangeries et fournitures.
 - (b) Bouteilles et équipement d'embouteillage.
 - (c) Outillage de conserverie.
 - (d) Appareils transporteurs et de levage
 - (e) Appareils de forage. (f) Equipement et fournitures de fonderies.
 - (g) Equipment et fournitures pour bijoutiers.

 - (h) Machinerie, outillage et fournitures pour scieries
 - (i) Machines-outils.
 - (j) Accessores pour machines (tels que courroles, garnitures, boyaux, badernes et rabats à recul).
 - (k) Fournitures pour mines et moulins (ligne générale).
 - (l) Machinerie, outillage et fournitures pour l'exploitation mimère.
 - (in) Machines, outillage et fournitures pour l'extraction du pétrole.
 - (n) Moteurs.
 - (o) Outillage d'usines génératrices (tel que chaudières, condensateurs, tamis pour injecteurs et chargeurs mécaniques).
 - (p) Outillage d'imprimerie et lithographie.
 - (q) Pompes, pièces détachées et fournitures pour pompes.
 - (r) Machines et fournitures pour fabriques de chaussures.
 - (s) Machines textiles et accessoires.
 - (t) Appareils pour souder.
 - (u) Autres machines, équipement et fournitures utilisés dans l'industrie (y compris machinerie usagée).
- 66. Professions libérales, équipement et fournitures—
 - (a) Equipment et fournitures pour artistes.
 - (b) Equipement et fournitures pour églises.
 - (c) Equipement et fournitures pour dentistes.
 - (d) Fournitures pour pharmaciens.
 - (e) Equipement et fournitures pour écoles.
 - (f) Outillage scientifique et de laboratoire.
 - (g) Outillage et fournitures pour chirurgiens, médecins et hôpitaux.

XIX. Machines, équipement et fournitures (sauf électriques):-Fin.

- 67. Services, outillage et fournitures-
 - (a) Salons de coiffure et de beanté.
 - (b) Nettoyeurs pour établissements de dégraissage à sec et produits connexes.
 - (c) Equipement de protection contre l'incendre.
 - (d) Equipement et fournitures pour concierges
 - (e) Equipement et fournitures pour buanderies.
 - (f) Equipement et fournitures pour plombiers.
 - (g) Equipement et fournitures pour services (ligne générale).
 - (h) Equipement et fournitures pour cordonniers.
 - (i) Fournitures pour entrepreneurs de pompes funêbres.
 - (j) Fournitures pour tapissiers.
 - (k) Equipement et fournitures pour entrepôts.
 - (1) Autres services, ontillage et fournitures (spécialités).

68. Transports, outillage et fourniture -

- (a) Aéroplanes et outillage d'aéronautique.
- (b) Outillage et fournitures pour chemins de fer.
- (c) Equipement et outillage pour navires.
- (d) Autre outillage et fournitures pour transports (tels que transports, voies à câbles, embarcations actionnées par moteur (commerce), tubes à air comprimé).

XX. Métaux et ouvrages en métal:

- 69. Fer et acier (à l'exclusion de la mitraille)-
 - (a) Coulages (métal).
 - (b) Fer et acier (à l'exclusion de la mitraille).
 - (c) Ouvrages en fer et en acier (non spécifiés ailleurs).

70. Métaux non-ferreux et ouvrages en métal non-ferreux—

- (a) Laiton et ouvrages en laiton.
- (b) Cuivre.
- (c) Métaux (ligne générale).
- (d) Tôlerie.
- (e) Etain.
- (f) Autres métaux et ouvrages (tels que nickel, bronze, aluminium et matériaux à alhages).

XXI. Papier et articles en papier:

- 71. Papier et articles en papier (ligne générale).
- 72. Papier et articles en papier (spécialités, non spécifiées ailleurs)—
 - (a) Papier.
 - (b) Papier d'emballage et sacs en papier.
 - (c) Autres articles en papier (tels que nonveautés, papier-mâché, serviettes, papierbuyards, calendriers et ornements).
- Papeterie et accessoires.
- 74. Papier-tenture.

XXII. Pétrole et dérivés:

- Pétrole et dérivés—
 - (a) Pétrole de chauffage.
 - (b) Gazoline et huile.

 - (c) Gazoline et naphte.
 - (d) Graisses et huiles de graissage
 - (e) Pétrole et dérivés (ligne générale).
 - (f) Autres dérivés du pétrole (tels que kérosène, préparations pour le dégraissage, matériel pour la construction routière, peintures bitumineuses et asphaltes).

XXIII. Equipement et fournitures de plomberie et chauffage:

- 76. Equipement et fournitures de plomberie-
 - (a) Tuyaux, valves et accessoires
 - (b) Matériel de plomberie et d'usine.
 - (c) Equipement et fournitures de plomberie et de chauffage (ligne générale).
 - (d) Clacières (au gaz).
 - (c) Autres équipement et fournitures de plomberie et chauffage (y compris appareils de ventilation).
- 77. Equipement et fournitures de chauffage-
 - (a) Fournaises.
 - (b) Equipement de chauffage (ligne générale).
 - (c) Brûleurs d'huile.
 - (d) Poéles et cuisinières.

XXIV. Tabacs et produits du tabac (à l'exclusion du tabac en feuilles):

- 78. Produits du tabac (ligne générale, à l'exclusion du tabac en feuilles)—
 - (a) Cigares.
 - (b) Cigares, cigarettes et tabacs.
 - (c) Tabacs.
 - (d) Tabacs et confiserie.

XXV. Tous autres:

- 79. Livres, inagazines et journaux-
 - (a) Livres et magazines.
 - (b) Journaux et magazines.
- 80. Huiles, graisses, savons et cires-
 - (a) Hules animales (v compris graisses et suifs).
 - (b) Huiles essentielles.
 - (c) Savons.
 - (d) Huiles végétales (graine de coton, de lin, etc.)
 - (c) Circs et crèmes de cirage, etc.
- 81. Articles en caoutchouc (ligne générale, chaussures, articles mécaniques, articles de pharmacie, pneus, chambres à air et accessoires).
- 82. Textiles (à l'exclusion du vêtement et de la lingerie)-
 - (a) Sacs et entoilage.
 - (b) Cordes et ficelles.
 - (c) Textiles, autres que vêtement, etc. (ligne générale).
 - (d) Filés.
 - (c) Autres textiles (à l'exclusion du vêtement, etc., non spécifiés ailleurs).
- 83. Divers genres de commerce-
 - (a) Matériel de réclame et propagande (tel que calendriers, enseignes et nouveautés en celluloide et métal).
 - (b) Paniers.
 - (c) Farine, provende et charbon.
 - (d) Glace.(c) Nouveautés.
 - (f) Caoutchouc brut.
 - (g) Articles de fumeur.
 - (h) Divers genres de commerce (non spécifiés ailleurs).

EXPLICATION DES TERMES

Nombre d'employés.—Le nombre d'employés montré ici est celui des employés à temps entier sur les listes de paie des établissements faisant rapport. Généralement, le nombre moyen d'employés par année est celui déclaré mais en certains cas c'est le nombre d'employés sur la liste de paie la journée qu'a été rempli le rapport. Le terme "employé" couvre toutes personnes, autres que les propriétaires et membres de la firme, recevant des salaires, des gages ou commissions et comprend les vendeurs, les administrateurs et toutes autres personnes employées sur une base de temps entier.

Salaires et gages.—Sous cet en-tête paraissent les montants payés en salaires et gages au cours de l'année; le revenu des propriétaires et membres de la firme ne paraissent pas ici.

Propriétaires et membres de la firme.—Ce terme doit couvrir tous les propriétaires d'établissements non incorporés consacrant tout leur temps ou la plus grande partie de leur temps à l'administration de l'établissement faisant rapport. Le questionnaire du recensement demande l'indication des propriétaires et membres de la firme sous deux rubriques: (a) propriétaires et membres de la firme ne recevant pas un salaire spécifié ou une commission; et, (b) propriétaires et membres de la firme recevant un salaire spécifié. Dans ce dernier cas le mentant du salaire (ou de la commission) reçu durant l'année doit être spécifié. Malheureusement, ce dernier terme est souvent mal interprété et on a donné connue réponse le revenu brut de l'établissement ou quelque autre montant erroné. Toutefois, partout où l'information paraissait raisonnablement correcte elle a été recueille et paraît dans les tableaux. Il y a raison de croire que si les chiffres des salaires des propriétaires sont analysés soigneusement, ils donneront une idée assez exacte des revenus nets des membres de cette classe.

Toutes autres dépenses.—Sous cet en-tête sont inclus toutes dépenses autres que les salaires et gages. Le questionnaire avait des en-têtes distincts pour loyers, dépenses des vendeurs et intérêts sur l'argent emprunté pour fins d'opération. Toutefois, dans le présent rapport tous ces item fondus ensemble apparaissent sous cette forme dans les tableaux.

Bien que l'information fournie par chaque établissement de gros sur sa liste de paie et sur le loyer fût généralement complète plusieurs firmes n'ont pu fournir des chiffres aussi exacts pour leurs autres dépenses. Le manque d'uniformité dans la comptabilité des établissements de commerce tend aussi à rendre difficile une interprétation uniforme des réponses sur les dépenses. Malgré les instructions données sur la mamère de déclarer toutes autres dépenses il y a des signes d'une divergence considérable dans la nature des item inclus sous cet en-tête par les établissements faisant rapport. Toutefois, on croit que dans les genres d'affaires fournissant un échantillon relativement considérable de statistiques sur les frais d'opération il y a indication assez juste des frais généraux dans le commerce du domaine du gros.

Les ventes nettes sont établies en déduisant des ventes brutes les marchandises retournées et les allocations faites aux clients dans le cas d'établissements s'occupant du financement des ventes. Dans les autres cas les ventes nettes représentent les commandes remplies au cours de l'année.

Stocks en mains.—Cet item couvre le prix coûtant ou la valeur de remplacement des marchandises en main pour vente le 31 décembre 1930 ou à la date du dernier inventaire. La relation entre la valeur des stocks en main et des ventes nettes n'indique pas la rapidité de l'écoulement pour deux raisons; premièrement, les ventes et les stocks ne sont pas évalués de la même manière; les ventes représentent le prix final reçu pour les ventes et les stocks représentent le coût des marchandises; deuxièmement, pour calculer le taux d'écoulement il serant nécessaire de connaître la valeur moyenne des stocks portés au cours de l'année et non seulement la valeur des stocks en mains à la fin de l'année financière et qui peut ne pas représenter une moyenne de toute la période.

Les ventes à crédit couvrent toutes les ventes qui ne sont pas faites sur une base de comptant. Plusieurs établissements n'ont pas fait de distinction entre leurs ventes à crédit et leurs ventes au comptant. Les pourcentages de ventes à crédit comparativement aux ventes totales montrées dans les tableaux sont basés uniquement sur les réponses des établissements oui ont répondu clairement à cette question.

Ventes aux consommateurs industriels.—Ces ventes sont celles faites par les établissements de gros aux firmes industrielles sous forme de matières premières, fournitures et outillage. Là aussi les réponses n'ont pas été données clairement par tous les établissements de sorte que la valeur des ventes qui y paraît peut bien ne pas représenter la valeur totale de toutes ces transactions.

Le capital engagé est la valeur du capital (argent, bâtiments, marchandises, etc.), immobilisé dans le commerce de gros. Il comprend la valeur de la propriété, des stocks en main ainsi que tout autre capital immobilisé.

Ventes par marchandises.—En outre de fournir des chiffres sur les ventes nettes, chaque établi-sement de gros a été priée de fournir une liste de ses ventes par principales lignes de marchandises et si possible par item détaillés dans chaque classe majeure. Bien que plusieurs établissements n'aient pu fournir un rapport détaillé des ventes par articles, plusieurs commerces ont pu donner une très grande proportion de leurs ventes par classes majeures. Sur cette base on peut montrer les proportions des ventes totales du commerce de gros entrant dans chaque groupe majeur d'articles ou de marchandises—tels que "épiceries, ferronneries, drogues, etc." Il est aussi possible de déterminer jusqu'à quel point certaines classes de marchandises sont manutentionifes par plus d'un genre de commerce, comme par exemple les cigares, cigarettes et tabac, qui entrent dans le commerce des drogues, des épiceries, des tabacs, etc.

DESCRIPTION DES TABLEAUX POUR LE DOMINION

PRINCIPAUX FAITS DU COMMERCE DE GROS

Ce tableau présente les traits saillants du commerce de gros au Canada et il est comparable à celui des principaux faits du commerce de détail paraissant dans les divers tableaux du commerce de détail du Recensement des Etablissements de Commerce et de Service.

STATISTIQUES PRINCÍPALES DU COMMERCE DE GROS, PAR PROVINCES

Ce tableau donne un sommaire du commerce de gros du Dominion dans son ensemble et de chaque province en particulier. Ce tableau est divisé en deux sections. La première présente des données sur l'ensemble du commerce de gros, tandis que la deuxième se limite aux maisons de gros.

STATISTIQUES PRINCIPALES DU COMMERCE DE GROS, PAR CITÉS

Ce tableau donne un résumé des chiffres du commerce de gros dans son ensemble dans chaque cité de 20,000 âmes et plus. Il montre le nombre d'établissements, l'emploiement et les salaires, les ventes nettes, la valeur des stocks en mains à la fin de l'année. Il donne aussi le nombre d'établissements et la valeur des ventes des maisons de gros.

Tableau 1.*—Résumé du commerce de gros

Le tableau 1A présente un résumé du commerce de gros dans chacune des 25 classifications majeures par genre de commerce pour tous les types d'établissements combinés. Il montre le nombre des établissements, des propriétaires ne recevant pas un salaire fixe et des propriétaires recevant un salaire spécifié et le montant reçu, les employés des deux sexes, les salaires et gages, les stocks, les ventes nettes, les ventes à crédit, les ventes aux consommateurs industriels et le capital. Le tableau 1B donne la même information pour les maisons de gros.

TABLEAU 2.*—COMMERCE DE GROS PAR TYPES D'ÉTABLISSEMENTS

Ce tableau donne les traits saillants du commerce de gros par types. Il comprend les maisons de gros et autres établissements de gros classifiés par types.

^{*}Des tableaux semblables à ceux marqués d'un astérisque paraissent dans chacune des sections provinciales.

Tableau 3.*—Maisons de gros, par genres de commerce.

Le tableau 3 se limite aux maisons de gros seulement et donne les chiffres pour les classifications détaillées par genres de commerce.

Tableau 4.*—Maisons de gros, frais généraux par genres de commerce

Ce tableau donne les frais d'opération de toutes les maisons de gros ayant fourni cette information. Les données couvrant chaque classification majeure et sous-groupes et ensuite chaque genre sélectionné de commerce. Les dépenses paraissent sous les en-têtes: salaires et gages des employés et les dépenses totales incluent les salaires et gages.

TABLEAU 5.*—COMMERCE DE GROS PAR GENRES DE COMMERCE

Ce tableau donne les principales statistiques de tous les établissements de gros y compris les maisons de gros par genres de commerce.

TABLEAU 6.*—Types d'établissements par genres de commerce.

Le tableau 6 montre le nombre d'établissements et leurs ventes nettes par types classifiés par genres de commerce.

Tableau 7.*—Frais généraux, par types d'établissements et par genres de commerce

Ce tableau donne les frais d'opération des autres établissements de gros classifiés par type d'établissement et genres de commerce.

Tableau 8.*—Constitution dus établissements

Le tableau SA présente les principales statistiques du commerce de gros classifiées selon l'organisation; propriétaires individuels, sociétés, corporations ou associations coopératives. Le tableau SB présente les mêmes informations pour maisons de gros.

Tableau 9.*—Ventes de détail par établissements de gros et vintils de gros par établissements de détail

Le tableau 9 présente le commerce de détail par établissements de gros et le commerce de gros par établissements de détail pour montrer jusqu'à quel point ces deux commerces débordent l'un sur l'autre. La plus grande partie de ce débordement se rencontre dans des genres semblables de commerce. Des résumés pour chaque province paraissent dans la deuxième partie de ce tableau

TABLEAUX 10 ET 11.*—ORGANISATIONS MULTIPLES

Le tableau 10 montre le nombre d'établissements et les ventes nettes par établissement dépendant d'un même propriétaire, pour les maisons de gros, classifiées par genres de commerce. Le tableau 11 présente des informations semblables sur les autres établissements en gros. Il est ainsi possible de déterminer le nombre d'établissements en opération commerce individuel et le montant des ventes par les établissements indépendants. De même, une information similaire peut être obtenue sur les compagnies opérant 2, 3 à 5, 6 à 25 établissements, et plus. Comme des firmes peuvent opérer des unités dans plus d'une province ou plus d'un genre de commerce ou même dans plus d'un domaine, le nombre d'établissements paraissant sous un en-tête particulier peut ne pas concorder avec le nombre donné dans l'en-tête.

TABLEAUX 12 ET 13.*-VENTES PAR GRANDEUR DU COMMERCE

Dans le tableau 12 les maisons de gros out été groupées selon leur montant de ventes nettes par groupes majeurs et genres de commerce. Dans le tableau 13 les autres établissements de gros sont classifiés de la même manière. Ces tableaux permettent de mesurer l'activité de chaque commerce par les établissements faisant un différent volume d'affaires.

^{*}Des tableaux semblables à ceux marqués d'un astérisque paraissent dans chacune des sections provinciales.

Tablidaux 14 et 15.—Nombre d'imployés par régions économiques et chiffre d'affaires

Ces tableaux montrent la distribution des employés par le volume d'affaires de tout le Canada dans son ensemble et de chaque région économique. Le tableau 14 donne ces informations sur les maisons de gros seulement et le tableau 15 présente les mêmes données sur les autres établissements de gros.

Tableau 16.—Continuité de propriété

Ce tableau classifie les établissements de gros qui ont déclaré la période écoulée depuis qu'ils sont exploités par leurs propriét ires actuels. Il ne faut pas confondre cette information avec la perspective de durée d'un établissement parce qu'il est impossible de connaître le nombre d'établissements qui peuvent avoir commencé leurs opérations en une année donnée. Ce tableau est divisé en deux sections. La première présente des données sur l'ensemble du commerce de gros, tandis que la deuxième se limite aux maisons de gros.

Tableaux 17 et 18. '-Ventes par catégories de marchandises

Les chiffres sur les ventes de marchandises ou articles spécifiés sont basés sur les réponses des établissements de gros ayant fourni une analyse de leurs ventes en énumérant les articles vendus. Il a été demandé à chaque firme de fournir une répartition de ses ventes, au cours de l'année, par principaux groupes de denrées, et si possible, par lignes détaillées. Il n'a pas été possible à tous les établissements de fournir de telles informations, mais dans la plupart des commerces, une grande proportion des ventes ont été déclarées sous des en-têtes spécifiés. Un nombre considérable d'établissements de gros out pu donner un état détaillé de leurs ventes par articles spécifiés.

Le tableau 17 montre l'étendue de la couverture en marchandises pour le commerce de gros et les maisons de gros classifiées par leur principal genre de commerce. La couverture en marchandises est la proportion du total net des ventes répartie entre un certain nombre de lignes spécifiées. Comme chaque établissement de gros n'a pas déclaré toutes ses ventes par lignes spécifiées, les ventes totales analysées par denrées sont généralement moins considérables que le total des ventes de tout le commerce. Toutefois, dans certains genres de commerce les ventes ont été déclarées en entier par articles—et dans tels cas, la couverture est de 100 p.c. Comme les ventes par denrées parnissent en dollars, il est suggéré qu'en se servant de ces chiffres pour tout article spécifié, le lecteur tienne bien compte de ce qu'est la couverture d'une denrée dans les commerces où cette denrée spécifié est en plus grande partie distribuée.

Bien que les chiffres sur les ventes des établissements de gros puissent aider matériellement à déternimer les chenaux par lesquels s'écouleut les denrées depuis le producteur jusqu'au consommateur, ainsi que le volume des ventes de denrée spécifiée, ils ne donnent pas nécessairement un portrant complet des premières étapes de la distribution. En premier lieu, une partie considérable de la production s'écoule directement du producteur au détaillant, au consommateur ou à l'industriel, sans passer par les établissements de gros. Deuxièmement, il y a une quantité considérable d'importations directes ne passant pas par les établissements de gros. Troisièmement, il a double emploi des chiffres de ventes partout où un établissement de gros vend à un autre établissement de gros pour revente. De telles ventes sont généralement faites par des agents et des courtiers, mais des agences de ventes de manufacturiers, des importateurs et autres types de marchands de gros transigent aussi des affaires avec d'autres établissements de gros. Finalement, les ventes pour exportation par les établissements de gros représentent des marchandises qui ne sont pas distribuées à l'intérieur du Canada. Ces facteurs entrent dans les statistiques du commerce de gros et rendent extrêmement difficile de mesurer avec précision la valeur des marchandises distribuées à l'intérieur du Canada.

Le tableau 18 montre la valeur des ventes déclarées par articles pour chaque classification majeure d'article. Les ventes globales nettes de tous les établissements de gros paraissent au commencement du tableau. Sous cet en-tête paraît la valeur des ventes qui ne sont pas déclarées par articles ou denrées. Ces ventes sont soustraites des ventes totales laissant un résidu désigné comme "ventes de marchandises déclarées". Le total de celles-ci est ensuite montré pour les maisons de gros et autres établissements de gros. Les denrées et articles sont ensuite indiqués.

^{*}Des tableaux semblables à ceux marqués d'un astérisque paraissent dans chacune des sections provinciales.

Pour chaque denrée on y voit: (1) les ventes totales déclarées; (2) les ventes déclarées par les maisons de gros et autres établissements de gros; (3) les ventes déclarées par chaque commerce; (4) les types d'établissement pour chaque groupe de commerce vendant les marchandises mentionnées.

ANALYSE DES RÉSULTATS Etendue du commerce de gros

Le Recensement des Etablissements de Commerce et de Service a relevé l'evistence de 13,140 établissements de gros. Les ventes nettes de ces maisons pendant l'année 1930 se sont chiffrées à \$3,325,210,300 et la valeur des capitaux immobilisés dans le commerce de gros s'élevait à \$759,-439,500, dont \$297,221,100 représentait la valeur des stocks en mains à la fin de l'année. Le nombre de personnes employées dans le commerce de gros en 1930 était de 96,737, dont 90,564 classées comme employée, et 6,173 comme propriétaires ou membres des firmes. On comptait 75,364 employés de sexe masculin et 15,200 de sexe féminin. La somme globale de la rémunération payée aux employés durant l'année s'est élevée à \$146,346,600.

Commerce de gros, par types d'établissements

Le chiffre global des ventes, soit \$3,325,210,300, indiqué pour tous les établissements de gros pour l'année 1930 se décompose en \$1,111,319,200 de ventes déclarées par les maisons de gros, et \$2,213,891,100 de ventes déclarées par les autres établissements de gros. Ainsi, 33 · 12 pour cent du commerce de gros va aux maisons de gros, et 66 · 58 pour cent aux autres établissements de gros. Naturellement, ces chiffres comprennent les divers doubles emplois déjà signalés dans le présent rapport.

Bien que les maisons de gros ne se soient attribué que le tiers du cluffre d'affaires global, elles ont employé plus de la moitié du personnel occupé au commerce de gros, et payé plus de la moitié des émoluments qu'out touchés les employés. Ce fait tend à démontrer que, dans l'ensemble, les maisons de gros rendent plus de services que les autres établissements de gros.

Le type le plus important de distributeur en gros est le marchand de gros, tant au point de vue du nombre d'établissements qu'à celui du chiffre d'affaires. D'après le recensement, il existait 4,031 marchands de gros; leurs ventes se chiffraient à \$887,878,600, soit 26.70 pour cent de tout le commerce de gros. Venaient ensuite, au point de vue du volume d'affaires, les succursales de ventes de manufacturiers, qui étaient au nombre de 1,428 et avaient exécuté des commandes pour une valeur de \$556,530,300, soit 16.74 pour cent des ventes globales. Les bureaux de ventes de district et les bureaux généraux de ventes, que l'on peut grouper avec les succursales de ventes de manufacturiers, étaient au nombre de 118 et leur chiffre d'affaires atteignait \$198, 379,400, soit 5.90 pour cent du total.

Le deuxième groupe, au point de vue du nombre d'établissements, était celui des dépôts d'huiles, dont il existait 3,602, au chiffre d'affaires global de \$154,851,800, soit 5.56 pour cent de tout le commerce de gros. Les entrepôts de magasius en chaîne, au nombre de 79 sculement, avaient un chiffre d'affaires de \$161,912,300, soit 4.57 pour cent du total.

Dans le domaine du marché des produits agricoles, les coopératives de vendeuis et les agences de ventes jouent un rôle important. Les ventes de ces deux types d'établissements se sont chiffrées à \$216,315,900, soit 6-51 pour cent du commerce total. Les élévateurs de ligne (bureaux des ventes) ent réalisé un chiffre d'affaires de \$125,716,900, ou 3-78 pour cent du total, par l'intermédiaire de leurs 38 bureaux. Les autres assembleurs et acheteurs de produits de la ferme étaient au nombre de 634, et leurs ventes ou achats ont représenté environ 1 pour cent de tout le commerce de gros.

Les négociants spécialisés dans le commerce avec l'étranger sont les importateurs, les exportateurs et les marchands d'exportation agissant pour leur propre compte, ainsi que les agents d'importation et d'exportation. Les 809 importateurs forment le groupe le plus important, avec un chiffre de ventes de \$164,461,800 ou 4.95 pour cent de tout le commerce de gros. Les ventes des marchands d'exportation, atteignant \$143,389,300, ont représenté 1.31 pour cent du total et celles des exportateurs se sont élevées à \$36,220,600, soit 1.09 pour cent. Les agents d'exportation, considérés comme groupe distinct, ont effectué des ventes représentant près de 2 pour cent de tout le commerce de gros; pour les agents d'importation, la proportion a été de 3 pour cent. Les chiffres relatifs aux négociants importateurs et exportateurs ne représentent pas le volume entier du commerce avec l'étranger; ils indiquent simplement la valeur des affaires transigées par des négociants spécialisés.

Dans le groupe des agents et des courtiers, les 825 agents de manufacturiers forment le plus important type d'établissement, avec un chiffre de ventes de \$127,457,900, soit 3.83 pour cent de tout le commerce de gros. Les ventes des marchands à commission ont atteint \$101,311,800, ou 3.05 pour cent du total. Les courtiers, sauf ceux qui s'occupent des grains, ont exécuté des commandes d'une valeur de \$67,250,700, ou 2.02 pour cent du total; dans le cas des courtiers faisant la vente de grains au comptant le montant des commandes a été de \$62,860,500, c'est-à-dire 1.89 pour cent.

Il y avait 85 distributeurs de machineries, aux ventes de \$15,521,900, ou 0·47 pour cent de toutes les ventes. Les grossistes à fonctions limitées ne figuraient pas parmi les importants distributeurs en gros. Les expéditeurs à vue, au nombre de 42, avaient un chiffre de ventes de \$6,454,700. Les échanges de films, au nombre de 63, ont négocié des affaires pour \$9,808,500, et les 137 entrepôts de distribution ont déclaré des ventes de \$12,888,100.

Commerce de gros, par genres de commerce

L'analyse du commerce de gros par genres de commerce a été effectuée pour tous les types d'établissements de gros, de même que pour les maisons de gros. Si l'on jette un coup d'œil général sur le commerce de gros, on constate que le groupe le plus important, quant au volume d'affaires, est le commerce des produits agricoles autres que les produits alimentaires et les fournitures pour cultivateurs. Les ventes de ce groupe ont atteint \$649,159,100, soit 19·52 pour cent de tout le commerce de gros. La section la plus importante était le sous-groupe des grains, qui avait un chiffre de ventes dépassant \$500,000,000. Ce genre d'affaires a été déclaré surtout par les négociants des bourses de grains et il comprend un volume considérable de ventes d'exportation.

Le groupe de l'épicerie et spécialités alimentaires se classait deuxième en importance, avec des ventes de \$463,007,200 ou 13·93 pour cent du total. Si l'on joint le groupe des denrées alimentaires (n.s.a.) au groupe de l'épicerie, les ventes des négociants en produits alimentaires se trouvent à représenter \$830,840,800, soit près du quart de tout le commerce de gros.

Le groupe principal venant ensuite était celui des vêtements et de la lingerie, avec des ventes de \$235,365,200, soit 7.08 pour cent du total. Il était suivi du groupe "pétrole et dérivés" avec \$220,375,500, ou 6.63 pour cent. Le seul autre groupe accusant des ventes dépassant 5 pour cent du total était celui des produits chimiques, pharmaccutiques et connexes, avec \$174,595,600, ou 5.25 pour cent.

Neuf groupes accusaient des ventes variant entre \$66,000,000 et \$106,000,000, e'est-à-dire de 2 à 5 pour cent du commerce total. Par ordre d'unportance, e'étaient les suivants: appareils et outillage électriques, 4·31 pour cent; machines, équipement et fournitures (sauf électriques). 4·25 pour cent; bois et matériaux de construction, 3·63 pour cent; abacs et produits du tabac, 3·32 pour cent; automobiles, 3·23 pour cent; métaux et ouvrages en métal, 2·94 pour cent; papier et articles en papier, 2·86 pour cent; quincaillerie, 2·36 pour cent, et charbon et coke, 2·04 pour cent.

Le reste du commerce de gros, formant 7·59 pour cent du total, se répartissait comme suit: articles de récréation, de sport et de photographie, 0·53 pour cent; articles pour la ferme (à l'exclusion des machines agricoles et outillage), 0·57 pour cent; produits forestiers (à l'exclusion du bois d'œuvre), 0·72 pour cent; ameublement et accessoires, 0·85 pour cent; marchandise générale, 0·92 pour cent; mitraille de fer et d'acier et autres déchets, 0·31 pour cent; bijouterie et articles d'optique, 0·36 pour cent; cuir et articles en cuir, 0·50 pour cent; équipement et fournitures de plomberie et chauffage, 0·93 pour cent; tous autres genres de commerce, 1·90 pour cent.

Lorsque l'analyse des ventes par genres de commerce se restreint aux maisons de gros, on constate que l'ordre d'importance diffère quelque peu de celui que présente le commerce de gros tout entier. Le groupe principal parmi les maisons de gros était celui des denrées alimentaires (n.s.a.), avec des ventes de \$254,163,300, ou 22.87 pour cent du total pour les maisons de gros. Le groupe "épiceries et spécialités alimentaires" vient ensuite avec \$221,216,000, ou 19.91 pour cent. De la sorte, les négociants en épiceries et en denrées alimentaires se sont attribué plus de 40 pour cent du chiffre d'affaires des maisons de gros. Les ventes du groupe du vêtement ce lingerie ont atteint \$102,358,100, ou 9.21 pour cent, de sorte que le chiffre d'affaires des trois groupes susdits a représenté plus de la moitié du commerce des maisons de gros.

Répartition géographique du commerce de gros.

Plus de la moitié du commerce de gros au Canada est effectuée par des établissements situés dans l'Ontario et le Québec. La centralisation est plus forte dans le cas du commerce des maisons de gros que dans celui de tout le commerce de gros, étant donné que le commerce des grains, à Winnipeg, dirigé par des grossistes spécialisés, tend à augmenter la part revenant au Manitoba dans le total. La répartition des ventes globales de tous les établissements de gros était comme suit: 30.49 pour cent aux établissements de l'Ontario; 27.21 pour cent à ceux du Québec; 4.75 pour cent à ceux des Provinces Maritimes, 29.94 pour cent à ceux des Provinces des Prairies et 7.61 pour cent à ceux de la Colombie Britannique.

Les ventes des maisons de gros se répartissaient comme suit: 34·87 pour cent à l'Ontario; 32·00 pour cent au Québec; 6·75 pour cent aux Provinces Maritimes; 17·61 pour cent aux Provinces des Prairies, et 8·77 pour cent à la Colombie Britannique.

Comme les débouchés du commerce de gros sont situés dans les centres populeux du pays, la majeure partie du commerce de gros est faite par des établissements situés dans les grandes villes. En fait, à peu près les deux tiers de tout le commerce va à des maisons établies dans les quatre villes de Montréal, Toronto, Winnipeg, et Vancouver. Le tableau I indique la position relative de ces villes.

TABLEAU I—GANADA—COMMERCE DE GROS DANS LES PRINCIPALES VILLES, 1930 (Les ventes sont indiquées en miliers de dollars)

Tous établissements				Maisons de gros		
	Nombre	Ventes nettes		Nombre	Ventes nettes	
	d'établis- sements	Montant	Pour-cent du total	d'établis- sements	Montant	l'our-cent du total

Commerce de gros par constitution des établissements

Pour les fins du recensement les établissements de gros ont été classés solon leur constitution ou leur mode d'organisation financière. Près de 70 pour cent des établissements, soit 8,857 sur un total de 13,140, sont exploités par des sociétés, et 3,355 appartiennent à des particuliers. Les sociétés sont au nombre de 822, et l'on compte 106 associations coopératives. C'es chiffres portent sur le nombre d'établissements et non pas sur le nombre de maisons exploitant les bureaux de ventes en gros. Du fait que certaines firmes peuvent se livrer à la fois au commerce de détail et au commerce de gros, il est difficile de déterminer le nombre net de maisons

Un relevé soigneux bien qu'incomplet du nombre d'établissements de gros a démontré qu'il existait quelque 4,299 firmes opérant comme maisons de gros dont 1,960 légalement constituées. Le nombre de firmes opérant comme autres établissements de gros était de 2,959 dont 1,121 légalement constituées. On a obtenu ces totaux en ne comptant chaque firme qu'une fois, sans égard au nombre de succursales qu'elle maintenait.

Pour tout le commerce de gros, les ventes d'établissements constitués en sociétés par actions formaient 79.52 pour cent du chiffre global. Pour les maisons de gros, les ventes des corporations constituaient 82.14 pour cent du total, et celles des entreprises particulières, 11.24 pour cent. Les associations coopératives avaient effectué 7.17 pour cent des ventes de tous les établissements de gros, mais 0.08 pour cent seulement des ventes attribuées aux maisons de gros.

Organisations multiples dans le commerce de gros

Bien qu'on se figure généralement que les compagnies de magasins en chuîne ne s'occupent que du commerce de détail, il n'en existe pas moins, dans le domaine du gros, plusieurs organisations exploitant un certain nombre de succursales. Pour les fins de la présente analyse, les chiffres qui se rapportent aux maisons de gros et aux autres établissements de gros sont indiqués séparément dans les tableaux. La répartition des ventes selon le nombre d'unités exploitées est indiquée dans le tableau II pour ces deux grandes divisions du commerce de gros.

TABLEAU II.—CANADA—RÉPARTITION DES VENTES SELON LE NOMBRE D'ÉTABLISSEMENTS EXPLOITÉS

_	Maisons de gros	Autres établisse- ments de gros
Firmes exploitant— 1 unité 2 unités 3-6 unités 6-25 unités 1 lus de 25 unités	59·3 11·4 12·7 10·3 6·3	41·6 11·0 13·4 25·4 8·6
Total	100.0	100-0

Le tableau ci-dessus permet de constater que les plus fortes variations entre les maisons de gros et les autres établissements de gros se rapportent à la proportion des ventes faites par les établissements à une seule unité et par les organisations comprenant de 6 à 25 unités. Dans le premier cas, les maisons de gros avaient une proportion beaucoup plus forte des ventes, tandis que dans le second cas, la part la plus considérable revenait aux autres établissements de gros.

Au sujet de cette caractéristique, comme en ee qui eoncerne les autres aspects du commerce de gros, on remarque des différences considérables entre divers genres de commerce. Ainsi les firmes exploitant plus de 25 unités dans la classe des maisons de gros n'appartiement qu'aux groupes "Denrées alimentaires (n.s.a.)", "Epiceries et spécialités alimentaires" et "Tabacs". Dans le groupe "Denrées alimentaires" les organisations multiples se rencontrent surtout dans le commerce des fruits et légumes, et dans celui des viandes et produits connexes. Parmi les autres établissements de gros, les organisations multiples exploitant plus de 25 unités ne se rencontrent que dans le commerce du pétrole.

Chiffres d'affaires des établissements de gros.

L'importance relative des établissements de gros classés selon les ventes nettes offre un intérêt considérable. Bien que plus de la moitié du nombre total de maisons de gros et d'autres établissements de gros aient déclaré des ventes de moins de \$100,000 pour l'année, la majeure partie du commerce de gros est faite par des établissements au chiffre d'affaires dépassant \$500,000 par an.

La répartition du commerce de gros selon le chiffre des ventes est donnée dans le tableau III.

TABLEAU III—CANADA—NOMBRE D'ÉTABLISSEMENTS LE VENTES NETTES POUR LES MAISONS DE GROS ET LES AUTRES I TABLISSEMENTS DE GROS, GROUPÉS SELON LE CHIFFRE D'AFTAIRES.

Total	5,108	1,111,319	100.0	8,032	2,213,891	100.0

Le degré de prédominance des très grands établissements de gros, c'est bedire ceux qui ont un chiffre de ventes de \$1,000,000 et plus, varie beauconp dans les différents genres de commerce. Parmi les maisons de gros, les établissements aux ventes de \$1,000,000 et plus s'attribuaient 60-3 pour cent des ventes dans le groupe "charbon et coke", 11-2 pour cent dans le groupe "épicerie et spécialités alimentaires", 51-9 pour cent dans le groupe "quinenflerse", et 11-9 pour cent dans le groupe "métaux et ouvrages en métal".

Ventes à crédit

On a déjà vu au sujet des fonctions des grossistes qu'un de leurs attributs les plus importants est le financement de la distribution par l'octroi de crédit aux ach teurs, qui peuv ut être des détaillants, des firmes industrielles, on d'autres grossistes. Ann de déterminer dans quetle mesure les ventes à crédit out été un facteur du commerce de gros on a demandé aux établissements d'un diquer le montant de leurs ventes à crédit, c'est-à-dire de toutes les ventes non réglées au romptant. Bien que tous les établissements u'aient pu fournir des dennées sur leurs ventes à crédit, les rapports obtenus couvraient une partie considérable du commerce de gros. Les proportions de ventes nottes faites à crédit se trouvent, de la sorte, basées uniquement sur les rapports des firmes indiquant qu'elles ont vendu au comptant ou qu'elles ont accordé un certain crédit.

Comme les ventes à crédit comprennent toutes les ventes non réglées un compt ant, il s'y trouve des transactions comportant crédit pour de brèves périodes d'un atrente jours, de mèner que pour des délais plus considérables. D'après les rapports reals, 83,55 aux cent de tout le commerce de gros s'est fait à crédit, et les maisons de gros out effectué sur cette base 85,37 pour cent de leurs ventes. Le chiffre des ventes à crédit varie selon les genres de commerce, mais ce n'est que dans un petit nombre de ces derniers que la proportion est inférience à 60 pour cent.

Emploiement dans le commerce de gros

Les 96,737 personnes au service des établissements de gros durant l'aumée 1930 formaient 2·40 pour cent de tous les travailleurs rénnmérés du Canada. A l'exception des Provinces Maritimes, la proportion observée dans chaque région économique se rapprochait passablement de la moyenne pour tout le Dominiou, comme en fait foi le tableau IV.

TABLEAU IV.—POUR-CENT DU PERSONNEL DU COMMERCE DE GROS ŒMPLOYÉS LE PROPRIÉ-TARIES ACTIFS) PAR RAPPORT À LA POPULATION TOTALE OCCUPÉE À UN TRAVALE RÉMU-NÈRÉ

Le nombre moyen des employés occupés au commerce de gres pendant l'année était de 90,564, et la somme qu'ils out touchée en salaires et gages s'élevait à 8146,640,600. La rénumération moyenne par employé était donc de \$1,616. De plus, à l'exception des Pravinces Maritimes, où la rénumération moyenne a été de \$1,387, les chiffres des diverses régions économiques s'éloignent très peu de la moyenne pour le Dominion, puisqu'ils vont de \$1,603 pour le Québec à \$1,685 pour la Colombie Britannique.

Les plus forts employeurs dans le commerce de grob sont les marchands de cros, qui avaient à leur service 32,610 employés du sexe masculin et 6,574 du sexe féminin. Ce type de distributeur avait donc plus de 10 pour cent des employés. Venaient cusuite, par ordre d'importance comme employeurs, les succursales de ventes de manufacturiers, avec 12,446 hommes et 2,733 femmes. Les dépôts d'huiles étaient au troisième rang, avec 7,988 hommes et 256 femmes, suivis des importateurs avec 6,305 hommes et 1,602 femmes. Ces quatre types de distributeurs avaient à leur emploi 70,514 personnes sur un personnel global de 90,564 employés pour tous les établisses ments.

Dans l'analyse de l'emploiement par genre d'affaires on constate que pour le commerce de gros le plus grand nombre d'employés se trouvait dans le commerce d'épicerie et spécialités alimentaires, qui comptait 9,030 hommes et 2,139 femmes. Le groupe des denrées alimentaires (n.s.a.) venait ensuite avec 8,699 hommes et 1,344 femmes, le troisième rang étant occupé par le groupe du pétrole avec 8,718 hommes et 664 femmes.

C'est dans les genres de commerce énumérés ci-dessous que l'on trouve le plus grand nombre d'employés de sexe féminin:

	Nombre d'employes
	de sexe fémin _i n
Epiceries et spécialités alimentaires	2,139
Vêtement et lingerie	1,399
Denrées alimentaires (n.s.a.)	1,344
Machines, équipement et fournitures (sauf électriques)	1,341
Produits chimiques, pharmaceutiques et connexes	1,236
Appareils et outillage électriques	1,016

De même qu'une forte partie du commerce de gros est fait par des maisons constituées en sociétés par actions, on constate également une concentration correspondante des employés dans les établissements constituées de cette façon. Le tableau V montre la répartition des employés du commerce de gros selon le mode de constitution des établissements qu'ils servent.

TABLEAU V.—CANADA—NOMBRE D'EMPLOYÉS, SELON LE MODE DE CONSTITUTION DES ÉTA-BLISSEMENTS

Les établissements constitués en compagnies emploient près de 90 pour cent des travailleurs rémunérés de tout le commerce de gros et environ 84 pour cent des employés des maisons de gros.

Un autre aspect intéressant de l'emploiement dans le commerce de gros, c'est la répartition des employés selon l'importance de l'établissement. Les données de ce genre ont été préparées séparément pour les maisons de gros et pour les autres établissements de gros.

Le nombre moyen d'employés par maison de gros se place entre 9 et 10 personnes, mais les établissements aux ventes de \$1,000,000 ou plus par an avaient en moyenne plus de 67 personnes, alors que ceux dont les ventes étaient inférieures à \$25,000 avaient une personne en moyenne. Dans le eas des autres établissements de gros, le nombre moyen d'employés était de 5 environ, mais les établissements les plus importants comptaient en moyenne 40 employés alors que les moins considérables en avaient moins d'un par établissement. Les tableaux VI et VII donnent la répartition des employés selon l'importance des établissements.

TABLEAU VI.—CANADA—MAISONS DE GROS—RÉPARTITION DES EMPLOYÉS PAR LE CHIFFRE D'AFFAIRES

Frais généraux des maisons de gros

Comme les frais d'exploitation des établissements de gros dépendent surtout de l'importance des services qu'ils offrent, les chiffres pour les maisons de gros et pour les autres établissements de gros ont fait l'objet d'une analyse distincte. Même parmi les maisons de gros on note des fluctuations considérables dans le coût d'exploitation, étant donné que les diverses opérations du commerce de gros différent beaucoup entre elles.

Les frais d'exploitation des établissements de gros ont été déclarés sous les rubriques suivantes des formules envoyées à l'occasion du recensement: (a) salaires et gages des employés, (b) dépenses des vendeurs (autres que les salaires, commissions ou boni), (c) loyer, s'il y a lieu, et (d) toutes autres dépenses (y compris les taxes, les assurances, l'éclairage, le chauffage, la force motrice, la livraison, les fournitures, et toutes les dépenses non comprises ailleurs). Toute-fois, dans les tableaux qui accompagnent le présent rapport, les salaires et gages des employés forment la seule catégorie de dépense qui soit indiquée séparément. Les établissements de gros ne possédaient pas tous suffisamment de données détaillées pour être en mesure d'indiquer de façon complète leurs frais d'exploitation. Par conséquent, les tableaux ne renferment des données que pour les firmes qui ont fourni des détails complets quant à leurs frais d'exploitation.

Les frais d'exploitation de toutes les maisons de gros représentaient en moyenne 13.48 pour cent des ventes nettes. Les salaires et gages des employés formaient environ la moitié du total des frais d'exploitation. On notera que les chiffres des frais d'exploitation ne tiennent pas compte des services rendus par les propriétaires activement occupés à leur commerce. Bien que ce facteur ne soit pas aussi important que dans le domaine du détail, il n'en existe pas moins plusieurs genres de commerce de gros où les propriétaires forment une partie considérable du personnel. Bien que les propriétaires actifs aient été invités à déclarer le montant de leur rémunération s'ils touchaient un salaire fixe, on n'a pu déterminer quelle part respective des sommes déclarées il faudrait considérer comme rémunération pour services rendus et comme profits produits par l'entreprise. En l'absence d'une base permettant de déterminer de façon satisfaisante la rémunération des propriétaires, ce détail a été omis de l'analyse des frais d'exploitation.

Parmi les maisons de gros ce sont celles qui font le commerce de deurées de vente courante qui semblent accuser les frais moyens d'exploitation les moins élevés. Pour le commerce des tabacs, le coefficient était 7·79 pour cent; pour le groupe "Epiceries et spécialités alimentaires", 8·72 pour cent; et pour le groupe "Denrées alimentaires (n.s.a.)", 8·93 pour cent. Les établissements de gros qui font le commerce de produits sur la base d'un chargement de wagon ou plus par commande, tels les négociants en produits de la ferme (n.s.a.), ou en produits forestiers (à l'exclusion du bois d'œuvre) ont aussi des frais d'exploitation relativement peu élevés. Dans le cas des premiers, le coefficient était de 10·10 pour cent des ventes et pour le commerce des produits forestiers, de 8·28 pour cent. Les négociants en charbon et coke, dont les affaires se font par quantités passablement fortes, avaient un coefficient d'exploitation de 10·14 pour cent.

Par contre, dans les genres de commerce où il faut garder en stoek une grande variété d'articles et où les ventes portent sur certains produits particuliers, les frais d'exploitation sont proportionnellement beaucoup plus élevés. Le commerce de bijouterie et d'articles d'optique accusait des frais d'exploitation égalant 30·13 pour cent des ventes nettes, alors que le coefficient pour le commerce des articles de récréation, de sport et de photographie était de 26·32 pour cent. Les frais d'exploitation pour le groupe "Ameublement et accessoires" s'élevaient à 25·51 pour cent des ventes nettes, et pour le groupe "Machines, équipement et fournitures", à 24·79 pour cent. Il est intéressant de noter que les genres de commerce aux méthodes d'exploitation à peu près semblables accusent, d'habitude, à peu près les mêmes frais d'exploitation. Ainsi, le coefficient pour le commerce de quincaillerie est de 18·63 pour cent, et pour le groupe "Equipement et fournitures de plomberie et chauffage", de 19·29 pour cent.

Les remarques qui précèdent ne s'appliquent qu'aux frais relatifs d'exploitation par principal groupe commercial, mais il existe bien souvent des différences marquées entre certains commerces appartenant au même groupe. Les frais d'exploitation dans le commerce des drogues et fournitures pharmaceutiques (ligne générale) représentaient 13·11 pour cent des ventes nettes, mais dans le cas des drogues et fournitures pharmaceutiques (spécialités), le coefficient était de 27·91 pour cent. Dans l'épicerie (ligne générale), il était de 8·21 pour cent et dans les spécialités, épicerie et autre denrées alimentaires, de 12·57 pour cent.

Les frais d'exploitation moyens pour le groupe "Bois et matériaux de construction" se chiffraient à 15.92 pour cent des ventes, mais pour les matériaux de construction, ils représentaient 20.62 pour cent, et pour le bois de construction et le bois ouvré, 12.15 pour cent

Frais généraux des autres établissements de gros

Les coefficients d'exploitation accusent des variations encore plus prononcées parmi les types spécialisés de distributeurs que parmi les maisons de gros. Il n'y a pas lieu de s'en étonner, étant donné que les modes d'exploitation et la nature des services offerts varient énormément parmi les divers types de distributeurs et même entre des distributeurs de même type occupés à des genres de commerce différents. Quelques-uns des types spécialisés de distributeurs agissent à commission, cette dernière étant calculée soit sur la valeur des ventes soit sur la quantité de marchandises. Pour que de tels établissements puissent être exploités de façon profitable, il faut que le coefficient d'exploitation soit inférieur au taux de la commission.

Les dépôts d'hulles, qu'on ne rencontre que dans le commerce des produits pétroliers, accusaient des frais d'exploitation représentant 15-18 pour cent des ventes nettes. Ce chiffre est à comparer avec celui de 14-73 pour cent pour les maisons de gros dans le commerce de la gazoline et des hulles, et avec celui de 17-92 pour cent pour les maisons de gros faisant le commerce des produits pétroliers en général.

Les succursales de ventes de manufacturiers accusaient un coefficient moyen d'exploitation égal à 10-38 pour cent du chiffre d'affaires. Le plus faible coefficient pour ce type de distributeur était de 2-95 pour cent dans le commerce des tabacs et produits du tabac et la plus forte, de 19-73 dans le commerce d'ameublement et accessones.

Les courtiers avaient le faible coefficient d'exploitation de 1·83 pour cent de la valeur des commandes exécutées. Ce sont les courtiers en bois et matériaux de construction, qui, avec un coefficient de 7·09 pour cent, ont accusé les frais d'exploitation les plus élevés pour ce type de distributeur.

Les frais d'exploitation des marchands à commission ont représenté en moyenne 2.94 pour cent des ventes nettes. Mais ce faible coefficient était dû principalement à l'influence des chiffres du commerce des produits de la ferme, particulièrement celui des graius. Si l'on ne tenait pas compte de ce genre de commerce, le coefficient moyen pour les autres marchands à commission serait d'environ 5 pour cent.

Les frais d'exploitation des agents accusent des variations considérables. Le coefficient pour les agents d'exploitation était de 1.91 pour cent en moyenne; il variait entre 0.13 pour cent dans le commerce des produits de la ferme (n.s.a.) et 13.81 pour cent dans celui des denrées alimentaires (n.s.a.). Les agents d'importation accusaient un coefficient d'exploitation représetant 6.79 pour cent des ventes mais dans leur cas l'écart allait de 0.92 pour eent pour les produits de la ferme (n.s.a.) à 26.37 pour cent pour les appareils et l'outillage électrique. Les agents

de manufacturiers, qui constituent le type le plus important de distributeur de ce gunre, avaient un coefficient de 5.96 pour cent. Le plus bas était de 2.86 pour cent pour le commerce des tabacs et le plus élevé, de 16.95 pour cent, pour le commerce des dennées abacentaires (n.s.a.). Les frais d'exploitation des agents vendeurs attergnaient un coefficient moyen de 5.73, le coefficient le plus élevé pour ce type de distributeur étant 46-24 pour cent pour le commerce des denrées alimentaires (n.s.a.).

Les frais d'exploitation des entrepôts de magasins en chaîne représent tient 4.75 p aur cent de la valeur des marchandises livrées. Les coefficients étaient de 1.66 pour cent pour le groupe "Produits chimiques, pharmaceutiques et connexes"; 9.23 pour cent pour le vétement et la lingerie; 10.80 pour cent pour le groupe de marchandise générale; 3.51 p aur cent pour l'épicerie et spécialités alimentaires, et 5.08 pour cent pour les tabacs et produits du tubac.

Les échanges de films de cinéma représent ut un type exceptionnel de distributeur en gros, vu que le négoce de ces établissements consiste à assurer aux établissements de entéma un approvisionnement constant de nouveaux films en location, et leurs recettes consistent presque entièrement en loyers de films. Les frais d'exploitation des échanges de films représentent 25-38 pour cent de leurs recettes brutes.

Capitaux engagés dans le commerce de gros

La valeur des capitanx engagés dans le commerce de gros à la fin de 1930 se cluffrait à \$759,439,500 pour tous les types d'établissements. Les capitanx des maisons de gros s'élevaient à \$422,513,200, soit 38·0 pour cent de la valeur des ventes, et les capitanx des autres établissements de gros se chiffraient à \$336,926,300, soit 15·2 pour cent des ventes. Les capitanx engagés comprenaient la valeur d'inventaire des marchandises et fournitures, l'aigent en espèce et les effets commerciaux, ainsi que la valeur des biens détenus en toute propriété. La valeur des marchandises en mains pour revente était le soul détail du capital déclaré séparément. Les maisons de gros détenaient des stocks d'une valeur de \$297,221,100, soit 39·7 pour cent des capitaux engagés. La valeur des stocks des autres établissements de gros était de \$129,416,100, soit 38·4 pour cent des capitaux immobilisés.

A l'occasion du recensement partiel des établissements de commerce effectué en 1924, on s'état procuré au sujet des capitaux engagés des données tombant sous les rubriques suivantes; (a) argent en caisse et dans les bauques, (b) marchandises en mains, (c) comptes dus, (d) mobiliers et agencements, (e) outillage de livraison, et (f) effets miniobiliers. Bien que tous les établissements de gros n'aient pas soumis de rapport pour le recensement de 1924, les résultats obtenus à cette époque sont encore intéressants en tant qu'ils indiquent la proportion des capitaux relevée sous chacune des rubriques susdites. Les pourcentages pour tous les établissements de gros recensés sont montrés dans le tableau VIII.

TABLEAU VIII—CANADA—LA DISTRIBUTION I ROPORTIONNELLE DU CAPITAL DES ÉTABLISSE-MENTS DE GROS, 1923

Item	Pour cent
Argent en casse et d'us les banques Marchandises en muns Comptes dus Mobiliers et agencements Outillage de livraison Effets immobiliers	3.8 39.3 36.8 2.9 1 3 15.9
Cantal, total	100-0

Il est intéressant de noter la relation étroite qui existe entre les chiffres de 1924 et ceux de 1930 en ce qui concerne la proportion du capital global que représentait la valeur des stocks. En 1924, les marchandises en stock formaient 39-3 pour cent du capital global, comparativement à 39-7 pour cent pour les maisons de gros et 38-4 pour cent pour les antres établissements de gros, en 1930. Il est impossible de savoir si les autres détails des capitaux engagés étaient répartis dans les mêmes proportions en 1924 et en 1930.

Pour le commerce de gros tout entier, les plus fortes immobilisations de capitaux sont indiquées pour le groupe du pétrole et dérivés dans lequel \$131,770,800 étaient engagés et dont les ventes se chiffraient à \$220,375,500. Les capitaux placés dans le groupe "Machines, équipement et fournitures (sauf électriques)" venaient au second rang, avec \$88,563,000. Le groupe "Epiceries et spécialités alimentaires" se classait troisième avec un capital de \$87,064,400, ses ventes atteignant \$463,007,200. Venaient ensuite, en quatrième et cinquième places, au point de vue des capitaux engagés, les groupes "Vêtement et lingerie" et "Produits de la ferme (n.s.a.)", avec \$62,366,500 et \$52,436,800 respectivement.

Parmi les maisons de gros, le commerce d'épiceries de spécialités alimentaires prenait le premier rang avec des capitaux de \$65,667,800. Venaient ensuite le groupe "Vêtement et lingerie" avec \$55,213,500, le groupe "Machines, équipement et outillage (sauf électriques)" avec \$51,-090,800, le commerce de quincaillerie, avec \$42,666,300, et celui des denrées alimentaires (n.s.a.), avec \$35,925,900.

Continuité de propriété

Les établissements de gros, pris dans leur ensemble, manifestent une plus grande longévité que les établissements de détail. Le taux de mortalité soit parmi les détaillants, soit parmi les grossistes, ne peut être déterminé au moyen des données du recensement, vu que ces dernières ne s'appliquent qu'aux établissements qui étaient en exploitation en 1930. Le nombre d'établissements qui peuvent avoir fait leur début ou changé de propriétaires à une époque quelconque avant 1930 est inconnu. Néanmoins, il est significatif que 52·07 pour cent seulement des magasins de détail sur lesquels on possède des données avaient été exploités par les mêmes propriétaires pendant plus de cinq ans, comparativement à 64·34 pour cent pour les maisons de gros et 64·38 pour cent pour les autres établissements de gros.

Les proportions de maisons de gros, par période d'existence continue, sont à peu près les mêmes dans les diverses régions économiques que pour le Canada tout entier, sauf les Provinces Maritimes et la Colombie Britannique. Celles-là avaient une plus forte proportion d'établissement exploités par les mêmes propriétaires pendant plus de cinq ans, tandis que dans la Colombie Britannique la proportion était plus faible. Dans les Provinces Maritimes, 73·48 pour cent des maisons de gros avaient été exploitées par les mêmes propriétaires pendant plus de cinq ans, tandis qu'en Colombie Britannique le pour cent de ce groupe n'était que de 57·50. Les Provinces Maritimes avaient en outre la plus forte proportion de maisons de gros exploitées pendant plus de 21 ans par les mêmes propriétaires. Le pour cent pour les Provinces Maritimes était de 23·62, comparativement à 12·30 pour le Canada et 7·78 pour la Colombie Britannique, qui avait la plus faible proportion de firmes établies depuis longtemps.

Ventes par catégories de marchandises

Outre les ventes globales nettes de chaque établissement de gros, on s'est efforcé d'obtenir les chiffres de la valeur des ventes pour chaque catégorie de marchandises vendue par les établissements recensés. On avait ménagé sur les formules de recensement un espace permettant de déclarer les ventes de 90 catégories principales de denrées et de plus de 150 denrées particulières. Toutes les firmes ne relèvent pas leurs ventes par catégories de denrées, de sorte qu'il a été impossible d'obtenir le détail complet des ventes nettes par denrées. Pour cette raison il a fallu créer le terme "couverture en marchandises". Les proportions indiquées dans le tableau sous la rubrique "couverture en marchandises" indiquent jusqu'à quel point on a décomposé par denrées les ventes nettes pour chaque genre de commerce. Bien que certaines firmes aient été en mesure de fournir leurs chiffres de vente pour leurs principales catégories de marchandises, elles n'ont pu donner de détails permettant d'effectuer un sous-classement. Il a donc fallu, dans les tableaux de récapitulation, donner les chiffres des ventes par denrées pour les seules catégories principales de marchandises indiquées ci-après.

TABLEAU IX.-VENTES PAR CATÉGORIES DE MARCHANDISES

(Les ventes sont indiquées en milliers de dollars)

^(!) Les faibles différences entre les sommes des divers item et les totaux sont dues à ce que les chiffres sont donnés à un mille près soulement.

Les chiffres paraissant après les classifications dans le tableau IX sont œux des ventes que les établissements de gros ont mentionnées pour œs lignes. Les valeurs données ne représentent pas nécessairement la distribution ou consommation réelle de ces denrées au Canada. Les raisons pour lesquelles les chiffres des établissements de gros ne penvent servir à cette fin ont déjà été données, mais il est peut-être bon d'y revenir. Le tableau IX indique que la denrée dont le chiffre est le plus élevé est le grain, pour lequel les maisons de gros déclarent des ventes de \$9,318,000 et les autres établissements de gros, des ventes de \$514,335,000.

L'examen des tableaux détaillés des denrées pour le Dominion, montre que du total des ventes de grain déclarées, soit \$523,653,000, pas moins de \$514,624,000 sont au crédit d'établissements faisant le commerce de produits de la ferme (n.s.a.) Les types les plus importants de marchands de gros dans ce commerce, au point de vue de la valeur des ventes, sont les suivants:

Marchands exportateurs	
Courtiers	67,808,000
Agences coopératives de ventes	159.483.000
Elévateurs de ligne	121,765,000

Sauf en ce qui concerne les marchands exportateurs, qui sont généralement des agences spécialisées dans la sphère de l'exportation, les types mentionnés plus haut, comme aussi d'autres énumérés dans les tableaux des denrées, prennent part à toute une série de transactions intermédiaires tout en s'occupant de vendre aux acheteurs ultimes au Canada ou aux acheteurs étrangers. Par exemple, des courtiers peuvent effectuer des ventes pour les marchands exportateurs, les élévateurs de ligne, les marchands à commission ou d'autres établissements. Pour cette raison, il existe une somme considérable de chevauchement dans les ventes déclarées dans ce commerce particulier et le total des chiffres n'indique pas la valeur réelle des denrées finalement distribuées.

Bien que la valeur des ventes dans certaines lignes tende à dépasser la valeur réelle des marchandises distribuées, dans d'autres lignes les valeurs déclarées sont considérablement inférieures à celles des marchandises mises en usage durant l'année. On trouve un exemple de cette tendance dans le cas des meubles. Dans le tableau précédent, on verra que la valeur des ventes de meubles s'est élevée à \$504,000 pour les maisons de gros et à \$4,163,000 pour les autres établissements de gros. Ces totaux sont considérablement au-dessous de la valeur des meubles distribués au Canada par toutes les agences durant l'année 1930. La différence dans ce cas est due au fait que les produits des fabriques de meubles au Canada sont vendus en grande partie directement aux magasins de détail et une faible proportion seulement passe par les établissements de gros. Les chiffres des tableaux de denrées ne mentionnent que cette partie de la production vendue par l'entremise des établissements de gros.

(1) Les pourcentages de cette colonne sont basés sur les réponses des maisons qui ont spécifié si elles vendaient au comptant ou à crédit.

(2) Les chiffres de cette colonne sont basés sur les réponses des maisons qui ont déclaré ce genre de ventes. Il se peut qu'ils ne représentent pas les ventes totales aux consommateurs industriols, vu que certaines maisons n'ont pas noté ces transactions.

(1) The percentages in this column are based on the replies of those firms reporting whether they sold for each or extended credit.

(2) The figures in this column are based on the replies of those firms reporting such sales. These may not represent the total sales to industrial consumers as some firms kept no records of such transactions.

⁽¹⁾ Les pourcentages de cette colonne sont basés sur les réponses des maisons qui ont spécifié si elles vendaient au comptant ou à orédit.

(2) Les chiffres de cette colonne sont basés sur les réponses des maisons qui ont déclaré ce genre de ventes. Il se peut qu'ils ne représentent pas les ventes totales aux consommateurs industriels, vu que certaines maisons n'ont pas noté ces transactions.

^(!) All establishments did not report full particulars of operating expenses. This table includes only these establishments which gave total operating expenses. The operating expenses shown in this table should be considered representative only when the sales of establishments reporting total expenses form a high proportion of the total sales of all establishments in the same classification.
(2) Not including proprietors' salaries.
(3) Tous les établissements n'ont pas fourni des détails complets do leurs dépenses courantes. Ce tableau ne comprend que les établissements qui les ont fournis au complet. Les dépenses courantes de ce tableau doivent être considérées comme représentatives soulement lorsque les ventes des établissements déclarant leurs dépenses totales forment une haute proportion des ventes totales de tous les établissements dans la même classification.
(2) Salnires des propriétaires non-inclus

⁽¹⁾ More than 5 years but exact date not reported.

⁽²⁾ Any slight differences in cross or vertical addition of sales result from the necessity of adjusting the figures for each economic division to the nearest thousand.

Note—This table does not show the expectation of husiness life of wholesale establishments but only the period for which establishments reporting date of possession had been under the same ownership. No information is available for establishments which may have commenced business and ceased operating prior to 1930.

⁽¹⁾ Plus de 5 ans mais pas de date exacte.

Nora—Le présent tableau ne montre pas quelle doit être la durée anticipée de propriété des établissements de gros mais sculement la période pendant laquelle les établissements capables d'en faire la déclaration ont été sous le même propriétaire. Il n'y a aucune information sur les établissements ayant débuté en affaires et cessé d'exister avant 1930

⁽²⁾ Toute différence dans les additions transversales ou verticales des ventes est due à la nécessité d'ajuster les chiffres de chaque région économique à un millier près.

⁽¹⁾ More than 5 years but exact date not reported.

⁽²⁾ Any slight differences in cross or vertical addition of sales result from the necessity of adjusting the figures for each conomic division to the nearest thousand.

None.—This table does not show the expectation of business life of wholesale establishments but only the period for which establishments reporting date of possession had been under the same ownership. No information is available for establishments which may have commenced business and ceased operating prior to 1980.

^(*) l'us de) ans mais pus de date exacte.

(2) Toute différence dans les additions transversales ou verticales des ventes est due à la nécessité d'ajuster les chiffres de chaque région économique à un millier près.

Nora.—Le présent tableau ne montre pas quelle doit être la durée anticipée de propriété des établissements de gros mais seulement la période pendant laquelle les établissements capables d'en faire la déclaration ont été sous le même propriétaire. Il n'y a aucune information sur les établissements ayant débuté en affaires et cessé d'exister avant 1930.

⁽¹⁾ Not all establishments were able to furnish information regarding sales by commodities. This table shows, for each of the major kind-of-business classifications, the amount and percentage of the total net sales that have been broken down by commodities. The breakdown of sales by commodities was in some cases reported on the basis of gross sales rather than net sales. For this reason the commodity sales may in some instances exceed the total net sales by the amount of returned goods and allowances.

Co. (1) Les établissements n'ont pas tous été capables de fournir des informations sur les ventes recoupées en marchandises. Co. (2) Les étables montre pour chaque classification majeure par genre de commerce le montant et le pour-cent de toutes les ventes net neu de la commerce de montant et le pour-cent de toutes les ventes en cet appearence de la commerce de montant et le pour-cent de toutes les ventes net narchandises set dans quelques cas basé sur le chiffro lord un lieu du chiffro net des ventes. Pour cette raison les ventes de marchandises peuvent dans certains cas dépasser le total des ventes nettes par la valeur des marchandises retournées ou des allocations.

⁽¹⁾ For each commodity the sales reported are shown by trades and by types of establishments operating in each trade. A full explanation of the terms used is given in the introduction to this report.

20939-40

⁽²⁾ Slight differences may be found in some cases between the figures given for total sales of a commodity and the sum of the sales figures by trades or types of establishments due to the figures being shown to the nearest thousand.

(x) Less than \$1,000.

⁽¹⁾ Dans chaque marchandisc, les ventes déclarées sont divisées par genre de commerce et type d'établisse-ment dans chaque commerce. Une explication com-plète des termes paraît dans l'introduction de se rap-

plète des termes paraît dans l'introduction de se rap-port.

(*) Dans certains cas il y a de légères différences entre le chiffre des ventes globales d'un article et la somme des ventes par commorce ou type d'établissement, parce que les chiffres ne sont donnés qu'à un millier près.

(**) Moins de \$1,000.
